This application is for electric service under the Select Company (“Company”) Net Energy Metering Rider for the above customer (“Customer”). The Customer qualifies for the Net Energy Metering Rider since its generator facility uses as its fuel either solar, wind, biomass, landfill gas, or hydropower or uses a single micro-turbine, or a fuel cell which is located on the Customer’s premises and operates in parallel with the Company’s transmission and distribution systems and is intended primarily to offset part or all of the Customer’s requirements for electricity.

The Customer-generator facility qualifies for the Rider as it is a generator, which is one of those qualifying facilities identified in the Rider and restated above. Total rated generating capacity of the Customer-generator to be used and billed under the Net Energy Metering Rider, is _____ kWAC. This capacity when aggregated with all other customer-generator capacity approved for use under this Net Energy Metering Rider must total less than one percent of the Company’s aggregate customer peak demand in this state, as determined by the Company, in order to qualify for service under the Net Energy Metering Rider. The Customer acknowledges that it has read the Net Energy Metering Rider and agrees to all terms and conditions contained therein, including without limitation those specified in the Company’s Distribution Interconnection Tariff. Specifically, the Customer understands and agrees that a meter, which is capable of registering the flow of electricity in each direction, must be in service at the facility. If a meter is not in service with this capability, the Customer must submit a written request for the Company at the Customer’s cost to acquire, install, maintain, and read an approved meter. All costs related to this meter shall be borne by the Customer.

Customer acknowledges and agrees that operation of Customer's generation facility is intended primarily to offset part or all of Customer's electricity requirements in accordance with the Net Energy Metering Rider. Customer further acknowledges and agrees that excessive generation by the Customer's generation facility, as determined solely by the Company, is cause for disqualification for service under the Net Energy Metering Rider.
