Counsel for Mid-Atlantic Interstate Transmission, LLC,
Metropolitan Edison Company
and Pennsylvania Electric Company

Date: June 19, 2015

I. INTRODUCTION AND OVERVIEW

1. Mid-Atlantic Interstate Transmission, LLC (“MAIT”), Metropolitan Edison Company (“Met-Ed”) and Pennsylvania Electric Company (“Penelec”) (together, the “Joint Applicants”) are filing this Joint Application to obtain the approval of the Pennsylvania Public Utility Commission (the “Commission”) under Chapters 11, 21 and 28 of the Public Utility Code: (1) for Met-Ed and Penelec to contribute their existing transmission assets to MAIT; (2) for MAIT to be a certificated Pennsylvania public utility; and (3) for approval of certain affiliated interest agreements. Contemporaneously, Jersey Central Power & Light Company (“JCP&L”), an affiliate of the Joint Applicants that provides electric distribution service in the State of New Jersey, is seeking the approval of the New Jersey Board of Public Utilities (“NJBPU”) to contribute its transmission assets to MAIT; for MAIT to be granted public utility status in New Jersey; and for approval of certain affiliated interest agreements (Met-Ed, Penelec and JCP&L are hereafter referred to collectively as the “Operating Companies”).

2. MAIT is a newly-formed limited liability company to be jointly owned by the Operating Companies and FirstEnergy Transmission, LLC (“FET”) that will provide interstate electric transmission service subject to the jurisdiction of the Federal Energy Regulatory Commission (“FERC”). Upon obtaining the necessary approvals from the Commission, the NJBPU and the FERC,¹ the Operating Companies will contribute their transmission assets to MAIT in exchange for membership interests in MAIT pursuant to certain agreements among the Operating Companies, FET and MAIT (the “Transaction”). As previously noted, MAIT is also

¹ Contemporaneously, Met-Ed, Penelec, JCP&L, FET and MAIT are filing at the FERC an *Application for Authorization Pursuant to Sections 203(a)(1)(A) and 203(a)(2) of the Federal Power Act and Request for Waivers of Certain Filing Requirements for approval of the transfer of the Operating Companies’ Transmission Assets to MAIT*.

seeking a certificate of public convenience conferring the status of a public utility under Section 102 of the Public Utility Code. Finally, in addition to approvals under Chapters 11 and 28, the Joint Applicants request that the Commission grant the approvals necessary under Chapter 21 of the Public Utility Code for the agreements that are necessary to consummate the Transaction and provide for the subsequent operation of MAIT, including revisions to existing affiliated interest arrangements that will facilitate the provision of shared services between MAIT and the Operating Companies, as more fully set forth hereafter.

3. The creation of MAIT and the contribution to it of the Operating Companies' transmission assets will establish a transparent, stand-alone transmission entity that is expected to have better credit metrics than any one of the Operating Companies standing alone. As explained in Section V, *infra*, consolidating all of the Operating Companies' transmission assets in a stand-alone transmission company can reduce investors' perception of financial risk, strengthen the credit profile of the transmission function and, in that way, provide improved access to capital at reasonable rates. Better credit metrics and improved access to capital is particularly important at this time because FirstEnergy has recently established the Energizing the Future ("EtF") program designed to increase the reliability of the transmission system, improve the condition of equipment on the system, enhance system performance, and improve operational flexibility. Although the EtF program initially focused on reliability enhancement projects in the transmission zone of American Transmission Systems, Inc. ("ATSI") located in Ohio and western Pennsylvania, FirstEnergy now proposes to expand the program to include reliability enhancement investments in the Met-Ed, Penelec and JCP&L zones. Based on a preliminary assessment, increased transmission system capital investments in the Operating Companies' transmission zones could total as much as \$2.5 to \$3.0 billion over the next five to ten years to

maintain reliability in the face of evolving conditions on the transmission system that are detailed in Section V, *supra*, and in the direct testimony of Jeffrey J. Mackauer (Joint Applicants' Statement No. 2). The expansion of the EtF program is the comprehensive plan for guiding these transmission investments, which will enhance reliability and improve the resiliency and capacity of the transmission system for the benefit of the Operating Companies' existing and new customers.

4. The stronger credit metrics of MAIT and the cost savings that will be realized by having one company issue all of the debt needed to finance future transmission investments, rather than separate issuances by each Operating Company, will contribute significantly to successfully implementing the expansion of the EtF program. As explained in the direct testimony of Steven R. Staub (Joint Applicants' Statement No. 3), completing the proposed Transaction is reasonably projected to produce \$135 million in debt cost savings over the thirty-year life of approximately \$1.5 billion of debt-financed transmission-related plant additions. Thus, the Transaction will place MAIT in a better position than Met-Ed or Penelec to make substantial new transmission investments designed to enhance the resilience, reliability and load-carrying capacity of their transmission systems in Pennsylvania. Moreover, the Transaction will relieve Met-Ed and Penelec of the need to issue debt to finance transmission investments and, in that way, will strengthen their capacity to fund investments in their Pennsylvania jurisdictional distribution systems. Finally, the increased and accelerated levels of investment that the Transaction will enable will have a beneficial economic impact on Pennsylvania, including spurring increased job creation, as also explained by Mr. Mackauer.

5. The names and addresses of the Joint Applicants are as follows:

Metropolitan Edison Company 2800 Pottsville Pike P.O. Box 16001 Reading, PA 19612-6001	Pennsylvania Electric Company 2800 Pottsville Pike P.O. Box 16001 Reading, PA 19612-6001	Mid-Atlantic Interstate Transmission, LLC 76 South Main Street Akron, OH 44308
--	--	---

6. The names and addresses of the Joint Applicants' attorneys are as follows:

II. DESCRIPTION OF THE JOINT APPLICANTS AND THE OTHER COMPANIES INVOLVED IN THE PROPOSED TRANSACTION

7. Met-Ed is a wholly-owned subsidiary of FirstEnergy Corp. ("FirstEnergy"). Met-Ed provides service to about 553,000 electric utility customers in eastern Pennsylvania. Met-Ed had a summer peak load in 2014 of about 2,817 MW, with about two-thirds of that load attributable to residential and small commercial customers. In addition to owning, operating and maintaining 11,292 circuit miles of distribution lines, Met-Ed currently owns 1,406 miles of transmission lines and related facilities within its service territory, which are under the operational control of the PJM Interconnection, LLC ("PJM") as the regional transmission organization ("RTO").

8. Penelec is a wholly-owned subsidiary of FirstEnergy. Penelec provides service to about 591,000 electric utility customers in central and western Pennsylvania. Penelec had a summer peak load in 2014 of about 2,788 MW, with about two-thirds of that load attributable to

residential and small commercial customers. In addition to owning, operating and maintaining 16,853 circuit miles of distribution lines, Penelec currently owns 2,877 miles of transmission lines and related facilities within its service territory, which are under the operational control of PJM as the RTO.

9. JCP&L is also a wholly-owned subsidiary of FirstEnergy that provides service to about 1.1 million electric utility customers in New Jersey. In addition to its distribution facilities, JCP&L currently owns 2,569 circuit miles of transmission lines and related facilities within its service territory, which are under the operational control of PJM as the RTO.

10. FET is a subsidiary of FirstEnergy. FET's subsidiaries include ATSI and Trans-Allegheny Interstate Line Company ("TrAILCo"). ATSI is a transmission-only company or "transco" that provides transmission services in the western portion of Pennsylvania and in the state of Ohio. Currently, ATSI owns and maintains over 8,100 circuit-miles of transmission lines, substations and other transmission facilities that are located solely in the ATSI Zone of PJM and are under the operational control of PJM as the RTO. ATSI is comprised in large part of the transmission assets formerly owned by FirstEnergy's operating utilities in western Pennsylvania and Ohio (*i.e.*, Pennsylvania Power Company ("Penn Power") in western Pennsylvania, Toledo Edison Company, Ohio Edison Company, and the Cleveland Electric Illuminating Company in Ohio).² TrAILCo owns and maintains over 180 circuit-miles of transmission lines, substations and other transmission facilities, including the Trans-Allegheny Interstate Line and

² Pennsylvania Power Company ("Penn Power") a public utility subsidiary of Ohio Edison Company, which is in turn a subsidiary of FirstEnergy that provides electric distribution service in western Pennsylvania, transferred its transmission assets to ATSI pursuant to the Commission's approval as evidenced by a certificate of public convenience issued in 2000. *Application Of Pennsylvania Power Co. For (1) A Certificate Of Public Convenience Authorizing The Transfer Of Certain Transmission Assets To American Transmission Systems, Inc., And (2) Approval Of Certain Affiliated Interest Agreements Necessary To Effect The Transfer*, Docket No. A-110450F0016 (July 14, 2000).

the Black Oak Static Var Compensator, with other projects under construction.³ TrAILCo's operating assets are primarily located in Pennsylvania, West Virginia and northern Virginia and are under the operational control of PJM as the RTO.

11. As previously explained, MAIT is a newly formed limited liability company that will be jointly owned by the Operating Companies and FET and, following the contribution of transmission assets for which approval is requested, will furnish interstate transmission service. From and after the closing on the Transaction, MAIT will construct, own and maintain new transmission facilities in the Operating Companies' service areas, including those projects currently in the planning or construction phase.

III. OVERVIEW OF THE PROPOSED TRANSACTION

12. The principal elements of the Transaction provide that the Operating Companies will make a one-time contribution of their existing transmission assets to MAIT as a tax-free transfer in exchange for Class B membership interests in MAIT. As owners of Class B membership interests, the Operating Companies will have voting rights over various fundamental structural matters, namely, the filing of a voluntary petition in bankruptcy, a merger or the sale of substantially all the assets of MAIT. FET, in turn, will make a cash contribution to MAIT in exchange for Class A membership interests, which will give FET operating and management control of MAIT. For financial reporting purposes, MAIT will be treated as a consolidated subsidiary of FET. The Operating Companies will record their investment in MAIT as an

³ See *Application of Trans-Allegheny Line Company (TrAILCo) For Approval: 1) for a Certificate of Public Convenience to Offer, Render Furnish or Supply Transmission Service in the Commonwealth of Pennsylvania; (2) Authorization and Certification to Locate, Construct, Operate and Maintain Certain High-Voltage Electric Substation Facilities; 3) Authority to Exercise the Power of Eminent Domain for the Construction and Installation of Aerial Electric Transmission Facilities Along the Proposed Transmission Line Routes in Pennsylvania; 4) Approval of an Exemption from Municipal Zoning Regulation With Respect to the Construction of Buildings; and 5) Approval of Certain Related Affiliated Interest Arrangements*, Docket Nos. A-110172 *et al.* (December 13, 2008).

investment in subsidiary companies, as explained by Mr. Taylor (Joint Applicants' Statement No. 4). MAIT will be an affiliate of FirstEnergy Service Company ("FESC"), which will provide various administrative and management services to MAIT.

13. As a result of the Transaction, the Operating Companies will no longer own any facilities serving a transmission function. All transmission services over the transmission facilities will be provided by MAIT pursuant to the terms of PJM's Open Access Transmission Tariff ("OATT"), consistent with the current operation of these facilities by Met-Ed and Penelec. The transmission facilities will remain subject to the terms of the PJM OATT at all times before, during and after the Transaction. Rates for transmission service will remain subject to the jurisdiction of the FERC and administered by PJM through the OATT. The Operating Companies will continue to own and operate all distribution facilities they presently own and will continue to provide retail electric service within their existing service territories as they do today.

14. The existing transmission assets of the Operating Companies, including transmission-related regulatory assets, will be contributed to MAIT at book value (original cost less depreciation reserve). The goodwill associated with those transmission assets, as recorded on the Operating Companies' books of account, will also be transferred to MAIT. In exchange, the Operating Companies will receive the Class B membership interests in MAIT previously described. Because the Transaction will be structured to be a tax-free exchange of assets for ownership interests in a new limited liability company, the Operating Companies will not recognize taxable gain or loss on the Transaction. Moreover, because the Transaction is a tax-free exchange, the Accumulated Deferred Income Taxes ("ADIT") associated with transmission assets recorded on Met-Ed's and Penelec's books of account will transfer to MAIT's books. Because the ADIT are associated with transmission assets, they are not taken into account in determining

the electric distribution rate base of Met-Ed and Penelec for Pennsylvania ratemaking purposes. However, transferring the ADIT to MAIT will assure that MAIT's FERC-jurisdictional rate base, like the existing FERC-jurisdictional rate bases of Met-Ed and Penelec, reflects the credit balance of ADIT. Consequently, the Transaction will not result in any cost shifting between transmission and distribution customers nor will the FERC-jurisdictional rate base attributable to the transmission assets increase solely as a result of the Transaction.

15. The Operating Companies will not transfer a fee interest in land and other real estate to MAIT in connection with the contribution of transmission assets, and such fee interests will remain on Met-Ed's and Penelec's books. However, MAIT will need certain real estate interests and access rights in order to operate and maintain the transmission facilities going forward. Accordingly, MAIT will enter into a ground lease with each of the Operating Companies to govern those interactions. The fee interest in land and other real estate used for furnishing transmission service, as well as the ground lease payments from MAIT to the Operating Companies, would be excluded in determining the distribution revenue requirement in future distribution base rate cases.

16. The Operating Companies will have no continuing obligation to contribute equity to MAIT after the initial contribution of transmission assets occurs. MAIT will pay dividends at regular intervals to the Operating Companies and FET in proportion to each company's ownership interest in MAIT at the time the dividend distribution is made. The capital structure of each Operating Company will remain unchanged as a result of the Transaction, and the Operating Companies and FET will not provide parent guarantees for MAIT's debt.

IV. REQUESTED COMMISSION APPROVALS

A. Transfer of Property

17. Section 1102(a)(3) of the Code requires the issuance by the Commission of a certificate of public convenience, upon application, evidencing its approval for a “public utility or an affiliated interest of a public utility” to “acquire from, or transfer to [any other entity by any means whatsoever] the title to, or the possession or use of, any tangible or intangible property used or useful in the public service.” 66 Pa. C. S. § 1102(a)(3).

18. The Commission may issue a certificate of public convenience upon a finding that “the granting of such certificate is necessary or proper for the service, accommodation, convenience, or safety of the public.” 66 Pa.C.S. § 1103(a). This standard requires the Commission to find that the elements of a proposed transaction will “affirmatively promote the service, accommodation, convenience, or safety of the public in some substantial way.” *City of York v. Pa. Pub. Util. Comm'n*, 449 Pa. 136, 151,295 A.2d 825, 828 (1972). The “substantial public interest” standard is satisfied by a preponderance of the evidence that the requisite benefit will accrue from the transaction, and such burden can be met by showing a likelihood or probability of public benefits that need not be quantified or guaranteed. *Popowsky v. Pa. Pub. Util. Comm'n*, 594 Pa. 583, 617, 937 A.2d 1040, 1057 (2007). Further, the public benefit test does not require that every customer receive a benefit from a proposed transaction. *Popowsky*, at 617-18, 937 A.2d at 1061. As explained in Section V, *infra*, and in the testimony accompanying this Joint Application, the Transaction will produce substantial affirmative benefits that satisfy the *York* test.

19. Chapter 28 of the Electricity Generation Customer Choice and Competition Act, 66 Pa. C.S. §§ 2801 *et seq.*, requires that, in the exercise of authority the Commission may

otherwise have with respect to the disposition of assets of an electric distribution company, the Commission shall consider the potential anti-competitive effects or discriminatory conduct of the disposition and whether it will prevent retail electricity customers in this Commonwealth from obtaining the benefits of a properly functioning and workable competitive retail electricity market.

B. Public Utility Status

20. Subject to necessary state and FERC approvals of the Transaction, MAIT will furnish only interstate transmission service. Consequently, MAIT will be a “public utility” for purposes of the Federal Power Act (“FPA”), which grants the FERC “exclusive authority to regulate the transmission and sale at wholesale of electric energy in interstate commerce.”⁴

21. Because the FERC has exclusive jurisdiction over the interstate transmission of electric energy and the public utilities that provide interstate transmission service and because MAIT will not provide any Pennsylvania intrastate public utility service, the Commission will not have jurisdiction over MAIT’s rates, terms or conditions of transmission service, as the Commission has previously recognized.⁵

Transmission services are FERC jurisdictional and, as such, the terms and conditions under which unbundled transmission services are to be provided to customers will be controlled by the FERC-approved PJM Open Access Tariff for the transmission services procured by PECO or a competitive supplier The terms and conditions for transmission services for each separate rate classification are those established by FERC.

⁴ *New England Power Co. v. New Hampshire*, 455 U.S. 331, 340 (1982). *Accord New York v. FERC*, 535 U.S. 1, 18-19 (2002) (“the [Federal Power Act] gave FERC jurisdiction over the transmission of electric energy in interstate commerce”).

⁵ *Pa. P.U.C. v. PECO Energy Co.*, Docket No. R-00973953, 1998 Pa. PUC LEXIS 2 at *12-14 (Feb. 5, 1998).

22. Notwithstanding the exclusivity of FERC's jurisdiction over MAIT's transmission rates and service, MAIT is requesting that the Commission issue it a certificate of public convenience under Section 1101 of the Public Utility Code conferring public utility status under Section 102. Although a certificate of public convenience is not necessary for MAIT to exercise the power of eminent domain in Pennsylvania,⁶ the issuance of a certificate of public convenience will subject MAIT to the Commission's regulations pertaining to the siting of high voltage (i.e., greater than 100 kV) transmission lines. As a consequence of MAIT's submission to the Commission's siting regulations, MAIT will also be assured that its siting, location, construction and operation of transmission facilities in Pennsylvania, including the existing transmission facilities of Met-Ed and Penelec, will not be subject to municipal zoning and land use regulations.⁷

23. MAIT further requests that the certificate of public convenience to be issued by the Commission: (1) demarcate a service area for MAIT that is coextensive with the combined authorized service territories of Met-Ed and Penelec; and (2) expressly state that MAIT is not thereby authorized to furnish any intrastate public utility service within Pennsylvania.

24. MAIT acknowledges that, as the holder of a certificate of public convenience, it will be required to comply with the Public Utility Code and the Commission's regulations and orders, excluding those provisions that expressly or by reasonable implication apply only to a public utility that furnishes intrastate service within Pennsylvania or that are preempted by the

⁶ *Application Of New York State Elec. & Gas Corp.: Request For Approval Of Abandonment Of Elec. Serv.*, Docket Nos. A-93538, A-110001 F.200, P-900488 (January 17, 1991) ("NYSEG").

⁷ *York Water Co. v. York*, 250 Pa. 115, 118, 95 A. 396, 397 (1915). *Accord Duquesne Light Co. v. Monroeville Borough*, 449 Pa. 573, 298 A.2d 256 (1972) (local zoning ordinances preempted); *County of Chester v. Philadelphia Electric Co.*, 420 Pa. 422, 218 A.2d 331 (1966) (local land development planning requirements preempted); *Duquesne Light Co. v. Upper St. Clair Twp.*, 377 Pa. 323, 105 A.2d 287 (1954) (local zoning and building permit requirements preempted).

FERC's exclusive jurisdiction over transmission service and rates. Additionally, MAIT reserves the right to hereafter petition the Commission to be relieved of requirements that, given MAIT's provision of only interstate transmission service subject to the exclusive jurisdiction of the FERC, would not serve a reasonable regulatory purpose to impose on MAIT.

C. Affiliated Interest Transactions

25. Section 2102(a) of the Pennsylvania Public Utility Code, 66 Pa. C.S. § 2102(a), requires the filing of contracts with affiliates that provide for the "furnishing of ...construction, engineering...or similar services [or] ...purchase, sale, lease or exchange of any property, right or thing..." for approval by the Commission.

26. The Joint Applicants are requesting that the Commission approve as affiliated interest agreements the ground leases between MAIT and each Joint Applicant. Forms of the ground leases are provided as Joint Applicants' Exhibit KJT-2 accompanying Joint Applicants' Statement No. 4. Pursuant to the ground leases, each Joint Applicant will lease the real estate rights associated with the transmission assets being contributed to MAIT by that Joint Applicant.

27. The Joint Applicants are also requesting Commission approval of modifications to four existing affiliated interest agreements to include MAIT in order to facilitate its transmission-related activities and business operations. The first is the FirstEnergy Service Agreement, under which MAIT will be entitled to receive administrative, management, and other services from FESC. A copy of this agreement, as amended, is provided as Joint Applicants' Exhibit KJT-5 and is addressed in Joint Applicants' Statement No. 4. The second is the Mutual Assistance Agreement ("MAA"), a copy of which is provided as Joint Applicants' Exhibit KJT-6 and is also addressed in Joint Applicants' Statement No. 4. Under the amended MAA, MAIT will be able to request and receive non-power goods and services from any of the FirstEnergy operating

companies, including the Joint Applicants, consistent with the terms and conditions of the MAA (e.g., technical support services and workers to assist MAIT in the performance of its operations as a stand-alone transmission asset owner). The third is the Intercompany Income Tax Allocation Agreement, under which MAIT will be able to participate in FirstEnergy's filing of a consolidated tax return. A copy of this agreement is being provided as Joint Applicants' Exhibit KJT-7 and is discussed in Joint Applicants' Statement No. 4. The fourth is the FirstEnergy Regulated Money Pool Agreement, under which MAIT will become a member of FirstEnergy Regulated Money Pool Agreement and will be able to borrow from, or lend to, other regulated companies to manage its working capital requirements. A copy of this agreement is being provided as Joint Applicants' Exhibit SRS-4 and is discussed in Joint Applicants' Statement No. 3.

V. BENEFITS OF THE TRANSACTION

28. FirstEnergy has recently established the Energizing the Future ("EtF") program, which will increase the reliability of the transmission system, improve the condition of equipment, enhance system performance, and improve operational flexibility. The EtF program initially focused on reliability enhancement investments in the ATSI transmission zone. FirstEnergy now proposes to expand the EtF program to include reliability enhancement investments in the Met-Ed, Penelec and JCP&L zones.

29. Based on a preliminary assessment, increased transmission system capital investments in the service territories of the Operating Companies are needed that could total as much as \$2.5 to \$3.0 billion over the next five to ten years. FirstEnergy has determined that significant investment in the transmission facilities within the Operating Companies' respective service areas is needed to maintain reliability stemming from various changes on those transmission systems, including, among other factors, generation changes (i.e. the retirement of

existing generation units and the addition of, new fossil fueled and renewable generating facilities); changes in load; the imposition of the North American Electric Reliability Corporation (“NERC”) and ReliabilityFirst (“RF”) reliability standards; increased reliance on demand-side resources; heightened concerns with cyber and physical security; the aging and deterioration of existing infrastructure; system conditions that FirstEnergy’s periodic assessments have uncovered; and the need for additional operational flexibility. (See Joint Applicants’ Statement No. 2.) The expansion of the EtF program is the comprehensive plan for guiding these transmission investments. The expansion of the EtF program will improve the resilience, reliability, and capacity of the transmission system for the Operating Companies’ existing and new customers.

30. Because of the levels of investment that will be needed to enhance the transmission grid, it will be increasingly challenging for utilities that have the obligation to meet the service requirements of retail electric distribution customers to implement sustained transmission expansion and enhancement initiatives while maintaining investment grade credit ratings to support an adequate supply of investor capital. Companies that are focused solely on the delivery of safe and reliable transmission service offer several advantages, which can result in enhanced reliability and lower overall costs for customers:

Reduced Cost of Capital. A transmission-only company improves transparency for investors, which can reduce perceived investor risk and improve the overall credit profile of the business. Higher credit ratings generally translate into greater access to capital at a lower cost and provide a direct benefit to transmission customers and to the customers of public utilities that need transmission service to furnish retail distribution service. Stand-alone transmission companies with a singular focus and transparent cost recovery mechanisms can be an attractive

investment for a wider spectrum of investors and, therefore, provide added flexibility in raising equity capital through multiple avenues, whether public or private, at lower cost.

Reduced Competition for Capital. Investment by each Operating Company in transmission facilities competes with other necessary investments and can be deferred in favor of more immediate or emergency investments in distribution facilities. Without such competing interests, MAIT will be able to pursue investment in necessary transmission facilities on which a reasonable return can be earned.

Furthermore, MAIT's operational flexibility and access to capital will provide greater flexibility to respond promptly, efficiently, and cost-effectively to PJM and NERC reliability requirements. This is especially important because, under the existing structure where the Operating Companies own the transmission assets, PJM requirements to construct new transmission projects increasingly commit a significant portion of the Operating Companies' available capital to such projects, which is then unavailable for distribution system investment. Consequently, the capital demands of more transmission projects could limit the amount of available capital for needed distribution plant investments, and the associated increase in debt burden could adversely affect the financial condition and credit profiles of the Operating Companies.

Because MAIT will issue debt in its own name without a parent guarantee, any debt incurred by MAIT to finance new transmission will not affect the financial condition and credit ratings of the Operating Companies. This will allow the Operating Companies to have greater control over their annual expenditures dedicated to the distribution business and similarly reduce the range of business lines that must be evaluated for purposes of assessing risks by investors.

Hence, the migration to a transmission-only model not only better supports the sustained level of transmission investment needed at MAIT, but at the same time preserves the Operating Companies' capacity to issue debt for their own distribution system needs.

Efficiency. MAIT will be a much larger transmission owner than any of the Operating Companies would ever be individually. Because MAIT would be a larger company with a larger asset pool, it would be better equipped from a financial perspective to secure the debt required to make substantial investments in the transmission system on reasonable terms. Rather than issuing debt at each of the Operating Companies for needed investment, the debt only needs to be issued at the MAIT level. This makes the process more cost effective, efficient and less time consuming.

Operational Benefits and Job Creation. The creation of MAIT will facilitate and accelerate the realization of the numerous operational benefits described by Mr. Mackauer (Joint Applicants' Statement No. 2), which will increase reliability and harden the transmission system against physical and cyber-attacks. Specifically, the formation of MAIT and completion of the proposed Transaction will enable increased and accelerated investment in projects such as constructing new and upgrading existing transmission lines and substations; enhancing the communications infrastructure; and modernizing the transmission system by, among other initiatives, enhancing physical and cyber security. As described in detail in Mr. Mackauer's direct testimony, the projects to be undertaken can be grouped into one or more of five general categories, each of which will provide the direct benefits to system reliability, resilience and customer service summarized below:

- (i) **System Condition Projects** are designed principally to enhance system

reliability. Consequently, most of the projects in this category will reduce the frequency and/or duration of customer outages, although certain projects are designed to reduce maintenance costs, increase safety, generally modernize the transmission system and address environmental concerns.

(ii) **System Performance Projects** will help to increase real time operational “visibility” into the status of the transmission system and conditions existing on the system and, thereby, improve situational awareness, which, in turn, will enable quicker analysis of, and response to, system events. The addition of breakers and automatic sectionalizing switches at tapped substations will enhance reliability and improve service to customers by increasing the speed of system restoration and reducing the frequency and duration of outages.

(iii) **Operational Flexibility Projects** will provide more flexibility in dealing with both scheduled and unscheduled outages and, in that way, enhance reliability. Such projects will also add load-serving capability, increase the transmission system’s operating margin to better respond to future unexpected shifts in generation and system loading, and, in general, establish a more robust transmission system.

(iv) **Transmission Communications Infrastructure, Physical Security Enabling and Cyber Security Projects** will enhance the reliability, security and general capability of the communications systems that are required to monitor, control, and protect the transmission system. These projects will also help to reduce maintenance costs, employee overtime expenses and equipment failures.

(v) **Physical Security Projects** will enhance reliability and increase situational awareness by providing the means for earlier identification of potential threats to

critical substation assets. These measures, which include installing or enhancing security systems, will also safeguard the public from electrical hazards and deter criminal activity through faster detection of unusual events, thus enabling appropriate responses to be initiated sooner. These projects will also harden the transmission system through additional or enhanced physical security measures and monitoring.

In addition to the numerous operational benefits outlined above, increasing and accelerating investment in the transmission system will create benefits for the economy. In that regard, based upon initial assessments of the scope and nature of the work encompassed by the proposed expansion of the EtF, it is estimated that the increased investments MAIT will facilitate will have a material, positive effect on job creation in the states covered by the Operating Companies' transmission zones.

VI. IMPACT ON COMPETITION

31. The Joint Applicants seek to separate their transmission facilities from their distribution facilities in order to pave the way for a more efficient vehicle to finance significant investment in transmission assets. MAIT does not currently own any generation, distribution or transmission facilities and will not own or control any generation or any distribution assets upon completion of the proposed Transaction. When the contribution of the Operating Companies' transmission assets to MAIT is completed, Met-Ed and Penelec will no longer own any facilities serving a transmission function. Consequently, the proposed contribution will have no effect on the concentration of generation or transmission assets or upon market power. Moreover, the proposed Transaction will leave the transmission facilities under the operational control of an RTO and, therefore, it will have no adverse effect on competition in the wholesale power market.

VII. ISSUANCE OF A CERTIFICATE OF PUBLIC CONVENIENCE TO MAIT

32. MAIT requests the issuance of certificate of public convenience conferring upon it public utility status on the terms and conditions set forth in Section IV.B., *supra*, pursuant to Section 1101 of the Public Utility Code, which provides, in relevant part, as follows:

Upon the application of any proposed public utility and the approval of such application by the commission evidenced by its certificate of public convenience first had and obtained, it shall be lawful for any such proposed public utility to begin to offer, render, furnish, or supply service within this Commonwealth. The commission's certificate of public convenience granted under the authority of this section shall include a description of the nature of the service and of the territory in which it may be offered, rendered, furnished or supplied.

33. Section 1103 of the Public Utility Code provides that a certificate of public convenience should be issued if the Commission "shall find and determine that the granting of such certificate is necessary or proper for the service, accommodation, convenience, or safety of the public."⁸

34. In applying Sections 1101 and 1103, the Commission has held that a certificate of public convenience conferring public utility status will be issued where there is a need for the proposed service and the applicant had demonstrated its fitness to provide that service.⁹

35. When the assets and service territory of an existing utility are being transferred to another utility, there is a rebuttable presumption that need for the transferor's service continues

⁸ 66 Pa.C.S. §1103.

⁹ See *Application of Newtown Artesian Water Company*, 2003 Pa. PUC LEXIS 40 (July 1, 2003).

and satisfies the applicable legal standard.¹⁰ Moreover, as explained in Section V, *supra*, and in the direct testimony accompanying the Joint Application, after the consummation of the proposed Transaction, MAIT will provide financial and operational benefits that would not be achieved by the Operating Companies' continuing to own the transmission assets being contributed to MAIT. Specifically, MAIT will be an entity singularly focused on furnishing transmission service that will have improved financial metrics and enhanced access to capital at reasonable costs. This, in turn, will enable MAIT to increase and accelerate investments in the transmission projects identified by Mr. Mackauer in Joint Applicants' Statement No. 2. The significant benefits to customers and to the Commonwealth of Pennsylvania from those projects are also described in Mr. Mackauer's direct testimony. Consequently, in addition to the legal presumption of continued need to which MAIT is entitled as the transferee of Met-Ed's and Penelec's transmission assets, substantial evidence supports an independent finding that the formation of MAIT and completion of the Transaction will satisfy the "need" requirement for the issuance of certificate of public convenience conferring public utility status on MAIT.

36. The Commission has held that "fitness" encompasses: (1) the technical capacity to fulfill the identified service need in a satisfactory fashion; (2) the financial capacity to obtain the plant and equipment needed to perform the proposed service in a reliable and responsible fashion; and (3) a propensity to operate safely and legally.¹¹ As explained by Mr. Fullem in Joint Applicants' Statement No. 1, MAIT satisfies each of the components of the fitness requirement:

¹⁰ *Applications of Pennsylvania-American Water Company*, Docket Nos. A-212285F019; A-212285F020; A-212285F021, 1995 Pa. PUC LEXIS 197 at *6-7 (October 26, 1995).

¹¹ *Re William O'Connor*. 54 Pa. P.U.C. 547, 549 (1980).

(i) **Technical Capacity.** Like the Operating Companies, MAIT will be a member of the FirstEnergy holding company system and, as such, will have access to the resources and expertise available from FESC. MAIT will also be able to call upon and use the existing well-trained complement of Operating Companies' employees, which has extensive experience in operating and maintaining the Operating Companies' transmission systems.

(ii) **Financial Capacity.** MAIT will have adequate short-term borrowing capacity through its participation in the FirstEnergy Money Pool Agreement and FET's \$1.0 billion credit facility to meet all of the obligations of its day-to-day operations. Additionally, MAIT's strengthened financial metrics will facilitate obtaining long-term debt at reasonable rates. MAIT's access to debt capital and the opportunity for FET to make additional equity contributions will be sufficient to maintain and, as necessary, expand MAIT's transmission system.

(iii) **Propensity To Operate Safely And Legally.** MAIT will operate safely and in full compliance with applicable legal requirements and, as the successor to the Operating Companies' transmission functions, MAIT will continue the Operating Companies' track record of satisfying all applicable legal and regulatory obligations and consistently furnishing safe and reliable transmission service.

For all of the reasons set forth above, MAIT fully satisfies all three components of the fitness requirement for issuance of a certificate of public convenience as a Pennsylvania public utility.

VIII. SUPPORTING TESTIMONY

37. With this Joint Application, the Joint Applicants are submitting the written direct testimony and supporting exhibits of four witnesses, which, subject to possible supplementation in response to positions, inquiries and issues set forth in the filings by other parties or in interim orders of the Commission, will comprise the Joint Applicants' case-in-chief:

Charles V. Fullem (Joint Applicants' Statement No. 1) is Director, Rates and Regulatory Affairs-Pennsylvania. Mr. Fullem provides an overview of the Transaction. He also describes how MAIT will be operated, the affiliated interest agreements it will utilize, the classification of its transmission assets, and the public benefits of the Transaction. Additionally, Mr. Fullem explains why MAIT satisfies all of the requirements for issuance of a certificate of public convenience conferring public utility status under Pennsylvania law, including its financial, technical and legal fitness to furnish transmission service in Pennsylvania as a successor to the Operating Companies.

Jeffery J. Mackauer (Joint Applicants' Statement No. 2) is Director of Transmission Planning & Protection. Mr. Mackauer describes the transmission planning process at FirstEnergy and discusses the benefits and capital requirements associated with expanding FirstEnergy's EtF program to cover the transmission systems currently owned and operated by the Operating Companies.

Steven R. Staub (Joint Applicants' Statement No. 3) is Vice President and Treasurer at FESC and, in that role, is responsible for treasury activities for each of the FirstEnergy companies. Mr. Staub describes the financial aspects of the proposed transaction and the associated agreements, and also discusses the benefits of the Transaction.

K. Jon Taylor (Joint Applicants' Statement No. 4) is Vice President, Controller, and Chief Accounting Officer of FirstEnergy. Mr. Taylor discusses the various tax and accounting aspects of the Transaction.

IX. ADDITIONAL SUPPORTING EXHIBITS

38. The following exhibits, containing additional information in support of this Joint Application, accompany, and are discussed in, the direct testimony of the Joint Applicants' witnesses:

Witness	Exhibit	Description
Charles V. Fullem	CVF-1	Organizational chart of the post-Transaction corporate structure
Steven R. Staub	SRS-1	Amended and Restated Limited Liability Company Operating Agreement
Steven R. Staub	SRS-2	Corporate Bond Spreads
Steven R. Staub	SRS-3	FirstEnergy Regulated Money Pool Agreement
K. Jon Taylor	KJT-1	Capital Contribution Agreement
K. Jon Taylor	KJT-2	Met-Ed Ground Lease Penelec Ground Lease
K. Jon Taylor	KJT-3	List of real property associated with each substation that is part of transfer
K. Jon Taylor	KJT-4	Transmission facility maps
K. Jon Taylor	KJT-5	FirstEnergy Service Agreement
K. Jon Taylor	KJT-6	Revised and Amended Restated Mutual Assistance Agreement

Witness	Exhibit	Description
K. Jon Taylor	KJT-7	Intercompany Income Tax Allocation Agreement
K. Jon Taylor	KJT-8	Proposed accounting entries

X. OTHER REQUIRED APPROVALS

39. In addition to approval from the Commission, other regulatory approvals will be required before the Transaction can be concluded. Notably, approval by the FERC under Section 203 of the Federal Power Act (16 U.S.C. § 824b) is required for the contribution of electric transmission assets to MAIT by the Operating Companies. Also, as previously noted, approval by the NJBPU is required for JCP&L to contribute its transmission assets to MAIT. The Joint Applicants will provide the Commission, under separate cover, with copies of the FERC filing and the Verified Petition submitted by JCP&L to the NJBPU.

XI. REQUEST FOR FORMAL CONSOLIDATION AND CONDUCT OF CONSOLIDATED PROCEEDINGS

40. The Commission's regulations provide as follows concerning the formal consolidation of proceedings¹²:

§ 5.81. Consolidation.

(a) The Commission or presiding officer, with or without motion, may order proceedings involving a common question of law or fact to be consolidated. The Commission or presiding officer may make orders concerning the conduct of the proceeding as may avoid unnecessary costs or delay.

¹² 52 Pa. Code §5.81.

41. The requests for Commission approvals set forth herein, namely, for the issuance of certificates of public convenience under Sections 1101 and 1103 and the approval of affiliated interest agreements, as described in Section IV, *supra*, involve a common nucleus of operative facts centering on the contribution of Met-Ed's and Penelec's transmission assets to MAIT, as a proposed certificated Pennsylvania public utility. Moreover, substantially similar set of legal standards exist for issuance of the requested certificates which, in large measure, center on whether the proposed Transaction will provide affirmative benefits and is in the public interest. Therefore, formal consolidation, into a single proceeding, of all of the requests for approval set forth in the Joint Application will help to develop a more complete, understandable and meaningful evidentiary record than would exist if each request were assigned to a separate proceeding. Moreover, formal consolidation will avoid duplication and repetition in the submission of testimony, the conduct of discovery and evidentiary proceedings, briefing, the issuance of an initial decision, and the preparation and filing of exceptions and reply exceptions. Accordingly, consolidation will conserve administrative time, resources and money as well as reduce the costs of the Joint Applicants and other parties.

42. Formal consolidation will ensure that each request for approval in the Joint Application and any subsidiary issues would be treated procedurally in the same fashion as the individual issues in a single base rate proceeding. As a consequence, witnesses would be permitted to address any issue or group of issues in a single statement of direct, rebuttal, surrebuttal or rejoinder testimony (as applicable); a single set of consolidated evidentiary hearings would be conducted; witnesses, when presented, would be subject to cross-examination with regard to all of the testimony they submitted in the consolidated proceeding; one main and one reply brief would be filed by each party in which all of the issues in the consolidated proceeding

could be addressed; a single initial decision would be issued covering all contested issues; and each party would be permitted to file exceptions and reply exceptions addressing all of the issues in the initial decision.

43. For all of the foregoing reasons, the formal consolidation of the requests for approval set forth in the Joint Application in the manner delineated above is fully justified, in the public interest and should be granted.

XII. PROPOSED PROCEDURAL SCHEDULE

44. The Joint Applicants desire to complete the Transaction as expeditiously as possible consistent with the legitimate review rights of interested parties. With that in mind, the Joint Applicants suggest that holding an initial Prehearing Conference early in the process will assist the parties in identifying and resolving issues. A litigation schedule can be developed after any active parties have been identified, with the assistance of the presiding Administrative Law Judge.

XIII. NOTICE

45. The Joint Applicants are serving copies of this filing on the Office of Consumer Advocate, the Office of Small Business Advocate, the Commission's Bureau of Investigation and Enforcement, the Met-Ed Industrial Users Group and the Penelec Industrial Customer Alliance. A service list is attached to the transmittal letter that accompanies this Joint Application. The Joint Applicants respectfully request that the Commission publish notice of this filing in the Pennsylvania Bulletin, with a reasonable deadline for intervention in this proceeding. The Joint Applicants will provide such additional forms of notice as the Commission may hereafter direct.

XIV. CONCLUSION

46. For all of the reasons set forth in, and supported by, this Joint Application, the Transaction satisfies the legal requirements for the approvals necessary to consummate the Transaction as described previously, and the Joint Applicants, therefore, request that the Commission: (1) issue certificates of public convenience evidencing approval under 66 Pa.C.S. §1102(a)(3) for the of the Joint Applicants' transmission assets to MAIT in the manner previously described in this Joint Application; (2) find and determine, pursuant to 66 Pa.C.S. §2810(e), that the Transaction will not result in anticompetitive or discriminatory conduct, including the unlawful exercise of market power, which would prevent retail electricity customers in the Commonwealth from obtaining the benefits of a properly functioning and workable competitive retail electricity market; (3) issue a certificate of public convenience under 66 Pa.C.S. §1101 conferring on MAIT the status of a public utility as defined in 66 Pa.C.S. §102; (4) find and determine that the affiliated agreements submitted with this Joint Application satisfy the legal standard for approval under Chapter 21 of the Public Utility Code; and (5) grant such additional approvals as may be necessary to consummate the Transaction.

WHEREFORE, the Joint Applicants respectfully urge the Commission to grant the approvals and authorizations requested herein and more specifically delineated in Paragraph 46, above, and grant formal consolidation as requested in Section XI, *supra*.

Respectfully submitted,

1 rates, rules and regulations and ensuring their uniform application and interpretation.

2 **Q. What is your educational and professional background?**

3 A. I received a Bachelor of Science degree in Mineral Economics from the Pennsylvania
4 State University in November 1981. I have over thirty years of experience with
5 FirstEnergy and its predecessor companies. My work experience is more fully described
6 in my professional biography, which is attached as Appendix A.

7 **Q. On whose behalf are you testifying in this proceeding?**

8 A. I am testifying on behalf of Mid-Atlantic Interstate Transmission, LLC (“MAIT”), Met-
9 Ed and Penelec.

10 **Q. What is the purpose of your testimony?**

11 A. The purpose of my testimony is to provide an overview of the proposed transaction (the
12 “Transaction”), under which Met-Ed, Penelec and Jersey Central Power & Light
13 Company (“JCP&L”) (collectively, the “Operating Companies”) will contribute their
14 transmission assets to MAIT, a newly-formed subsidiary of FirstEnergy Transmission,
15 LLC (“FET”) in which the Operating Companies will have membership interests. In
16 addition to the overview, I will describe how MAIT will be operated, the affiliated
17 interest agreements it will utilize, the classification of its transmission assets, and the
18 public benefits of the Transaction. I will also explain that MAIT, which is requesting that
19 the Commission grant it public utility status, has the technical, financial and legal fitness
20 to satisfy the criteria for issuance of a certificate of public convenience.

1 **Q. Are you sponsoring any exhibits as part of this filing?**

2 A. Yes. I am sponsoring one exhibit with my testimony. Joint Applicants' Exhibit CVF-1
3 comprises an organizational chart of the pre-Transaction corporate structure and an
4 organizational chart of the post-Transaction corporate structure.

5 **Q. Please identify the other witnesses submitting direct testimony on behalf of Met-Ed
6 and Penelec in this proceeding.**

7 A. Mr. Jeffrey J. Mackauer (Joint Applicants' Statement No. 2) will describe the
8 transmission planning process at FirstEnergy and discuss the benefits and capital
9 requirements associated with expanding FirstEnergy's Energizing the Future ("EtF")
10 program to cover the transmission systems currently owned and operated by the
11 Operating Companies.

12 Mr. Steven R. Staub (Joint Applicants' Statement No. 3) will describe the structure of the
13 Transaction and its financial aspects. Mr. Staub will also describe and explain the
14 financial benefits of the Transaction and address the inclusion of MAIT in the
15 FirstEnergy Regulated Money Pool Agreement.

16 Mr. K. Jon Taylor (Joint Applicants' Statement No. 4) provides a description of the
17 transmission facilities to be contributed by the Operating Companies to MAIT. Mr.
18 Taylor also provides a detailed discussion of accounting and tax issues, including how the
19 Operating Companies will account for their investment in MAIT and the dividends they
20 will receive from MAIT, as well as proposed changes to the FirstEnergy Service
21 Company Agreement, Mutual Assistance Agreement, and Intercompany Income Tax
22 Allocation Agreement. Mr. Taylor further provides a description of the Ground Leases

1 that Met-Ed and Penelec will be entering into with MAIT.

2 **II. TRANSACTION OVERVIEW**

3 **A. Existing FirstEnergy Subsidiaries and Transmission Service**

4 **Q. Please describe the FirstEnergy subsidiaries that are a part of this Transaction.**

5 A. Met-Ed is a wholly-owned subsidiary of FirstEnergy. Met-Ed provides service to about
6 553,000 electric utility customers in eastern Pennsylvania. Met-Ed had a summer peak
7 load in 2014 of 2,817 MW, with about two-thirds of that load attributable to residential
8 and small commercial customers. In addition to owning and maintaining 11,292 circuit
9 miles of distribution lines, Met-Ed currently owns 1,406 miles of transmission lines and
10 related facilities within its service territory, which are under the operational control of the
11 PJM Interconnection, LLC (“PJM”) as the regional transmission organization (“RTO”).

12 Penelec is a wholly-owned subsidiary of FirstEnergy. Penelec provides service to about
13 591,000 electric utility customers in central and western Pennsylvania. Penelec had a
14 summer peak load in 2014 of 2,788 MW, with about two-thirds of that load attributable
15 to residential and small commercial customers. In addition to owning and maintaining
16 16,853 circuit miles of distribution lines, Penelec currently owns 2,877 miles of
17 transmission lines and related facilities within its service territory, which are under the
18 operational control of PJM as the RTO.

19 JCP&L is also a wholly-owned subsidiary of FirstEnergy that provides service to about
20 1.1 million electric utility customers in New Jersey. In addition to its distribution
21 facilities, JCP&L currently owns 2,569 circuit miles of transmission lines and related
22 facilities within its service territory, which are under the operational control of PJM as

1 the RTO.

2 FET is a subsidiary of FirstEnergy. FET’s subsidiaries include American Transmission
3 Systems, Inc. (“ATSI”) and Trans-Allegheny Interstate Line Company (“TrAILCo”).
4 ATSI is a transmission-only utility or “transco” that provides transmission services in the
5 western portion of Pennsylvania and the state of Ohio. Currently, ATSI owns and
6 maintains over 8,100 circuit-miles of transmission lines, substations and other
7 transmission facilities that are located principally in the ATSI Zone of PJM and are under
8 the operational control of PJM as the RTO. ATSI is comprised in large part of the
9 transmission assets formerly owned by FirstEnergy’s operating utilities in western
10 Pennsylvania and Ohio (*i.e.*, Pennsylvania Power Company (“Penn Power”) in western
11 Pennsylvania, The Toledo Edison Company, Ohio Edison Company, and The Cleveland
12 Electric Illuminating Company in Ohio).¹

13 TrAILCo owns, operates and maintains over 180 circuit-miles of transmission lines,
14 substations and other transmission facilities, including the Trans-Allegheny Interstate
15 Line and the Black Oak Static Var Compensator, with other projects under construction.²
16 TrAILCo’s operating assets are primarily located in Pennsylvania, West Virginia and

¹ Pennsylvania Power Company (“Penn Power”) a public utility subsidiary of Ohio Edison Company, which is in turn a subsidiary of FirstEnergy that provides electric distribution service in western Pennsylvania, transferred its transmission assets to ATSI pursuant to the Commission’s approval as evidenced by a certificate of public convenience issued in 2000. *Application Of Pennsylvania Power Co. For (1) A Certificate Of Public Convenience Authorizing The Transfer Of Certain Transmission Assets To American Transmission Systems, Inc., And (2) Approval Of Certain Affiliated Interest Agreements Necessary To Effect The Transfer*, Docket No. A-110450F0016 (July 14, 2000) (“ATSI Order”).

² See *Application of Trans-Allegheny Line Company (TrAILCo) For Approval: 1) for a Certificate of Public Convenience to Offer, Render Furnish or Supply Transmission Service in the Commonwealth of Pennsylvania; (2) Authorization and Certification to Locate, Construct, Operate and Maintain Certain High-Voltage Electric Substation Facilities; 3) Authority to Exercise the Power of Eminent Domain for the Construction and Installation of Aerial Electric Transmission Facilities Along the Proposed Transmission Line Routes in Pennsylvania; 4) Approval of an Exemption from Municipal Zoning Regulation With Respect to the Construction of Buildings; and 5) Approval of Certain Related Affiliated Interest Arrangements*, Docket Nos. A-110172 *et al.* (December 13, 2008).

1 northern Virginia and are under the operational control of PJM as the RTO. *See* Joint
2 Applicants' Exhibit No. CVF-1.

3 MAIT is a newly-formed subsidiary of FET, in which the Operating Companies will own
4 membership interests. MAIT's business functions and activities, as well as its
5 relationship to Met-Ed and Penelec and other subsidiaries of FirstEnergy are discussed
6 and explained further in my direct testimony as well as in Steven R. Staub's and K. Jon
7 Taylor's direct testimony.

8 **Q. Please describe how Met-Ed and Penelec currently provide transmission service.**

9 A. All transmission services are currently provided by PJM, which utilizes the facilities of
10 Met-Ed and Penelec, as transmission owners, pursuant to the terms of the PJM Open-
11 Access Transmission Tariff ("OATT") approved by the Federal Energy Regulatory
12 Commission ("FERC"). The FERC has jurisdiction over transmission rates and
13 practices, as well as contracts affecting transmission rates. This Commission has
14 authority over Met-Ed's and Penelec's retail service and rates.

15 **Q. How are Met-Ed and Penelec currently being compensated for providing**
16 **transmission service?**

17 A. PJM bills entities that take transmission service over transmission facilities in PJM
18 ("Transmission Customers") consistent with the provisions of the OATT. Transmission
19 Customers include entities serving load (the Load Serving Entities, or "LSEs") in Met-
20 Ed's and Penelec's service territories. The LSEs include electric generation suppliers
21 ("EGSs") and wholesale suppliers of default service selected through the competitive
22 default service procurement processes approved by the Commission. The EGSs include

1 the cost of network integrated transmission service in the prices they charge to shopping
2 customers, and Met-Ed and Penelec include the cost associated with network integrated
3 transmission service in the price of default service. The associated payments made to
4 PJM by Transmission Customers are used to compensate Met-Ed and Penelec for
5 providing transmission service. PJM's monthly billing to Met-Ed and Penelec includes
6 credit code 2100, which compensates Met-Ed and Penelec for the network integrated
7 transmission service charges collected by PJM on their behalf.³

8 **B. The Transaction**

9 **Q. Please describe the Transaction and the resulting corporate structure.**

10 A. The Operating Companies will make a one-time contribution of their existing
11 transmission assets⁴ to MAIT through a tax-free transfer in exchange for Class B
12 membership interests⁵ in MAIT. FET, in turn, will make a cash contribution to MAIT in
13 exchange for a membership interest that will give FET operating and management control
14 of MAIT. As a result of the Transaction, the Operating Companies will no longer own
15 any facilities performing a transmission function. The distribution assets owned by the
16 Operating Companies will not be affected. FET and the Operating Companies will have
17 membership interests in MAIT, and MAIT will operate as a transmission-only entity. A

³ Met-Ed and Penelec currently collect PJM Transmission related charges for (i) Regional Transmission Expansion Plan ("RTEP"), (ii) Expansion Cost Recovery, and (iii) Reliability Must Run ("RMR") generating unit declarations and charges associated with plant deactivation on a non-bypassable basis through the Default Service Support Riders in their respective retail tariffs. Other ancillary transmission services are billed to the same entities as network integrated transmission service.

⁴ "Transmission assets" are defined in the Capital Contribution Agreement (Exhibit No. KJT-1 accompanying Joint Applicants' Statement No. 4, the direct testimony of K. Jon Taylor) ("Contribution Agreement"). The terms of the Contribution Agreement are explained in more detail in Mr. Taylor's direct testimony.

⁵ Class B membership interests do not confer operating control and management authority over MAIT. However, the Operating Companies will maintain voting rights over "special matters," which include decisions pertaining to bankruptcy, mergers, any sale of substantially all assets of MAIT and amendment of the LLC Operating Agreement.

1 more detailed discussion of the Transaction is provided in Joint Applicants' Statement
2 No. 3, the direct testimony of Mr. Staub, and pre-Transaction and post-Transaction
3 organizational charts are provided in Joint Applicants' Exhibit No. CVF-1.

4 **Q. Please describe the assets and associated liabilities that will be contributed by Met-**
5 **Ed and Penelec to MAIT.**

6 A. The net book value (original cost less depreciation reserve) of the existing transmission
7 assets and the associated goodwill will be contributed to MAIT in exchange for a
8 membership interest in MAIT. This tax-free transaction also results in a transfer of
9 transmission property-related Accumulated Deferred Income Taxes ("ADIT") from Met-
10 Ed's and Penelec's books to MAIT's books. Because the ADIT associated with
11 transmission assets are already excluded from the determination of Met-Ed's and
12 Penelec's distribution rate bases, the Transaction will not result in any cost shifting
13 between transmission and distribution customers. The accounting for the Transaction,
14 including the specific tax implications of the Transaction, are discussed in additional
15 detail in Joint Applicants' Statement No. 4, the direct testimony of Mr. Taylor.

16 **Q. Will Met-Ed and Penelec contribute land or other real estate interests associated**
17 **with the contributed transmission assets?**

18 A. No. The associated land and other real estate interests will remain on Met-Ed's and
19 Penelec's books, and Ground Leases will be put into place – one between Met-Ed, as
20 lessor, and MAIT, as lessee, and one between Penelec, as lessor, and MAIT as lessee.⁶
21 The associated transmission land and other real estate interests, as well as the Ground

⁶ A ground lease was also entered into between ATSI and Penn Power to provide ATSI the interests in real property it needs to furnish transmission service in Pennsylvania. See ATSI Order.

1 Lease payments from MAIT to Met-Ed and Penelec, will be excluded from future
2 distribution base rate cases. This is consistent with existing ratemaking treatment of the
3 land interests, which are included in FERC Account 350, which have historically been
4 reflected in the determination of transmission rates, and which have been excluded from
5 the determination of the distribution rate bases of Met-Ed and Penelec as non-
6 jurisdictional.

7 **Q. Will the capital structures of Met-Ed and Penelec be affected by the Transaction?**

8 A. No. Met-Ed's and Penelec's investment in transmission assets will simply shift from
9 plant accounts to an asset account, FERC Account 123.1 *Investment in Subsidiary*
10 *Companies*, after the contribution is complete. Their capitalization will not be affected.

11 **Q. Will the Transaction change how the transmission service currently provided by**
12 **Met-Ed and Penelec is regulated?**

13 A. No, it will not. All transmission services over the transmission facilities will be provided
14 by MAIT pursuant to the terms of the PJM OATT, consistent with the current operation
15 of these facilities by Met-Ed and Penelec. The transmission facilities will remain subject
16 to the terms of the PJM OATT at all times before, during and after the Transaction.
17 Rates for transmission service will remain subject to the jurisdiction of the FERC and
18 administered by PJM through the OATT.

19 **Q. Will MAIT have a contractual relationship with other FirstEnergy companies?**

20 A. Yes, it will. Therefore, Met-Ed and Penelec are each requesting Commission approval of
21 five affiliated interest agreements.

1 The first is the FirstEnergy Service Company Agreement (Joint Applicants’
2 Statement No. 4, Joint Applicants’ Exhibit KJT-5), under which MAIT will be
3 entitled to receive administrative, management, and other services from FESC as
4 set forth in the agreement. The allocations set forth in the FirstEnergy Service
5 Company Agreement are consistent with FERC’s applicable requirements.

6 The second is the Revised and Amended Mutual Assistance Agreement (“MAA”)
7 (Joint Applicants’ Statement No. 4, Joint Applicants’ Exhibit KJT-6), under
8 which MAIT will be able to request and receive non-power goods and services
9 from the FirstEnergy operating companies consistent with the terms and
10 conditions of the MAA. For example, technical support services and workers,
11 including those from Met-Ed and Penelec, could be provided under the MAA to
12 assist MAIT in the performance of its operations as a separate transmission asset
13 owner.

14 The third is the Intercompany Income Tax Allocation Agreement (Joint
15 Applicants’ Statement No. 4, Joint Applicants’ Exhibit KJT-7), under which
16 MAIT will be able to participate in FirstEnergy’s filing of a consolidated tax
17 return as described in the direct testimony of Mr. Taylor.

18 The fourth consists of the Ground Leases between each of the Joint Applicants’
19 and MAIT (Joint Applicants’ Statement No. 4, Joint Applicants’ Exhibit KTJ-2).
20 Under the Ground Leases, MAIT will obtain the interests in real property needed
21 to furnish transmission service in the Med-Ed, Penelec and JCP&L zones.

22 Fifth and finally, MAIT will be added as a signatory to the FirstEnergy Regulated

1 Money Pool Agreement (Joint Applicants' Statement No. 3, Joint Applicants'
2 Exhibit SRS-3). Under the terms of the FirstEnergy Regulated Money Pool
3 Agreement, regulated companies within the FirstEnergy system can lend to, or
4 borrow from, each other to manage their working capital requirements.

5 **III. MAIT'S REQUEST FOR A CERTIFICATE OF PUBLIC CONVENIENCE**

6 **Q. As part of the Joint Application, is MAIT requesting that the Commission issue a**
7 **certificate of public convenience conferring upon it public utility status?**

8 A. Yes, MAIT is requesting that the Commission issue a certificate of public convenience
9 conferring upon it public utility status. As I previously explained, MAIT will only
10 provide interstate electric transmission service that is subject to the jurisdiction of the
11 FERC. Consequently, MAIT is requesting that the certificate of public convenience
12 issued to it expressly state that it does not confer the right to furnish any intrastate electric
13 service in Pennsylvania. Although FERC will have exclusive jurisdiction over the rates,
14 terms and conditions of MAIT's provision of transmission service, the issuance of a
15 certificate of public convenience conferring public utility status upon MAIT will subject
16 MAIT to the Commission's regulations pertaining to the siting of high voltage (i.e.,
17 greater than 100 kV) transmission lines. As explained in Section IV.B. of the Joint
18 Application, as a consequence of MAIT's submission to the Commission's siting
19 regulations, MAIT will also be assured that its siting, location, construction and operation
20 of transmission facilities in Pennsylvania will not be subject to municipal zoning and land
21 use regulations.

1 **Q. Please address MAIT's fitness to furnish public utility service.**

2 A. I understand that an applicant for a certificate of public convenience conferring public
3 utility service in Pennsylvania must demonstrate its fitness to furnish public utility
4 service and that there are three components to that requirement, namely technical,
5 financial and legal fitness, which I will address below.

6 **Q. Will MAIT have the technical capacity to furnish electric transmission service in
7 Pennsylvania the manner set forth in the Joint Application and accompanying
8 testimony?**

9 A. Yes, it will. MAIT will be a member of the FirstEnergy holding company system and, as
10 such, will have access to the resources and expertise available from FESC in the same
11 manner and on the same terms as the Operating Companies do currently. The
12 FirstEnergy Service Company Agreement (Joint Applicants' Exhibit No. KJT-5) and the
13 MAA (Joint Applicants' Exhibit No. KJT-6), for which approval as affiliated interest
14 agreements is being sought in the Joint Application, will provide the legal basis for
15 MAIT to request and obtain the full range of services as set forth under the terms of those
16 agreements. MAIT will also be able to call upon and use the existing well-trained
17 complement of Operating Companies employees, which has extensive experience in
18 operating and maintaining the Operating Companies' transmission systems.

19 **Q. Please describe MAIT's financial fitness.**

20 A. MAIT will be a member of FirstEnergy's regulated money pool, pursuant to the terms of
21 the FirstEnergy Regulated Money Pool Agreement (Joint Applicants' Exhibit SRS-3), for
22 which approval is requested in the Joint Application and is expected to also have short-

1 term borrowing capacity under FET's current \$1.0 billion credit facility. These two
2 sources of short-term borrowing capacity should provide MAIT sufficient liquidity for all
3 of its day-to-day operations. New capital investments in transmission assets will be
4 financed by a combination of FET's contributions of equity and the issuance of debt by
5 MAIT. As explained by Mr. Staub, MAIT is expected to have increased access to debt
6 capital at reasonable rates based on the stronger financial metrics of a stand-alone
7 transmission-only entity (Joint Applicants' Statement No. 3).

8 **Q. Will MAIT have the legal fitness to be a certificated Pennsylvania public utility?**

9 A. Yes, it will. MAIT will operate and maintain its entire interstate transmission system,
10 including the portions thereof located in Pennsylvania, safely and in full compliance with
11 applicable legal requirements and, as successor to the Operating Companies, it will
12 continue their track record of meeting applicable legal and regulatory obligations and
13 consistently furnishing safe and reliable transmission service. Moreover, MAIT
14 acknowledges that, as the holder of a certificate of public convenience, it will be required
15 to comply with the Public Utility Code and the Commission's regulations and orders,
16 excluding those provisions that expressly or by reasonable implication apply only to a
17 public utility that furnishes intrastate service within Pennsylvania or that are preempted
18 by the FERC's exclusive jurisdiction over transmission service and rates. However,
19 MAIT reserves the right to hereafter petition the Commission to be relieved of
20 requirements that, given MAIT's provision of only interstate transmission service subject
21 to the exclusive jurisdiction of the FERC, would not serve a reasonable regulatory
22 purpose to impose on MAIT.

1 **IV. CLASSIFICATION OF TRANSMISSION ASSETS**

2 **Q. Was a study completed to determine what assets should be contributed to MAIT?**

3 A. Yes. An independent consultant, Navigant, was hired to complete what is known as a
4 “seven factor test” to distinguish between “transmission” facilities, which are subject to
5 FERC’s exclusive jurisdiction,⁷ and “local distribution” facilities, which are subject to the
6 exclusive jurisdiction of the Commission. The seven factors are used to identify the
7 “primary function of a facility” in accordance with FERC requirements.⁸ If the primary
8 function is transmission, the facility is subject to FERC’s exclusive jurisdiction; if the
9 primary function is distribution, the facility is under exclusive state jurisdiction.

10 **Q. How do Met-Ed and Penelec currently classify transmission assets?**

11 A. Met-Ed currently classifies all facilities with voltage levels at or above 69 kV and 34.5
12 kV facilities with a delta configuration (“34.5 delta”) as transmission facilities while
13 Penelec currently classifies all facilities with voltage levels at or above 46 kV as
14 transmission facilities.

15 **Q. Did Navigant recommend any changes to the existing transmission and distribution**
16 **classifications?**

17 A. Yes, it recommended a very limited change for Met-Ed. Based on the seven factor test,
18 Navigant recommended moving all six of Met-Ed’s 34.5 kV delta facilities from
19 transmission to distribution. Navigant’s analysis determined that those six facilities are

⁷ 16 U.S.C. § 824(b)(1) (granting FERC exclusive jurisdiction over the “transmission of electric energy in interstate commerce” and “sale of electric energy at wholesale in interstate commerce”).

⁸ *Cal. Pac. Elec. Co., LLC*, 133 FERC ¶ 61,018 at P 45 (2010) (“[E]ven when a distribution facility is used to facilitate a jurisdictional wholesale sale . . . , if the primary function of the facility is local distribution, only the use of the facility for the [FERC]-jurisdictional services will be subject to [FERC’s] jurisdiction.”).

1 not operated as a transmission network and are serving a distribution function.

2 **Q. Does Met-Ed accept Navigant's recommendation?**

3 A. Yes. Therefore, all of Met-Ed's 34.5 kV delta facilities will be removed from
4 transmission and classified as distribution. The reclassified assets will fall under the
5 Commission's jurisdiction and be subject to state regulatory authority in a manner
6 consistent with all other distribution assets owned by Met-Ed. Thus, Met-Ed's assets to
7 be moved from transmission to distribution will be reflected in distribution rates to be
8 established in future distribution rate cases. Penelec will not be reclassifying any of its
9 assets as a result of Navigant's recommendation.

10 **Q. What further analysis did Met-Ed and Penelec complete to distinguish the assets
11 that would be contributed?**

12 A. Met-Ed and Penelec completed an internal review of its FERC transmission plant
13 accounts applying the results of the seven factor test. It was determined that certain
14 assets currently recorded in FERC Account Nos. 352 (Structures), 353 (Station
15 Equipment), 354 (Towers and Fixtures), 355 (Poles and Fixtures), 356 (Overhead
16 Conductors and Devices), 358 (Underground Conductors and Devices) and 359 (Roads
17 and Trails) serve a distribution function. For Met-Ed and Penelec, the total net book
18 value as of December 31, 2014 of the property to be reclassified is \$2.5 million and \$1.6
19 million, respectively. The property to be reclassified is properly subject to the
20 jurisdiction of the Commission in the same manner as all other distribution property
21 owned by Met-Ed and Penelec.

1 **Q. Were the depreciated original costs of Met-Ed's 34.5 kV delta facilities to be**
2 **reclassified pursuant to Navigant's recommendation or the transmission assets to be**
3 **reclassified based on Met-Ed's and Penelec's internal analyses included in Met-Ed's**
4 **or Penelec's rate base in their distribution rate cases at Docket Nos. R-2014-2428745**
5 **and R-2014-2428743, respectively?**

6 A. No. Those facilities were excluded from both Met-Ed's and Penelec's rate base claims in
7 those cases because they were classified as transmission assets and, therefore, were
8 recorded in FERC transmission asset accounts. As a consequence, cost recovery for
9 those facilities occurs through Met-Ed's and Penelec's FERC-jurisdictional rates for
10 network integration transmission service. When MAIT's transmission rates become
11 effective following the implementation of MAIT's FERC formula rate, the revenue
12 requirement associated with the reclassified facilities will have been removed from
13 MAIT's rate for network integration transmission service. Once that occurs, Met-Ed's
14 and Penelec's distribution customers will receive service furnished by the reclassified
15 facilities that will not be reflected in MAIT's network integration transmission service
16 rates and also will not be reflected in Met-Ed's or Penelec's distribution base rates until
17 the conclusion of their next distribution base rate cases.

18 **V. REGULATORY FRAMEWORK**

19 **Q. Will FET pursue a formula rate for MAIT once the contribution of assets is**
20 **complete?**

21 A. Yes. Once the Transaction is approved, the next step will be to file a formula rate for
22 MAIT at FERC. The combination of a formula rate mechanism and a transparent

1 transmission-only entity creates an environment that will facilitate raising, at favorable
2 costs, the capital needed to accelerate FET's investment in the expansion of the EtF
3 program. The expansion of EtF program is discussed by Mr. Mackauer in Joint
4 Applicants' Statement No. 2. In this regard, I would note that recent legislative and
5 regulatory policy in Pennsylvania has recognized the importance of creating a regulatory
6 structure supportive of accelerated capital investment in electric distribution assets. Act
7 11 of 2012 authorized the use of a fully projected future test year and a distribution
8 system improvement charge ("DSIC") that can be employed by electric distribution
9 companies. The creation of MAIT and its filing of a formula rate at FERC will provide a
10 similar regulatory framework for transmission assets, which will enable the acceleration
11 of FET's investment in its transmission system.

12 **VI. PUBLIC BENEFITS**

13 **Q. Please describe generally the benefits expected from the Transaction.**

14 A. A key benefit of the Transaction is the increased transparency resulting from the
15 Transaction with respect to distribution and transmission businesses. This increased
16 transparency, in turn, is expected to facilitate necessary capital investment in
17 transmission which will benefit Met-Ed and Penelec customers.

18 **Q. How will the Transaction increase transparency?**

19 A. Met-Ed's and Penelec's financial reports historically have either shown combined
20 transmission and distribution earnings or included specific exclusions and allocations to
21 reflect the earnings of the distribution portion of each utility. After the Transaction, Met-
22 Ed's and Penelec's quarterly financial reports will be better aligned with the assets

1 recorded on their books and will not require adjustments to isolate the earned rate of
2 return of their intrastate retail distribution businesses. Likewise, Met-Ed and Penelec will
3 no longer need to exclude transmission plant, revenue and expenses or calculate
4 allocations to transmission service in preparing distribution rate filings, which will
5 simplify and streamline those filings and should reduce the time and resources required
6 for other parties to review and analyze the Operating Companies' supporting data.

7 From a transmission perspective, the consolidation of the Operating Companies'
8 transmission assets within MAIT will allow interested parties to easily review the annual
9 updates to the transmission revenue requirement because that review can be focused on a
10 single entity that owns only transmission assets. The Transaction will also provide both
11 the FERC and this Commission increased clarity with respect to the business functions
12 each commission regulates, resulting in greater certainty that there is no misallocation
13 between the transmission and distribution functions of what currently are treated as
14 common assets and common costs.

15 Finally, the Transaction will provide an additional level of assurance that customers and
16 suppliers have nondiscriminatory access to the transmission system. Today, Met-Ed and
17 Penelec maintain nondiscriminatory access to the transmission system through functional
18 separation and strict adherence to the FERC Standards of Conduct. The Transaction will
19 create a corporate separation of the transmission business, rather than the functional
20 separation that exists today.

21 **Q. How will the Transaction facilitate capital investment?**

22 A. As explained by Mr. Staub in Joint Applicants' Statement No. 3, the creation of a single,

1 transmission-only entity will put investors in a better position to identify and quantify the
2 risks of investing in the transmission business. The resulting reduction in investor risk
3 will, in turn, provide better access to capital and facilitate needed capital investments. As
4 described by Mr. Staub, MAIT is expected to start with a better credit rating than Met-Ed
5 or Penelec, which will translate into lower debt costs and savings in interest expense.

6 **Q. With the approval of the Transaction, will MAIT be in a position to make**
7 **significant capital investment to maintain and enhance the reliability of its**
8 **transmission assets?**

9 A. Yes. If the Transaction is approved, MAIT is expected to accelerate construction
10 programs requiring the investment of between \$2.5 billion and \$3.0 billion over the next
11 five to ten years in transmission infrastructure in the PJM transmission zones for Met-Ed,
12 Penelec and JCP&L. As described by Mr. Mackauer, the expansion of the EtF program
13 is designed to improve the resilience, reliability, and load-carrying capacity of the
14 transmission system for existing and new customer loads. The investment would include
15 both transmission planning/protection and reliability enhancement-driven projects, such
16 as: (1) new, re-conducted, and rebuilt transmission lines; (2) new and enhanced
17 substations (i.e. new breakers, transformers and/or capacitors); and (3) the installation of
18 dynamic reactive resources (i.e., new capacitors and static var compensators to quickly
19 regulate system voltage). In addition, investments in communication infrastructure
20 would be made to enhance cyber security and secure remote access to transmission
21 substations.

22 As explained by Mr Staub, MAIT will provide a more efficient vehicle for financing this

1 transmission investment and also ensure that the distribution function of Met-Ed and
2 Penelec will not be adversely affected. Financing transmission infrastructure
3 replacements and PJM-driven projects through Met-Ed and Penelec may limit the
4 available capital for important distribution investment or could adversely affect their
5 financial position and credit profiles. By financing transmission projects at MAIT, debt
6 incurred for these investments will not impact the financial position of Met-Ed and
7 Penelec.

8 **Q. Will the Transaction result in cost savings for Met-Ed and Penelec customers and**
9 **other transmission customers in Pennsylvania?**

10 A. Yes. First, as I noted earlier, MAIT is expected to start with a better credit rating than
11 Met-Ed and Penelec, with no expected adverse impact on the existing credit ratings of
12 those Companies. This will translate into lower debt costs and savings in interest
13 expense for transmission operations during a time when MAIT will be raising significant
14 amounts of capital. Given that \$2.5 to \$3.0 billion of investment in transmission facilities
15 is planned over the next five to ten years, the reduction in interest costs could amount to
16 over \$135 million over the 30-year life of those bonds. Those significant savings will
17 flow to customers through reduced costs when setting transmission rates through the
18 FERC ratemaking process.

19 **Q. Are there other benefits associated with this Transaction?**

20 A. Yes. As noted earlier, the approval of MAIT will allow for the accelerated investment of
21 \$2.5 to \$3.0 billion in the transmission system. An investment of that magnitude will
22 create additional jobs, as discussed further in Joint Applicants' Statement No. 2, the

1 direct testimony of Mr. Mackauer.

2 **Q. Will the proposed contribution of transmission assets to MAIT have any**
3 **anticompetitive effect or will it enhance customers' ability to secure the benefits of**
4 **retail competition?**

5 A. No. As noted previously, the Operating Companies seek only to more definitively
6 separate their transmission facilities from their distribution facilities in order to pave the
7 way for a more efficient vehicle to finance significant investment in transmission assets.
8 MAIT does not own any generation, distribution or transmission facilities and will not
9 own or control any generation or any distribution assets upon completion of the proposed
10 Transaction. When the contribution of transmission assets to MAIT is completed, Met-
11 Ed and Penelec will no longer own transmission facilities. Consequently, the proposed
12 contribution will have no effect on the concentration of generation or transmission assets
13 or upon market power. Moreover, because the proposed transaction will continue to have
14 the transmission facilities under the operational control of an RTO, it will have no
15 adverse effect on competition in the wholesale power market.

16 **Q. Please summarize the principal benefits that the Transaction will create.**

17 A. The Transaction will create greater transparency by placing transmission assets and
18 distribution assets in separate companies. Greater transparency will provide state
19 regulatory authorities and the FERC better vision into the functions that each regulates.
20 The correlative benefit is that transmission assets, revenues and expenses will no longer
21 be recorded, as such, on Met-Ed's and Penelec's books of account, which, as I previously
22 explained, will streamline and simplify distribution base rate cases. Additionally, the

1 new corporate structure will consolidate all the transmission assets currently owned by
2 the Operating Companies into a single, separate company which, in turn, will facilitate
3 implementing a FERC formula rate mechanism. Both of those factors, working in
4 combination, along with the greater transparency that a separate transmission-only
5 company will afford investors and the investment community, will increase MAIT's
6 creditworthiness and access to capital and, thereby, enable MAIT to accelerate the
7 expansion of the EtF program across the currently separate transmission zones of Met-
8 Ed, Penelec and JCP&L. In that regard, using the reasonable assumptions regarding
9 credit ratings, interest costs and levels of investment that I discussed previously, the
10 potential exists to achieve forecasted debt cost savings of up to \$135 million over a
11 thirty-year term of financing associated with the expansion of the EtF program.

12 **Q. Does this conclude your direct testimony?**

13 A. Yes, it does at this time.

Biography
Charles V. Fullem
Director – Rates & Regulatory Affairs/Pennsylvania

Charles V. Fullem is Director- Rates & Regulatory Affairs/Pennsylvania, a position he was appointed to on January 22, 2006. In that capacity, he is responsible for developing the default service plans of Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company and West Penn Power Company, as well as all retail tariff filings and financial reports to the Pennsylvania Public Utility Commission (“PaPUC”) and the New York State Public Service Commission. He has over 30 years’ experience in the energy industry, with a background in rates and regulation, marketing, unregulated retail pricing and regulated tariffs, contract development and negotiations of both wholesale and retail electric service contracts.

From December 2000 through January 2006, he served in various positions, including Director of Energy Consulting Operations for The E Group, the energy consulting subsidiary of FirstEnergy Corporation (“FirstEnergy”). As Director, he managed technical staff teams and was responsible for delivering all aspects of The E Group’s client services for an over one billion dollar client energy spend, including energy management, bill and rate analysis, development of energy procurement strategies, preparation of requests for proposal, evaluation of bids, contract development and implementation, open market analysis, and negotiations with suppliers and utilities and utility bill payment.

From November 1999 through December 2000, Mr. Fullem was Director, Pricing and Regulatory Affairs in FirstEnergy’s rate department, where he was responsible for tariff administration and pricing programs serving over 2.2 million customers in Ohio and Pennsylvania. In this capacity, Mr. Fullem developed and implemented the unbundled tariffs designed to implement Customer Choice in Ohio, coordinated the development of FirstEnergy’s Supplier Tariff and Net Metering Rider, and participated in the Operational Support Plan (OSP) workgroups. The OSP workgroups were collaborative working groups charged with establishing the various rules and policies of retail choice in Ohio.

From December 1994 through November 1999, Mr. Fullem served in various roles in First Energy’s marketing department, including Director, Planning and Strategy and Director of Centerior Energy’s Competitive Analysis Department, where he developed and implemented successful marketing programs targeted to commercial and industrial customers and mass market customers in competitive retail electric markets in both competitive generation markets and in traditional areas of competition between fully integrated electric utility providers.

From 1982 through December 1994, Mr. Fullem served in various roles in rates and regulation at Centerior Energy and The Cleveland Electric Illuminating Company, including the roles of Director, Planning & Strategy, and Director of Rates & Contracts. In these roles, Mr. Fullem managed and performed cost of service studies, load research, customer requirements analyses, designed rates and tariffs, participated in the development of revenue requirements, and performed financial analyses.

Mr. Fullem holds his Bachelor of Science degree in Mineral Economics from the Pennsylvania State University. Mr. Fullem is a Certified Energy Procurement Professional by the Association of Energy Engineers. He has provided expert testimony before the Public Utilities Commission of Ohio (“PUCO”), the PaPUC, and the Federal Energy Regulatory Commission (“FERC”).

Mr. Fullem has prepared and presented testimony in the following rate-related cases:

PUCO Cases:

Case No.	Case Name
85-521-EL-COI	In the Matter of the Investigation into the Perry Nuclear Power Station
88-170-EL-AIR	In the Matter of the Application of The Cleveland Electric Illuminating Company for Authority to Amend and to Increase Certain of its Filed Schedules Fixing Rates and Charges for Electric Service
88-171-EL-AIR	In the Matter of the Application of The Toledo Edison Company for Authority to Amend and to Increase Certain of its Filed Schedules Fixing Rates and Charges for Electric Service
91-1528-EL-CSS	In the Matter of the Complaint of Toledo Premium Yogurt, Inc., dba Freshens Yogurt, Complainant, v. The Toledo Edison Company, Respondent
91-2308-EL-CSS	Board of Education, Cleveland City Schools v. The Cleveland Electric Illuminating Company
92-504-EL-CSS	Board of Education, Cleveland City Schools v. The Cleveland Electric Illuminating Company
95-02-EL-ABN	In the Matter of the Application of the City of Clyde Requesting Removal of Certain Electric Distribution Facilities of The Toledo Edison Company from Within Clyde’s Corporate Limits

**DIRECT TESTIMONY
OF
JEFFREY J. MACKAUER**

1 **I. INTRODUCTION AND BACKGROUND**

2 **Q. Please state your name and business address.**

3 A. My name is Jeffrey J. Mackauer. My business address is 76 South Main Street, Akron,
4 OH 44308.

5 **Q. By whom are you employed and in what capacity?**

6 **A.** I am employed by FirstEnergy Service Company (“FESC”) as Director of Transmission
7 Planning & Protection.

8 **Q. What are your current responsibilities?**

9 A. I oversee all activities related to the development of projects for the ongoing planning and
10 protection of the transmission systems of the FirstEnergy Corp. (“FirstEnergy”)
11 transmission-owning entities, including, among others, certain utility operating
12 subsidiaries, namely Pennsylvania Electric Company (“Penelec”), Metropolitan Edison
13 Company (“Met-Ed”), and Jersey Central Power & Light Company (“JCP&L”)
14 (collectively, the “Operating Companies”). My department also develops and maintains
15 load flow, short circuit, and dynamic stability models and works with the staff of PJM
16 Interconnection, L.L.C. (“PJM”), the Regional Transmission Operator (“RTO”), to assess
17 transmission system reliability needs.

18 **Q. Please describe your educational and professional background?**

19 A. I received a Bachelor of Science degree in Electronics Engineering Technology from
20 Missouri Institute of Technology in 1979 and have been a registered Professional
21 Engineer in the Commonwealth of Pennsylvania since 1987. I have almost 30 years of

1 experience with FirstEnergy and its predecessor companies. My work experience is more
2 fully described in my professional biography, which is attached as Appendix A.

3 **Q. Have you previously testified in proceedings before the Pennsylvania Public Utility**
4 **Commission (the “Commission”)?**

5 A. Yes. I testified on behalf of Penelec before Commission in Docket No. P-2008-2020257.
6 I have also testified at FERC on behalf of American Transmission Systems, Incorporated
7 (“ATSI”) in Docket No. ER15-303-000.

8 **Q. On whose behalf are you testifying in this proceeding?**

9 A. I am testifying on behalf of Met-Ed and Penelec.

10 **Q. Please describe the purpose of your testimony.**

11 A. As explained in the direct testimony of Steven R. Staub (Joint Applicants’ Statement No.
12 3), Met-Ed and Penelec are requesting Commission approval to contribute their
13 transmission assets to Mid-Atlantic Interstate Transmission, LLC (“MAIT”), a newly-
14 formed subsidiary of FirstEnergy Transmission, LLC (“FET”), in which the Operating
15 Companies will own membership interests (the “Transaction”). MAIT will own and
16 operate the transmission assets and construct, own and operate new transmission facilities
17 in the service areas of the Operating Companies, which will be subject to the jurisdiction
18 of the Federal Energy Regulatory Commission (“FERC”). MAIT will be a member of
19 PJM and will furnish transmission service pursuant to PJM’s Open Access Transmission
20 Tariff (“OATT”). As discussed in the direct testimony of Charles V. Fullem (Joint
21 Applicants’ Statement No. 1), MAIT is also requesting that the Commission grant it
22 public utility status. The purpose of my testimony is to describe the operational benefits

1 from a transmission system planning, operations and reliability perspective that will be
2 realized from the Transaction and the future operation of MAIT. I also discuss benefits to
3 the economy of the areas served by the Operating Companies.

4 **Q. Please summarize the principal benefits of the proposed Transaction that you will discuss**
5 **in more detail later in your testimony.**

6 A. As explained by Mr. Staub in Joint Applicants' Statement No. 3, the formation of MAIT
7 and the consummation of the Transaction will provide greater access to capital and lower
8 borrowing costs, which will enable increased and accelerated investment in projects
9 designed to enhance system reliability, customer service, capacity and resiliency for
10 existing and new customers of the Operating Companies' transmission systems. The
11 projects that will be undertaken include constructing new and upgrading existing
12 transmission lines; constructing new and upgrading existing substations; enhancing the
13 communications infrastructure; and modernizing the transmission system including
14 physical and cyber security enhancements. As also explained later in my testimony, these
15 projects will have a direct, beneficial impact on customer service. Additionally, the
16 increased and accelerated levels of investment made possible by the formation of MAIT
17 and the consummation of the Transaction will benefit the economy of Pennsylvania by
18 spurring job creation and supporting vendors, suppliers and service providers in the state.

1 **II. OVERVIEW OF THE TRANSMISSION PLANNING AND RELIABILITY**
2 **ENHANCEMENT PROCESS**

3 **Q. Please explain how transmission investment decisions are made for the Operating**
4 **Companies' Zones.**

5 A. Transmission investment decisions for the Operating Companies' respective service
6 territories within PJM, referred to as their "Zones," are made through FirstEnergy's
7 Transmission Planning process and Reliability Enhancement process.

8 **Q. Please describe the Transmission Planning process.**

9 A. PJM, in its capacity as the regional Transmission Planning Coordinator, Transmission
10 Planner and Transmission Operator, identifies the need and timing for transmission
11 system upgrades to preserve the reliability of the electricity grid that is under its
12 operational control as the RTO. PJM selects transmission system upgrades using its
13 Regional Transmission Expansion Plan ("RTEP") process, which consists of a
14 comprehensive series of detailed analyses to ensure that PJM's own reliability planning
15 criteria and those of the applicable transmission owners (in this instance, the Operating
16 Companies) are satisfied, which, in turn, satisfies the North American Electric Reliability
17 Corporation ("NERC") and the ReliabilityFirst Corporation ("RF")¹ reliability standards
18 with which the PJM and transmission owner criteria are designed to comply. The
19 activities conducted under the transmission planning process are designed to adhere to
20 good utility practice and ensure compliance with the aforementioned applicable reliability
21 standards. Because its utility subsidiaries are members of PJM, much of FirstEnergy's
22 transmission planning is conducted in coordination with PJM. FirstEnergy's transmission
23 planning supports PJM's planning process while also providing additional analyses to

¹ RF is the organization responsible for enforcing the reliability criteria of the NERC.

1 confirm the validity of PJM’s studies. In this regard, the Transmission Planning process
2 and the RTEP projects selected for construction under that process are required by the
3 applicable reliability and planning criteria and, once approved by PJM, are mandatory. In
4 addition, FirstEnergy identifies transmission needs on the transmission systems of its
5 subsidiaries and plans for future transmission investment through its own Reliability
6 Enhancement process.

7 **Q. Please describe the Reliability Enhancement process.**

8 A. Unlike the Transmission Planning process, the Reliability Enhancement process is not
9 mandated or directed by PJM. Instead, the Reliability Enhancement process is an internal
10 process by which FirstEnergy strategically and proactively identifies transmission
11 projects that are needed throughout the service territories of its utility subsidiaries that
12 furnish transmission service, including the service territories of the Operating Companies,
13 in order to maintain the reliability of the transmission system as a whole. The Reliability
14 Enhancement process complements the preventative maintenance activities that
15 FirstEnergy conducts on its transmission system. The projects that are identified through
16 the Reliability Enhancement process are in addition to those identified in its Transmission
17 Planning process.

18 **III. ENERGIZING THE FUTURE PROGRAM (“EtF”)**

19 **Q. What is the “EtF” program?**

20 A. Energizing the Future or “EtF” is a FirstEnergy program that has as its goal improving
21 transmission system reliability by building the transmission projects identified by the
22 Transmission Planning and Reliability Enhancement processes. The current EtF program
23 encompassing the Operating Companies’ Zones is primarily focused on projects

1 identified through FirstEnergy's Transmission Planning process. FirstEnergy proposes to
2 expand the EtF program to provide a more targeted focus on projects identified for the
3 Operating Companies' Zones through the Reliability Enhancement process. The
4 formation of MAIT and the consummation of the Transaction will enable the expansion
5 of the EtF program to complete the FirstEnergy Reliability Enhancement process
6 investments in an accelerated manner, which will, in turn, improve the reliability,
7 capacity, operating flexibility and security of the transmission system for existing and
8 new customers in the Operating Companies' Zones. Moreover, the financial benefits that
9 Mr. Staub described in his direct testimony will allow MAIT to complete the transmission
10 projects described later in my testimony sooner and in a more economically efficient
11 manner.

12 **Q. Please explain why the proposed expansion of the EtF program is needed.**

13 A. Through the Reliability Enhancement process, it was determined that significant
14 investment in the transmission facilities within the Operating Companies' Zones is
15 needed to: (i) proactively upgrade or replace transmission lines and substation
16 components that present an increasing risk to reliability; (ii) modernize the Operating
17 Companies' infrastructure by taking advantage of technological advances that will help
18 enhance reliability and promote increased efficiencies; (iii) increase or restore load
19 serving capability; (iv) improve the resiliency of the existing transmission system to
20 better withstand and recover from storms and unusual weather events such as extreme
21 heat and cold; (v) address heightened concerns with cyber and physical security; (vi)
22 reduce increasing maintenance expenses by installing new equipment with real-time
23 monitoring capabilities that will optimize maintenance intervals and reduce maintenance

1 expenditures; (vii) address the imposition of increasingly more rigorous reliability
2 standards by NERC and RF; and (viii) better address our customers' needs by reducing
3 the duration and frequency of unscheduled outages.

4 These investment needs are largely driven by increased customer reliability
5 demands. In addition, various changes on the transmission systems, including, among
6 other factors, generation changes (*i.e.*, the retirement of existing generation facilities and
7 the addition of new fossil fuel and renewable generating facilities); changes in load;
8 increased reliance on demand-side resources; and the need for additional operational
9 flexibility, enhanced system performance and/or safer operation of the transmission
10 system have all contributed to the need for advancing these replacements and upgrades.
11 Although some of these factors, such as generation changes, are addressed in the
12 Transmission Planning process, the Reliability Enhancement process will further improve
13 the operational flexibility of the transmission system to accommodate these changes.
14 With regard to improving the resiliency of the existing transmission system, the
15 Operating Companies' Zones are located in a region that has experienced both the severe
16 impacts of significant storm events (such as Hurricane Irene and Superstorm Sandy) and
17 unusual weather events such as the September 2013 Heat Wave and the Polar Vortex in
18 February 2014.

19 Finally, there has been increasing concern at both the federal and state levels for
20 the cyber and physical security of the transmission system. These concerns were initially
21 triggered by the September 11, 2001 terrorist attacks and subsequently heightened by a
22 physical attack on Pacific Gas and Electric Company's Metcalf substation on April 16,
23 2013. Due to these concerns, NERC has recently significantly raised its reliability

1 standards with regard to both cyber and physical security. Completing physical and cyber
2 security projects are necessary to provide and maintain a reliable and secure transmission
3 system.

4 **Q. What is the general nature of the projects encompassed by the proposed expansion**
5 **of the EtF program?**

6 A. The proposed expansion of the EtF program will increase spending on projects designed
7 to enhance reliability. They will include new, re-conducted, re-insulated, and
8 refurbished transmission lines; new and upgraded substations (*i.e.*, new breakers, power
9 transformers, instrument transformers and capacitors); and the installation of dynamic
10 reactive resources (*i.e.*, new capacitors or static var compensators which quickly regulate
11 system voltage). An enhanced fiber optic communications infrastructure to provide
12 secure remote access to transmission substations will also be constructed. The projects
13 generally fall into one or more of five categories, consisting of: (1) System Condition
14 Projects; (2) System Performance Projects; (3) Operational Flexibility Projects; (4)
15 Transmission Communications Infrastructure, Physical Security Enabling and Cyber
16 Security Projects; and (5) Physical Security Projects. These projects and the benefits they
17 will provide to customers in the Operating Companies' Zones will be discussed in more
18 detail below.

19 **Q. How will MAIT facilitate the expansion of the EtF program?**

20 A. The deregulation of the electric utility industry has precipitated many changes in the way
21 the electric grid is planned and operated. Factors such as PJM's RTEP process, the
22 continuously changing generation mix, advancements in "green" generation technology
23 and other non-traditional generation sources and increasing regulatory requirements are

1 some examples of forces creating the need for greater levels of grid reliability, security,
2 coordination and flexibility to assure safe and reliable transmission of electricity on a
3 non-discriminatory basis. The creation and expansion of independent RTOs, such as
4 PJM, helps to address some of those challenges by augmenting what previously had been
5 largely a localized planning function performed by individual transmission owners with a
6 more centralized approach aimed at optimizing the performance of the transmission
7 system to provide greater access, capacity, reliability and market efficiency.

8 The proposed Transaction is also designed to address the kinds of challenges to
9 the transmission system that I summarized above. Specifically, the formation of MAIT
10 and the consummation of the Transaction will consolidate the transmission assets of the
11 three Operating Companies in one entity that has a singular focus on efficiently and
12 effectively operating, maintaining and, where necessary, expanding, its transmission
13 system. Additionally, as Mr. Staub explains, consolidating the Operating Companies'
14 transmission assets in MAIT is expected to improve MAIT's credit metrics as compared
15 to those of the Operating Companies and, in that way, permit MAIT to increase and
16 accelerate its investment in the kinds of transmission projects described later in my
17 testimony.

18 **IV. PROPOSED PROJECTS AND OPERATIONAL BENEFITS**

19 **Q. Please describe the types of System Conditions Projects that MAIT plans to**
20 **undertake.**

21 A. MAIT plans to undertake substation and transmission line projects designed to upgrade
22 and modernize the existing transmission system equipment to better respond to current
23 demands and changing transmission system conditions.

1 Identifying needed projects begins with a condition-based assessment of
2 FirstEnergy's transmission assets that examines the criticality, health, and risk of failure
3 to determine which in-service and spare equipment assets should be replaced or
4 enhanced. The assessment considers factors such as equipment reliability, maintenance
5 program findings, age, the availability of technical support from the equipment
6 manufacturer, spare parts availability, and high maintenance costs. While age alone is
7 not a determinative factor in the assessment process, it is considered in conjunction with
8 these other factors listed above. FirstEnergy evaluates the condition of transmission
9 assets to determine whether replacement would improve reliability, decrease customer
10 outage time, reduce maintenance costs, or provide some combination of these benefits.
11 Assets are considered for replacement based on safety, reliability and whether the
12 equipment can be maintained.

13 Assets that are at or near the end of their expected service lives are targeted for
14 potential replacement, especially if they are currently experiencing higher than expected
15 maintenance costs. Additionally, equipment that is no longer manufactured or supported
16 by vendors will also be targeted for potential replacement, since it may not be possible to
17 replace the equipment quickly if it fails. Replacing these types of assets improves
18 operating performance and streamlines maintenance procedures.

19 Additionally, projects designed to modernize the existing grid can include
20 replacing analog, digital, or electromechanical equipment with microprocessor equipment
21 when doing so will provide maintenance or operational benefits.

22 Typical System Condition Projects include:

1 (a) **Replacing older vintage oil-insulated and gas-insulated breakers.** These
2 types of breakers are having condition problems such as leaks and issues with
3 mechanism malfunctions. The lack of available spare parts requires
4 FirstEnergy to make substantial expenditures on costly remanufactured parts.
5 Proactively replacing these types of breakers under MAIT will improve
6 reliability and reduce maintenance expenses. In addition, these breaker
7 replacements will offer a more environmentally friendly medium utilizing
8 small amounts of gas instead of the thousands of gallons of oil required by
9 existing oil-filled breakers and, in the case of existing gas-insulated breakers,
10 avoiding the leaks to which they are prone, particularly in cold weather.

11 (b) **Replacing transformers.** Older vintage oil-cooled transformers often
12 develop leaks from heating and cooling cycling caused by loading and
13 seasonal weather patterns. This exposes the oil to moisture and oxygen,
14 which accelerates the deterioration of the dielectric and thermal capabilities of
15 the oil. When this occurs, the transformers run hotter, which lowers their
16 capacity and makes them more susceptible to failure. Replacement
17 transformers offer on-line monitoring of the oil chemistry and use improved
18 gasket materials to better seal the unit. These improvements make the
19 transformers more reliable and less likely to be de-rated, which reduces
20 system capacity and creates various operational problems.

21 (c) **Upgrading and rebuilding transmission lines.** Over the past several years, a
22 few transmission lines have tripped multiple times throughout the year and no
23 obvious reason was found notwithstanding the extensive aerial and foot

1 patrols that were conducted to examine the lines. FirstEnergy believes that
2 batches of line insulators purchased at certain times in the past are the likely
3 cause and that all the insulators in those batches should be proactively
4 replaced.

5 Another transmission line issue has been attributed to the legacy design of
6 older transmission lines. This older design sometimes results in one phase
7 conductor contacting another phase conductor, the static ground wire, or an
8 off right-of-way tree during high wind events. This results in multiple outages
9 per year, which directly affects thousands of customers. MAIT will
10 proactively re-design and/or re-construct transmission lines experiencing these
11 types of issues from the increased debt financing capability associated with
12 the Transaction, which will improve customer service and make the
13 transmission system more resilient.

14 **(d) Installation of real time transformer and circuit breaker monitoring.**

15 When circuit breakers operating at voltages of 345 kV and above and power
16 transformers are replaced, circuit breaker and transformer monitoring is
17 installed along with the new equipment, thereby modernizing the transmission
18 infrastructure. Transformer monitors provide on-line monitoring of bushings,
19 pumps, fans, the presence of gas in the cooling oil, and oil and winding
20 temperatures, and they use advanced algorithms to determine how much load
21 the transformer can carry. Monitoring for the types of circuit breakers
22 described above provides on-line gas pressures, the timing of the closing and
23 opening of the mechanism, interrupter wear and the operations count (i.e.,

1 how many times the breaker opens and closes). This information will provide
2 the ability to know remotely when there is a minor problem with these assets
3 while they are still in service and to take action earlier to repair the minor
4 problem before it becomes a major problem.

5 (e) **Replacing older vintage relays.** There are numerous older vintage relays
6 that are in-service but are no longer supported by the manufacturer and,
7 therefore, replacement parts are not available. When preventative
8 maintenance is conducted, these relays are difficult to calibrate and to
9 maintain within their specifications. New digital microprocessor relays
10 incorporate advanced technology features that give protection engineers the
11 ability to view fault record events and relay settings remotely, and reduce
12 maintenance requirements. Replacing older vintage relays with modern relays
13 will improve reliability by eliminating the potential for relay malfunctions.

14 (f) **Replace Coupling Capacitor Voltage Transformers (“CCVTs”).** When
15 CCVTs fail, they tend to do so violently and typically clear the substation bus
16 on which they are monitoring the voltage. This results in increased numbers
17 of unscheduled outages that impact multiple transmission lines and
18 transformers (i.e. customer service). Additionally, collateral damage to other
19 equipment can occur that would lengthen outages. Industry recommendations
20 suggest considering the replacement of CCVTs that are 25 years old and older
21 because at that age they tend to exhibit higher failure rates. Proactively
22 replacing CCVTs that have reached the recommended threshold for

1 replacement will improve reliability and safety by decreasing the risk of
2 failure and collateral damage.

3 **Q. How will System Condition Projects benefit customers?**

4 A. These projects are designed to enhance reliability by reducing the frequency and/or
5 duration of customer outages. They can also reduce maintenance costs, saving
6 customers' money, or address environmental concerns. The transmission infrastructure
7 will be renewed by the addition of increased automation and the addition of new analytic
8 monitoring systems. These projects will also provide increased control and flexibility in
9 operations that, in turn, will contribute to improved reliability through faster response
10 times and shorter outages.

11 **Q. Please describe the types of System Performance Projects that MAIT plans to**
12 **undertake.**

13 A. System Performance Projects are designed to enhance transmission system performance
14 by increasing automation in order to provide more visibility into the status of the system.
15 Increased visibility will increase the speed at which operators can respond to system
16 conditions and restore service in the event of outages. FirstEnergy evaluates transmission
17 lines that serve larger numbers of customers and higher amounts of load to determine the
18 need for additional or enhanced facilities to reduce the frequency and/or duration (i.e.
19 restoration time) of outage events.

20 Typical System Performance Projects include:

- 21 (a) **Installing Supervisory Control and Data Acquisition (“SCADA”) to**
22 **switching devices.** FirstEnergy plans to add more automation to transmission

1 switches to provide remote sectionalizing capability in order to facilitate faster
2 restoration of service to customers after an outage event.

3 (b) **Strategically installing breakers or automatic sectionalizing switches at**
4 **tapped substations.** An outage of a transmission line serving one or more
5 tapped substations would cause the loss of power to all of the tapped
6 substations served from that line. When breakers are installed at a tapped
7 substation along that line, those breakers convert a single long line into two
8 shorter lines. As a result, an outage on one of the shorter lines will not cause
9 the tapped substation with breakers to lose power because the other shorter
10 line will supply the load. Also, other customers served on one of the shorter
11 lines will also experience fewer outages because they will be affected only by
12 an outage of the shorter line that serves them. When automatic sectionalizing
13 switches are installed at a tapped substation along that line, the automatic
14 sectionalizing switches convert a single long line into two shorter line
15 segments. As a result, an outage on one of the shorter line segments will only
16 cause the tapped substation with automatic sectionalizing switches to lose
17 power for less than one minute until the automatic sectionalizing scheme can
18 determine which of the shorter line segments will supply the load. Also, other
19 customers served on one of the shorter line segments will also experience
20 fewer outages (greater than one minute) because they will be affected only by
21 an outage of the shorter line segment that serves them.

22 Q. **How will System Performance Projects benefit customers?**

1 A. These projects are designed to increase operational visibility into system status and
2 conditions (i.e. improve situational awareness) through the use of more SCADA
3 equipment. Increased visibility will aid in analyzing and responding to system events.
4 The addition of breakers or automatic sectionalizing switches at tapped substations will
5 provide reliability benefits by increasing the speed of system restoration and reducing the
6 frequency and duration of outages experienced by customers.

7 **Q. Please describe the types of Operational Flexibility Projects that MAIT plans to**
8 **undertake.**

9 A. Operational Flexibility Projects are designed to improve reliability for existing customers
10 and increase capacity to accommodate the loads of both existing and new customers.
11 FirstEnergy reviews the existing configuration of radial-feed transmission lines that are
12 subject to more frequent outages and outages of longer duration than those that are loop
13 fed to determine if the radial lines should be looped to the rest of the network.
14 FirstEnergy also reviews long, critical or three terminal transmission lines to determine if
15 they should be re-configured.

16 FirstEnergy reviews the existing transmission facilities in areas of the system
17 where it has been unable to quickly accommodate increased or new load or where it
18 anticipates increased or new load will be added in the future. Improvements that can
19 enable the transmission system to meet anticipated customer demands are assessed.

20 Typical Operational Flexibility projects include:

21 (a) **Converting radially fed substations to be network fed substations.** These
22 types of projects provide redundant sources of power into the substation,
23 decreasing the duration and frequency of customer outages. In addition, these

1 projects allow for maintenance to be performed on the transmission line,
2 transmission line breakers, substation bus, etc. without an interruption of
3 service to the customers. This will also add load serving capability and
4 increase the system operating margin.

- 5 (b) **Converting a three terminal transmission line to two independent**
6 **transmission lines.** This type of project will improve reliability by
7 eliminating a three terminal transmission line with its potential for protective
8 relay malfunctions. Such malfunctions are an industry-recognized concern.
9 By converting the transmission line to two transmission lines, the potential
10 risk exposure for customers directly fed from the lines and for sources feeding
11 lower voltage systems will be proportionally reduced.

12 **Q. How will Operational Flexibility Projects benefit customers?**

13 A. These projects will add operational flexibility to the transmission system and provide the
14 following benefits:

- 15 (a) More flexibility with outage scheduling and switching during scheduled
16 maintenance periods. The increase in flexibility will create additional
17 operational alternatives for addressing transmission outages.
- 18 (b) Enhanced ability to address future unexpected shifts in generation, increased
19 system loading and/or uncertainties in generation availability by increasing
20 the robustness of the system. These types of projects will enable faster and
21 more efficient responses to economic development needs for additional
22 capacity, and will foster the building of transmission facilities in advance of
23 known loads to support load growth.

1 **Q. Please describe the Transmission Communications Infrastructure, Physical Security**
2 **Enabling and Cyber Security Projects that MAIT will undertake.**

3 A. The Transmission Communications Infrastructure, Physical Security Enabling and Cyber
4 Security Projects consist of targeted investments to upgrade legacy transmission network
5 communication equipment, improve the reliability and capability of critical transmission
6 communications (*e.g.*, SCADA equipment), enable increased physical security
7 automation, and provide increased cyber security protection for vital transmission assets.

8 Reliable transmission system operations depend on fully capable and reliable
9 communications systems. Risks to communications equipment include exposure to
10 system-wide events, growing security threats, rapid escalation of costs, and decreasing
11 reliability associated with leased line circuits and obsolescence. The projects in this
12 category will enhance the existing communications infrastructure to make it more
13 adaptable to changing demands in capacity, reliability, and/or security. The projects will
14 further reduce dependence on leased communication circuits, which are still used to
15 communicate to the SCADA equipment in many of the Operating Companies' more
16 critical substations, thereby reducing the likelihood of extended outages due to factors
17 outside the control of MAIT.

18 Typical projects in this area include:

19 (a) **Transmission Communications Infrastructure.** To support a further
20 integration of the transmission substation network, fiber optics and digital
21 microwave systems will be expanded whenever possible to key locations to
22 reduce dependence on third-party legacy communication services such as
23 leased two and four wire communication circuits. Since third-party legacy

1 communication services are quickly becoming obsolete and have degrading
2 reliability, they are being phased-out by telecommunications carriers. Remote
3 Terminal Units at selected transmission substations will be upgraded to the
4 latest technology standard in order to improve the reliability of this SCADA
5 equipment as well as to provide diversity (*i.e.*, redundancy) in the
6 communication path back to the FirstEnergy transmission control center via
7 the SCADA system.

8 (b) **Transmission Physical Security Enabling.** MAIT will extend high
9 bandwidth communications capability to equipment at critical sites enabling
10 substation equipment such as high-definition/infrared cameras and/or asset
11 health monitors to be viewed remotely.

12 (c) **Transmission Cyber Security.** MAIT will enhance the use of firewalls, data
13 encryption and monitoring/event correlation on multiple cyber systems using
14 advanced technologies for additional infrastructure modernization and to
15 eliminate/minimize vulnerabilities to ever evolving physical and cyber-
16 attacks.

17 **Q. How will Transmission Communications Infrastructure, Physical Security and**
18 **Cyber Security Projects benefit customers located in the Operating Companies**
19 **Zones?**

20 A. These projects will improve the reliability, security, and capability of the
21 communications systems that are required to monitor, control, and protect the
22 transmission system. The resulting increased bandwidth will enable future security
23 camera feeds at key locations to proactively identify possible physical attacks at critical

1 substations and deploy law enforcement before damage is done. Upgrading equipment,
2 as discussed above, will also reduce maintenance costs and save customers money
3 because it reduces overtime callouts for failed communications equipment as well as
4 repair costs. Modernizing the communications infrastructure will mitigate the increasing
5 frequency of failures.

6 **Q. Please describe the Physical Security Projects that MAIT will undertake.**

7 A. Physical Security Projects are being undertaken to maintain or enhance the physical
8 security of transmission assets. To proactively address safety (perimeter security),
9 copper theft, vandalism and other mischievous acts at substations, an increased level of
10 physical security is needed. Better situational awareness in the substation environment
11 requires integrated security management systems. Therefore, security technology will be
12 incorporated in substation design to deter, detect, delay, monitor, communicate and
13 respond to potential physical threats and vulnerabilities at a substation's perimeter taking
14 into account the history and sensitivity of the asset being protected.

15 Typical Physical Security Projects include:

16 (a) Upgrading or replacing chain-link fencing;

17 (b) Installing physical key locks;

18 (c) Installing motion or heat actuated camera systems that electronically alert and
19 monitor security personnel of the need for immediate response and
20 investigation;

21 (d) Installing video analytics cameras (thermal and high definition) at more
22 critical facilities;

23 (e) Utilizing technology advances such as card access systems; and

1 (f) Installing physical protection upgrades such as “no cut/no climb” perimeter
2 fencing, gate locking systems, latch monitoring hardware, and other protective
3 barriers.

4 **Q. How will MAIT’s investment in Physical Security Projects benefit customers located**
5 **in the Operating Companies’ Zones?**

6 A. In addition to enhancing reliability, Physical Security Projects will provide enhanced
7 situational awareness and alerting on potential threats to critical substation assets. This
8 program further safeguards the public from electrical hazards and deters criminal activity
9 with the presence of security systems. These security system investments enable faster
10 detection of events and implementation of measures to deter or slow attackers so that
11 impacts can be minimized or prevented by much quicker law enforcement response. The
12 formation of MAIT establishes a mechanism to encourage greater investment in the
13 transmission system, with the accompanying benefits that result from hardened physical
14 security protections and monitoring for those transmission assets. The goal is to establish
15 upgraded communications, which would enable greater use of technology for physical
16 security such as high-definition cameras that require higher bandwidth.

17 **Q. Can you please summarize the principal benefits of the proposed projects that**
18 **MAIT will undertake and which you have discussed in your testimony?**

19 A. Yes. The projects that will be undertaken include constructing new and upgrading
20 existing transmission lines and substations; enhancing the communications infrastructure;
21 and modernizing the transmission system including physical and cyber security
22 enhancements. As I explained in my testimony, the projects generally fall into one or
23 more of five categories and will have a direct beneficial impact on customer service.

1 System Condition Projects will serve to enhance system reliability. Some will
2 reduce the frequency and/or duration of customer outages (*i.e.*, improving customer
3 service). Others will reduce maintenance costs, increase safety, modernize the system or
4 address environmental concerns.

5 System Performance Projects will help to increase operational visibility into
6 system status and conditions (*i.e.*, improve situational awareness), which will enable
7 quicker analysis and response to system events. The addition of breakers or automatic
8 sectionalizing switches at tapped substations will provide reliability benefits to customers
9 by increasing the speed of system restoration and, more importantly, will reduce the
10 frequency and duration of outages (*i.e.*, improving customer service).

11 Operational Flexibility Projects will provide more flexibility and reliability with
12 both scheduled and unscheduled outages. They will also add load serving capability and
13 increase the system operating margin to better respond to future unexpected shifts in
14 generation and/or system loading through a more robust transmission system.

15 Transmission Communications Infrastructure, Physical Security Enabling and
16 Cyber Security Projects will improve the reliability, security, and capability of the
17 communications systems required to monitor, control, and protect the transmission
18 system. Such improvements will also help to reduce maintenance costs, overtime
19 callouts and the frequency of failures.

20 Physical Security Projects will both enhance reliability and situational awareness
21 by enabling earlier identification of potential threats to critical substation assets. This will
22 further safeguard the public from electrical hazards and deter criminal activity with the
23 presence of security systems through faster detection of events and quicker response

1 measures. These projects will also result in hardening of transmission system physical
2 security protections and monitoring for transmission assets.

3 **VI. OTHER BENEFITS**

4 **Q. What are MAIT's transmission capital investment plans?**

5 A. As explained by Mr. Staub (Joint Applicants' Statement No. 3), MAIT plans to invest in
6 its existing transmission infrastructure between \$ 2.5 to \$ 3.0 billion over the next five to
7 ten years.

8 **Q. Will the increased and accelerated levels of investment by MAIT create jobs in the**
9 **Met-Ed and Penelec Zones?**

10 A. Yes. The increased and accelerated levels of transmission investment that MAIT will
11 enable will benefit the economy of Pennsylvania by creating jobs and by supporting
12 vendors, suppliers and various service providers. Initial assessments of the additional
13 engineering, material management, project management and construction services to
14 implement the expanded EtF transmission program outlined above estimate the need for
15 over 200 jobs for qualified personnel in the states covered by the Operating Companies'
16 Zones.

17 **Q. Does this conclude your testimony?**

18 A. Yes, it does, at this time.

Biography

Jeffrey J. Mackauer

Director of Transmission Planning & Protection

Mr. Mackauer is Director of Transmission Planning & Protection at FirstEnergy Service Company, a direct, wholly-owned subsidiary of FirstEnergy Corp. (“FirstEnergy”), a position he has held since 2012. In this role, he oversees activities related to the development of projects for the ongoing planning and protection of the transmission systems of FirstEnergy’s transmission-owning entities, which include Pennsylvania Electric Company, Metropolitan Edison Company, and Jersey Central Power & Light Company. His group develops and maintains load flow, short circuit, and dynamic stability models and works with the PJM Interconnection, L.L.C. (“PJM”) staff to assess transmission system reliability needs. His group also ensures compliance of these activities with the North American Electric Reliability Corporation (“NERC”) and ReliabilityFirst Corporation (“RF”), for purposes of ensuring electric reliability under rules administered by the Federal Energy Regulatory Commission (“FERC”).

Prior to his current position, Mr. Mackauer was a General Manager/Manager of Transmission Planning at FirstEnergy from 2006 to 2012, the Manager of Transmission System Operations from 2004 to 2006, and a Manager/Consultant of the Energy Management System (“EMS”) from 2002 to 2004. From 1985 to 2001, he was employed by GPU, Inc. gaining experience in most areas of the EMS (including several years in Power Network Applications) working up to the position of Engineer Senior II. He was a Substation Relay Engineer at the City of Dover (Delaware) Electric Department in 1984. He started his career with the Florida Power and Light Company, from 1979 to 1983 as a field engineer in the System Protection group installing and maintaining protective relays.

Mr. Mackauer’s involvement in the industry has included, among other things: PJM committees (*i.e.* Planning, Transmission Expansion Advisory Committee and Operating); PJM sub-committees (*i.e.* System Information and Data Management); and ReliabilityFirst (*i.e.* Reliability Committee Vice Chair and Special Protection System review team). He served as Chapter Director for the Reading Chapter of the Pennsylvania Society of Professional Engineers and as Chairman of the Siemen’s Advanced Applications Working Group. He has had two articles published in the *Transmission & Distribution* magazine: “RTU Programmable Test Instrument Proves To Be Valuable And Versatile,” published in 1991, and “Integrated Substation Automation System Design,” published in 2000. He also co-authored a paper titled “The Dispatcher Training Simulator for Metropolitan Edison Company” in 1995.

Mr. Mackauer holds a Bachelor of Science degree in Electronics Engineering Technology from Missouri Institute of Technology. He has been a Registered Professional Engineer in the state of Pennsylvania since 1987.

Mr. Mackauer has prepared and presented testimony in the following regulatory proceedings:

I.	<u>REGULATORY AGENCY</u>	Docket No.
Pennsylvania Public Utility Commission		P-2008-2020257
FERC		ER15-303-000

**BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

JOINT APPLICATION OF MID-ATLANTIC INTERSTATE TRANSMISSION, LLC ("MAIT"); METROPOLITAN EDISON COMPANY ("MET-ED") AND PENNSYLVANIA ELECTRIC COMPANY ("PENELEC") FOR: (1) A CERTIFICATE OF PUBLIC CONVENIENCE UNDER 66 PA.C.S. §1102(A)(3) AUTHORIZING THE TRANSFER OF CERTAIN TRANSMISSION ASSETS FROM MET-ED AND PENELEC TO MAIT; (2) A CERTIFICATE OF PUBLIC CONVENIENCE CONFERRING UPON MAIT THE STATUS OF A PENNSYLVANIA PUBLIC UTILITY UNDER 66 PA.C.S. §102; AND (3) APPROVAL OF CERTAIN AFFILIATE INTEREST AGREEMENTS UNDER 66 PA.C.S. §2102

**MID-ATLANTIC INTERSTATE TRANSMISSION, LLC

TABLE OF CONTENTS

	Page
I. INTRODUCTION AND BACKGROUND	1
II. TRANSACTION AND FINANCIAL ASPECTS	3
III. BENEFITS OF THE FINANCIAL STRUCTURE OF A STAND-ALONE TRANSMISSION COMPANY	9
V. REGULATED MONEY POOL	16

1 I have over twenty years of professional experience in finance related-positions,
2 including fifteen years with the regulated utility industry. My educational
3 background and professional experience is more fully outlined in Appendix A.

4 **Q. Have you previously testified in proceedings before the Pennsylvania Public**
5 **Utility Commission (the “Commission”)?**

6 A. Yes, I testified in the most recent base rate case proceedings of Metropolitan
7 Edison Company (“Met-Ed”), Pennsylvania Electric Company (“Penelec”),
8 Pennsylvania Power Company, and West Penn Power Company, Docket Nos. R-
9 2014-2428745, R-2014-2428743, R-2014-2428744, and R-2014-2428742.

10 **Q. Would you describe the purpose of your testimony?**

11 A. The purpose of my testimony is to describe the financial aspects of the proposed
12 transaction (the “Transaction”) under which Met-Ed, Penelec, and Jersey Central
13 Power & Light Company (“JCP&L”) (collectively, the “Operating Companies”)
14 will contribute their transmission assets¹ (the “Transmission Facilities”),
15 excluding land and other real estate interests², to Mid-Atlantic Interstate
16 Transmission, LLC (“MAIT”), a newly-formed subsidiary of FirstEnergy
17 Transmission, LLC (“FET”), in which the Operating Companies will have
18 membership interests. I will describe the agreements that will facilitate the
19 Transaction and explain the Transaction’s benefits. Finally, I will address the

¹ “Transmission assets” are defined in the Capital Contribution Agreement (Exhibit No. KJT-1 accompanying Joint Applicants’ Statement No. 4, the direct testimony of K. Jon Taylor) (“Contribution Agreement”). The terms of the Contribution Agreement are explained in more detail in Mr. Taylor’s direct testimony.

² The related land and other real estate interests will be leased to MAIT under Ground Leases between each of the Operating Companies and MAIT, as discussed in Mr. Taylor’s testimony.

1 proposed inclusion of MAIT in the FirstEnergy Regulated Money Pool
2 Agreement.

3 **Q. Are you sponsoring any exhibits as part of this filing?**

4 A. Yes. Exhibit SRS-1 is an unexecuted copy of the proposed Amended and
5 Restated Limited Liability Company (“LLC”) Operating Agreement (the “LLC
6 Operating Agreement”) for MAIT, which will govern the activities of MAIT.
7 Exhibit SRS-2 is a chart showing corporate bond spreads, which I discuss later in
8 my testimony. Exhibit SRS-3 is a copy of the FirstEnergy Regulated Money Pool
9 Agreement in clean and blackline form, indicating the addition of MAIT.

10 **II. TRANSACTION AND FINANCIAL ASPECTS**

11 **Q. Please describe MAIT and its primary function.**

12 A. MAIT will be an LLC and a stand-alone transmission entity that will finance,
13 construct, and own new transmission projects located within the JCP&L, Penelec,
14 and Met-Ed transmission control zones within PJM Interconnection, L.L.C.
15 (“PJM”) and, upon the receipt of all necessary regulatory approvals, will also
16 own, operate, and maintain the transmission assets owned by the Operating
17 Companies as of the date of closing on the Transaction. All of the transmission
18 assets will be under the jurisdiction of the Federal Energy Regulatory
19 Commission (“FERC”).

20

1 **Q. Please describe the proposed Transaction between the Operating Companies,**
2 **FET, and MAIT.**

3 A. Upon receipt of all necessary regulatory approvals, the Operating Companies,
4 FET, and MAIT will enter into the LLC Operating Agreement and the
5 Contribution Agreement. The LLC Operating Agreement sets forth the rights,
6 powers and interests of FET and the Operating Companies in MAIT. Thus, the
7 LLC Operating Agreement is comparable to a partnership agreement for a
8 partnership or the articles of incorporation and by-laws for a corporation.
9 Additionally, as explained by Mr. Taylor (Joint Applicants' Statement No. 4),
10 pursuant to the Contribution Agreement, FET will provide cash to MAIT in
11 exchange for Class A membership interests in MAIT, and the Operating
12 Companies will contribute the Transmission Facilities in return for Class B
13 membership interests. As a result of the Transaction, the Operating Companies
14 will no longer own any transmission assets as defined under Exhibit A of the
15 Contribution Agreement (Exhibit KJT-1, Joint Applicants' Statement No. 4) but
16 will continue to own and operate all distribution facilities they presently own and
17 provide retail electric service within their existing service territories as they do
18 today.

19 **Q. What are the differences between Class A and Class B membership**
20 **interests?**

21 A. Under the LLC Operating Agreement, Class A membership interests will provide
22 FET operating control and management of MAIT. The Class B membership
23 interests that the Operating Companies will receive do not confer operating

1 control and management authority over MAIT. However, as set forth in Section
2 3.2 of the LLC Operating Agreement, the Operating Companies will maintain
3 voting rights over “special matters,” which include decisions pertaining to
4 bankruptcy, mergers, any sale of substantially all assets of MAIT and amendment
5 of the LLC Operating Agreement.

6
7 **Q. At the close of the Transaction, what will be the approximate ownership**
8 **interests in MAIT of each of the Operating Companies and FET?**

9 A. The Operating Companies’ initial Class B ownership interests collectively will
10 amount to approximately 95% of MAIT’s total equity, as reflected on the
11 Operating Companies’ respective capital accounts maintained by MAIT. Based
12 on data as of December 31, 2014, JCP&L’s investment will be approximately
13 54.8%; Met-Ed’s investment will be approximately 17%; and Penelec’s
14 investment will be approximately 23.2%. These estimates are preliminary and
15 subject to change based on the actual transfer date. FET’s Class A membership
16 interest will represent initially approximately 5% of MAIT’s total equity as
17 reflected in FET’s capital account maintained by MAIT.

18 **Q. Will the Operating Companies be subject to a continuing obligation to**
19 **contribute cash or other assets to MAIT?**

20 A. No. The Transaction requires the Operating Companies to make a one-time
21 contribution of transmission assets to MAIT. The Operating Companies will have
22 no continuing obligation to contribute equity to MAIT after this initial
23 contribution occurs.

1 **Q. Will the amount of Met-Ed's and Penelec's investment in MAIT increase**
2 **over time?**

3 A. No. MAIT will dividend all of its earnings to its investors in proportion to each
4 investor's contributed capital. Therefore, the amount of the Operating
5 Companies' investment in MAIT will not increase because MAIT will not retain
6 any of its earnings.

7 **Q. How will MAIT's earnings be distributed?**

8 A. MAIT will pay dividends at regular intervals to the Operating Companies and
9 FET, in proportion to each of their contributed capital. The dividends that the
10 Operating Companies receive will be available for all of their corporate purposes,
11 including investment in distribution plant, as they determine appropriate.

12 **Q. How do you expect to account for the future earnings and dividends of**
13 **MAIT?**

14 A. Earnings and dividends generated by MAIT will be allocated to FET and the
15 Operating Companies based on each entity's respective contributed capital to
16 MAIT at the time earnings are recorded and distributions are made. Separate
17 capital accounts will be maintained on MAIT's books for FET's Class A
18 membership interest and each of the Operating Companies' Class B membership
19 interest.

20 **Q. Do the Operating Companies and MAIT anticipate issuing debt as part of**
21 **the Transaction?**

1 A. No. Neither the Operating Companies nor MAIT will need to issue debt in order
2 to effectuate the terms of the Transaction.

3 **Q. Will the Operating Companies transfer debt to MAIT as part of the**
4 **Transaction?**

5 A. No. The Operating Companies do not attribute corporate debt to specific asset
6 classes, and the Operating Companies will not transfer any existing debt to MAIT
7 as part of the Transaction.

8 **Q. Will MAIT have a relationship with other FirstEnergy companies?**

9 A. Yes. As explained in the direct testimony of Charles V. Fullem and Mr. Taylor
10 (Joint Applicants' Statement Nos. 1 and 4, respectively), MAIT will be an
11 indirect, wholly-owned subsidiary of FirstEnergy and an affiliate of FESC, a
12 direct subsidiary of FirstEnergy. Similar to FET and the Operating Companies
13 (as well as the other FirstEnergy subsidiaries), MAIT will become a signatory to
14 the existing FirstEnergy Service Agreement, under which FESC will provide
15 corporate services to MAIT and other centralized services (including
16 transmission-related services). While MAIT will have a Board of Managers and
17 officers, it will not have any employees of its own. MAIT also will be a party to
18 the Revised Amended and Restated Mutual Assistance Agreement, which will
19 permit employees of the Operating Companies to provide services to MAIT.

20 **Q. How will MAIT's day-to-day operations and future transmission growth be**
21 **financed?**

1 A. As part of this proceeding, the Operating Companies are proposing that MAIT be
2 a member of FirstEnergy's regulated money pool. In addition, subject to
3 obtaining the necessary regulatory approvals, MAIT is expected to have short-
4 term borrowing capability under FET's current \$1 billion credit facility. These
5 two sources of funds should provide MAIT with sufficient liquidity for day-to-
6 day operations. Growth in transmission assets will be financed by a combination
7 of FET contributions of equity and issuances of debt by MAIT, which debt
8 issuances will be subject to obtaining the necessary regulatory approvals.

9 **Q. Does MAIT plan to issue long-term debt securities? If so, when?**

10 A. Yes, once it is formed and operating, MAIT will issue long-term debt securities.
11 The timeframe for MAIT's initial sale of long-term debt securities has not been
12 determined yet. After the Commission approves MAIT's request to be designated
13 a Pennsylvania public utility, MAIT will file an abbreviated securities certificate
14 with the Commission for authority to issue long-term debt.

15 **Q. Will MAIT's debt be guaranteed by the Operating Companies and FET?**

16 A. No. The Operating Companies and FET will not provide guarantees for MAIT's
17 debt.

18 **Q. How will this Transaction affect the capital structure of the Operating**
19 **Companies?**

20 A. The capital structure of each Operating Company will remain unchanged as a
21 result of the Transaction when the Transmission Facilities are transferred to
22 MAIT. Rather than recording their investment in transmission plant accounts,
23 each Operating Company will record an amount of investment in a unique asset

1 account equivalent to the amount of transmission assets (including goodwill and
2 transmission-related regulatory assets and net of accumulated deferred income
3 taxes) contributed to MAIT. Thus, the total amount of overall investment of each
4 Operating Company does not change once the transfer is complete. This
5 accounting approach is explained in more detail in the direct testimony of Mr.
6 Taylor.

7 **Q. Which entity will control the operations and management of MAIT?**

8 A. FET, due to its Class A membership interest, will appoint the Board of Managers
9 which will control the day-to-day operation and management of MAIT. Under
10 the terms of the LLC Operating Agreement, the Operating Companies will be
11 granted Class B ownership interests. The Class B ownership interests relative to
12 MAIT operations include consent rights with respect to major corporate matters,
13 such as mergers, acquisitions, and bankruptcy

14 **Q. Will any of MAIT's affiliates have the ability to control the manner in which**
15 **transmission services are provided?**

16 A. No. MAIT will provide transmission services to customers in accordance with
17 the terms of the PJM Open Access Transmission Tariff ("OATT"), which is the
18 same manner in which services are provided today by the Operating Companies.

19 **III. BENEFITS OF THE FINANCIAL STRUCTURE OF A STAND-**
20 **ALONE TRANSMISSION COMPANY**

21 **Q. Please address the structural and financial benefits of forming MAIT and**
22 **completing the Transaction as the Joint Applicants propose.**

1 A. The generation, transmission and distribution functions of FirstEnergy are already
2 operated and managed as separate business units with differing levels of oversight
3 by Federal and state regulators. Thus, the creation of a separate transmission
4 company better aligns FirstEnergy's corporate structure with the *de facto*
5 operational structure and labor resources provided by the Operating Companies.
6 The structural separation of these functions establishes a clear delineation of
7 responsibility and accountability for each business unit. Because each business
8 segment is separately financed and managed, this realignment will allow each
9 business head to focus on delivering operational excellence for its respective
10 business unit without intra-company competition for resources between
11 transmission and distribution interests. Additionally, the proposed realignment
12 complements the current financial reporting structure, which is already function-
13 based. This proposal with respect to the Operating Companies and MAIT is
14 similar to the approach FirstEnergy has already implemented by transferred
15 transmission assets from its Ohio utilities and one of its Pennsylvania utilities
16 (Pennsylvania Power Company) to ATSI, as explained in more detail in the direct
17 testimony of Mr. Taylor (Joint Applicants' Statement No. 4).

18 From a financial perspective, in addition to allowing the creation of a
19 separate transmission business without adverse tax consequences, the Transaction
20 will improve FirstEnergy's financial strength and flexibility with respect to
21 transmission development in the region. The credit agencies also have
22 consistently expressed a preference for the separate transmission company
23 business model. FirstEnergy's proposal to restructure ownership of all

1 transmission assets within the Met-Ed, Penelec, and JCP&L transmission control
2 zones within PJM to achieve a more modern, efficient division of assets reflects
3 this favored approach.

4 **Q. Please describe the transmission needs and challenges in the service**
5 **territories of the Operating Companies that will benefit from the creation of**
6 **MAIT.**

7 A. There is a significant need for new transmission investment in the Met-Ed,
8 Penelec, and JCP&L transmission control zones in the next few years. Based on a
9 preliminary assessment, increased transmission system capital investments in the
10 Met-Ed, Penelec, and JCP&L transmission control zones within PJM are needed
11 that could total \$2.5 to 3 billion over the next five to ten years. Jeffrey J.
12 Mackauer (Joint Applicants' Statement No. 2) discusses the specific categories of
13 projects that MAIT will undertake and how those projects will benefit customers
14 from an operational perspective.

15 Because of the levels of investment that will be needed to enhance the
16 transmission grid, I believe it will be increasingly challenging for utilities that
17 have the obligation to meet the service requirements of retail electric distribution
18 customers to implement sustained transmission expansion and enhancement
19 initiatives while maintaining investment grade credit metrics to support an
20 adequate supply of investor capital. Separate transmission-only focused
21 companies offer several advantages, which enables overall lower costs for
22 customers:

1 **Reduced Cost of Capital.** As Mr. Fullem explains, a transmission-only company
2 improves transparency for investors. In my experience, investors perceive the
3 transmission-only model as straightforward and easy to assess for investment
4 purposes, which can reduce perceived investor risk and improve the overall credit
5 profile of the business. For example, Trans-Allegheny Interstate Line Company
6 (“TrAILCo”), a direct, wholly-owned subsidiary of FET and a transmission-only
7 utility, has a current senior unsecured credit rating of A3, as assigned by
8 Moody’s, which is two notches above the Penelec’s current credit ratings of Baa2
9 and one notch above Med-Ed’s rating of Baa1. Moody’s derives a credit profile
10 for each company under the same holding company umbrella by taking into
11 consideration the potential of parent intervention, both positive and negative.
12 Standard & Poor’s (“S&P”), on the other hand, employs a group approach that
13 assigns the same corporate credit rating to all members of a corporate holding
14 company system, which, for FirstEnergy, is currently BBB-. However, S&P
15 provides a pure stand-alone credit profile for each member of the group as well.
16 TrAILCo’s stand-alone S&P credit profile of AA is at least three notches above
17 that of the Operating Companies.

18 Exhibit SRS-2 shows the average spreads of corporate bond yields over
19 U.S. Treasury yields for three different credit ratings assigned by S&P, beginning
20 in January 2013. This exhibit shows that higher credit ratings generally translate
21 into a lower cost of capital, which is a direct benefit to customers of regulated
22 utilities. The four data points shown as red squares (labeled 1, 2, 3 & 4) reflect
23 the actual spread of the yields on bonds issued by the Operating Companies and

1 by TrAILCo relative to the average spread of all corporate bonds issued with the
2 specific credit ratings shown on the chart. The data show that the spread for two
3 of the three Operating Companies that are rated Baa2 by Moody's is nearly
4 identical to the basis point spread for S&P's BBB rated bonds. Not surprisingly,
5 TrAILCo's debt at the time of issuance priced 30 basis points lower than the
6 average spread for all BBB (S&P) bonds.

7 To further illustrate the effects of credit quality on price, the exhibit shows
8 six additional data points. The three data points shown as green circles (labeled 5,
9 6 and 7) reflect the actual spread of the yields on bonds issued by ITC Midwest
10 LLC, ITC Great Plains LLC and Michigan Electric Transmission Company, LLC,
11 all transmission-only utilities and wholly owned subsidiaries of ITC Holdings
12 Corp, the nation's largest independent electric transmission company. The three
13 data points shown as orange triangles (labeled 8, 9 & 10) reflect the actual spread
14 of the yields on bonds issued by American Transmission Company, a privately
15 owned transmission-only company. As can be seen all six issuances have a
16 Moody's credit rating of A1, and, not surprisingly, are priced significantly lower
17 than the spread for Moody's Baa2 & A3 bonds shown on the exhibit.

18 Since MAIT's structure with formulaic cost recovery will be similar to
19 TrAILCo, I would expect MAIT to have at least a 30 basis point price advantage
20 over the Operating Companies. From a financing perspective, this 30 basis point
21 differential in debt borrowing rates when applied to \$1.5 billion of debt-financed
22 rate base can result in \$135 million of savings to customers over a 30 year asset
23 life.

1 I believe this estimated 30 basis point differential is conservative because
2 it does not take into account the cost savings available from making larger
3 issuances, which will be enabled by the contribution of the three Operating
4 Companies' transmission assets to MAIT. Specifically, it is less cost-efficient to
5 make three separate debt issuances by each of the Operating Companies than a
6 single issuance by MAIT. Three issuances, each of which is smaller than a single
7 MAIT issuance, may require the issuers to make liquidity concessions that
8 increase borrowing costs. For example, Exhibit SRS-2 shows two separate
9 issuances of senior notes in the amounts of \$250 million and \$200 million, by
10 Met-Ed and Penelec, respectively, which occurred on the same day in June 2014.
11 Even though both Companies had the same credit rating at the time of those
12 issuances, Penelec's senior notes priced 15 basis points higher than Met-Ed's.
13 The investment bankers' assessment of this spread differential, indicates that the
14 smaller size of Penelec's issuance was the likely cause of that differential.
15 Generally, investors view \$250 million as the minimum size of an issuance
16 necessary to provide minimally desired levels of liquidity. Liquidity is a measure
17 of how quickly securities can be bought or sold and is especially important for the
18 syndicate of banks that underwrite the bonds and take on the risk of distributing
19 the securities in a secondary market. The greater the liquidity, the lower the risk
20 and the price. Thus, if the debt needed for transmission operations can be offered
21 in a single issuance, the minimum issuance size necessary to avoid or minimize
22 liquidity concessions can be more readily achieved.

1 Furthermore, separate transmission companies, with a singular focus on the
2 transmission function, coupled with the transparent, formula-based cost recovery
3 mechanism authorized by FERC for transmission service, are an attractive
4 investment for a wider spectrum of investors and, therefore, provide added
5 flexibility in raising equity capital through multiple avenues, whether public or
6 private, at lower cost.

7 **Efficiency.** MAIT will be a much larger transmission owner than any of the
8 Operating Companies would ever be individually. Because MAIT would be a
9 larger company with a larger asset pool, it would be better equipped from a
10 financial perspective to secure the debt required to make substantial investments
11 in the transmission system on reasonable terms. Rather than issuing debt at each
12 of the Operating Companies for needed investment, the debt only needs to be
13 issued at the MAIT level. This makes the process more cost effective, efficient
14 and less time consuming.

15 **Reduced Competition for Capital.** Investment by each of the Operating
16 Companies in transmission competes with other necessary investments and can be
17 deferred in favor of more immediate investments in distribution facilities.
18 Without such competing interests, MAIT will be able to pursue investment in
19 necessary transmission facilities on which a reasonable return can be earned while
20 enhancing service to customers as explained by Mr. Mackauer.

21 Furthermore, MAIT's operational flexibility and access to capital will
22 provide greater flexibility to respond promptly, efficiently, and cost-effectively to

1 PJM and North American Electric Reliability Corporation (“NERC”) reliability
2 requirements. This is especially important because, under the existing structure
3 where the Operating Companies own the transmission assets, PJM requirements
4 to construct new transmission projects commit a significant portion of the
5 Operating Companies’ available capital to such projects, which is then
6 unavailable for distribution system investment. Consequently, the capital
7 demands of more transmission projects could limit the amount of available capital
8 for needed distribution plant investments, and the associated increase in debt
9 burden could adversely affect the financial condition and credit profiles of the
10 Operating Companies.

11 Because MAIT will issue debt in its own name without a guarantee from the
12 Operating Companies, any debt incurred by MAIT to finance new transmission
13 will not affect the financial condition and credit ratings of the Operating
14 Companies. This will allow the Operating Companies to have greater control
15 over their annual expenditures dedicated to the distribution business and similarly
16 reduce the range of business lines that must be evaluated for purposes of assessing
17 risks by investors. Hence, the migration to a transmission-only model not only
18 better supports the sustained level of transmission investment needed at MAIT,
19 but at the same time preserves the Operating Companies’ capacity to issue debt
20 for their own distribution system needs.

21

1 **Q. Will the formation of MAIT impact the Operating Companies' credit**
2 **ratings?**

3 A. The formation of MAIT is not expected to impact the credit ratings of the
4 Operating Companies. Since each Operating Company will be an equity investor
5 in MAIT, the Operating Company will be receiving a dividend for its investment
6 that will be equivalent to the earnings that it would have realized prior to the
7 transfer of transmission assets.

8 **IV. REGULATED MONEY POOL**

9 **Q. Will MAIT be a member of FirstEnergy's regulated money pool?**

10 A. As part of this filing, the Operating Companies are requesting approval for MAIT
11 to become a member of FirstEnergy's regulated money pool. A copy of the
12 current money pool agreement approved by the Commission, with the addition of
13 MAIT, and a blackline to the current version showing this addition, is included as
14 Exhibit SRS-3.³

15 As I explained, MAIT's credit rating is expected to be higher than the ratings of
16 the Operating Companies, therefore, there will be no adverse effects of adding
17 MAIT to the FirstEnergy regulated money pool.

18

³ The references to AYE Utilities and AYE Service are no longer necessary as AYE Service no longer serves as an administrator of the Money Pool on behalf of West Penn Power Company, Monongahela Power Company and Potomac Edison Company. In addition, those utilities are now direct subsidiaries of FirstEnergy.

1 **Q. Will MAIT have access to other short term borrowings besides the**
2 **FirstEnergy regulated money pool?**

3 A. Yes. As I explained earlier, I expect that, upon obtaining the necessary regulatory
4 authorization, MAIT will have short term borrowing capability under FET's
5 current one billion dollar credit facility. This facility, together with the regulated
6 money pool, should provide MAIT with sufficient liquidity needed for day to day
7 operations.

8 **Q. Does this conclude your direct testimony?**

9 A. Yes, it does at this time.

Educational Background and Professional Experience of Steven R. Staub

Education:

1993 Bachelor of Science Degree in Business/Accounting and Political Science – University of Pittsburgh
1997 Masters of Business Administration Degree – University of Pittsburgh
2007 Master of Taxation – Robert Morris University

Experience:

4/94 – 2/98	Finance-related positions in the corporate banking, capital markets, and securities lending divisions – Mellon Bank
2/98 – 8/99	Senior Finance Analyst – Ford Motor Company
8/99 – 9/02	Senior Financial Consultant – Duquesne Light Company

AMENDED AND RESTATED
LIMITED LIABILITY COMPANY OPERATING AGREEMENT
OF
MID-ATLANTIC INTERSTATE TRANSMISSION, LLC

THIS AMENDED AND RESTATED LIMITED LIABILITY COMPANY AGREEMENT (this “*Agreement*”) of Mid-Atlantic Interstate Transmission, LLC, a Delaware limited liability company (the “*Company*”), is made and is dated [DATE] by FirstEnergy Transmission, LLC, a Delaware limited liability company (“*FET*”), Jersey Central Power & Light Company, a New Jersey corporation (“*JCP&L*”), Pennsylvania Electric Company, a Pennsylvania corporation (“*PN*”) and Metropolitan Edison Company, a Pennsylvania corporation (“*ME*”, together with FET, JCP&L and PN, the “*Initial Members*” and individually, each a “*Initial Member*”). Unless the context otherwise requires, terms that are capitalized and not otherwise defined in context have the meanings set forth or cross-referenced in Article 2.

WHEREAS, FET has caused to be filed a Certificate of Formation of the Company with the Secretary of State of Delaware (the “*Secretary of State*”) to form the Company under and pursuant to the Law (as herein defined) on June 10, 2015 (the “*Formation Date*”);

WHEREAS, in connection with such formation, FET has entered into a Limited Liability Company Agreement of the Company dated as of June 10, 2015 (the “*Original LLC Agreement*”);

WHEREAS, pursuant to a contribution agreement between the Company and the Initial Members (the “*Contribution Agreement*”) dated as of the date hereof (the “*Contribution Date*”), each of the Initial Members contributed certain assets and/or cash in exchange for Interests in the Company; and

WHEREAS, in accordance with the Law, FET desires to enter into this Agreement with the other Initial Members to amend and restate the Original LLC Agreement in its entirety and to set forth the respective rights, powers and interests of the Initial Members with respect to the Company and their respective Interests therein and to provide for the management of the business and operations of the Company.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained and other good and valuable consideration, the receipt, adequacy and sufficiency of which are hereby acknowledged, FET and the other Members, intending to be legally bound, hereby agree to amend and restate the Original LLC Agreement in its entirety as follows:

Article 1. Organization

1.1 Formation of the Company; Term. The Company is a limited liability company under the Law and is governed by this Agreement. The Company is an entity separate

from the Members and the Managers (as defined below), created by the execution and filing of the certificate of formation of the Company with the Secretary of State of the State of Delaware. Unless sooner dissolved and liquidated by action of the Members and the Managers, the Company is to continue in perpetuity.

1.2 Name. The name of the Company is: “Mid-Atlantic Interstate Transmission, LLC.”

1.3 Purpose of the Company; Business. The purpose of the Company is to engage in any lawful act or activity for which a limited liability company may be formed within the State of Delaware, including, but not limited, to (a) design, engineer, site, acquire rights-of-way for, procure, permit, construct, commission, finance, own, operate and maintain certain transmission and interconnection facilities in the PJM Region; and (b) engage in any and all lawful activities directly or indirectly relating thereto, including incurring and guaranteeing indebtedness related to such activities.

1.4 Registered Office; Registered Agent. The registered office of the Company shall be the office of the initial registered agent named in the Certificate of Formation or such other office (which need not be a place of business of the Company) as the Board (as defined below) may designate from time to time in the manner provided by the Law. The registered agent for service of process on the Company in the State of Delaware shall be the initial registered agent named in the Certificate of Formation or such other Person or Persons as the Board may designate from time to time in the manner provided by the Law.

1.5 Principal Place of Business. The principal place of business and mailing address of the Company is [ADDRESS]. The Company may also have offices at such other locations as the business of the Company may require. From time to time, the Board may change the principal place of business of the Company without reflecting the change in this Agreement.

Article 2. Definitions

“*Affiliate*” of any Person means any other Person that, directly or indirectly, controls, is controlled by or is under common control with such Person.

“*Class*” means a specific group of Members owning an Interest in the Company having certain specific rights, powers, and duties as provided for under this Agreement.

“*Class A Interest*” means an Interest in the Company designated as a Class A Interest.

“*Class B Interest*” means an Interest in the Company designated as a Class B Interest.

“*Code*” means the United States Internal Revenue Code of 1986, as amended, and the United States Treasury Regulations promulgated thereunder.

“**FirstEnergy**” means FirstEnergy Corp., an Ohio corporation, and the parent of the Initial Members.

“**Fiscal Year**” means the fiscal year of the Company for accounting and tax purposes, which shall begin on January 1 and end December 31 of each year or such other date as the Board shall determine from time to time, except for the short taxable years in the years of the Company’s formation and termination and as otherwise required by the Code.

“**Interest**” means any interest in the Company held by any Member, including the Class A Interests and the Class B Interests.

“**Law**” means the Delaware Limited Liability Company Act (6 Del. C. § 18-101, et seq.), as amended from time to time. Any reference to the Law automatically includes a reference to any subsequent or successor limited liability company law in the State of Delaware.

“**Member**” means (a) each Initial Member; and (b) and each Person who is hereafter admitted as a Member in accordance with the terms of this Agreement and the Law, in each case so long as such Person is shown on the Company's books and records as the owner of any Interest. The Members shall constitute the "members" (as that term is defined in the Law) of the Company.

“**Person**” or “person” means any natural person and any corporation, firm, partnership, trust, estate, limited liability company or other entity resulting from any form of association.

“**PJM**” means PJM Interconnection, L.L.C., a regional transmission organization, or any successor entity.

“**PJM Region**” means the aggregate of the transmission control zones within the PJM geographic footprint.

Article 3. Capitalization; Economics

3.1 Authorized Interests. The Company shall be authorized to issue different classes of Interests, initially consisting of Class A Interests and Class B Interests. Except for the voting rights as set forth in Section 3.2, Class A Interests and Class B Interests shall have the same rights, preferences, privileges and obligations under this Agreement. The Board shall have the right to create additional classes of Interests from time to time; provided, this Agreement shall be amended by the Board to reflect the rights, preferences privileges and obligations of any such new Interests, subject to approval by the Members as set forth in Section 3.2.

3.2 Voting Rights. (a) In General. Except as otherwise required by applicable law, no Member shall have any voting rights except as otherwise expressly set forth in this Agreement.

(b) Management Control. Each Member holding Class A Interests shall have the sole authority to elect and remove the Managers and determine the size of the Board.

(c) Special Matters. Members holding Class A Interests or Class B Interests shall have equal voting rights with respect to the special matters delineated below. Without the prior written consent of the majority of the voting rights of the Members holding Class A Interests and Class B Interests, voting together as a class, the Company shall not: (a) voluntarily initiate any liquidation, dissolution or winding up of the Company or permit the commencement of a proceeding for bankruptcy, insolvency, receivership or similar action against the Company; (b) sell, dispose of (whether by merger, sale of equity, recapitalization or otherwise) the Company or substantially all of the assets of the Company; and (c) amend, modify or waive any provision of this Agreement.

3.3 Capital. (a) Initial Capital Contributions. Contemporaneously with the execution of this Agreement and as set forth in the Contribution Agreement, each Initial Member has contributed certain assets and/or cash in exchange for Interests in the Company, as set forth opposite such Initial Member's name in Exhibit A hereto.

(b) Additional Capital Contributions. No Member shall be required to make additional capital contributions to the Company. Any additional capital contributions made by any Member shall only be made with the consent of the Board. The Company is to finance its operations independently of the Members and without the Members' financial support. The provisions of this Section 3.3(b) are intended solely to benefit the Members and, to the fullest extent permitted by law, shall not be construed as conferring any benefit upon any creditor of the Company other than the Members (and no such creditor of the Company shall be a third party beneficiary of this Agreement). The Members shall not have a duty or obligation to any creditor of the Company to make any contribution to the Company or to issue any call for capital pursuant to this Section 3.3(b).

3.4 Capital Accounts. The Company shall maintain a capital account for each Member in accordance with this Section 3.4 and, to the extent the Company is treated as a partnership for federal income tax purposes, the capital accounts shall be maintained in accordance with the rules of United States Treasury Regulations Section 1.704-1(b)(2)(iv) promulgated under the Code. Each Member's capital account shall have an initial balance equal to the amount of cash or the net book value of the assets representing such Member's initial contribution to the capital of the Company, in each case, as set forth in Exhibit A hereto. Each Member's capital account shall be increased by the sum of (a) the amount of cash constituting additional contributions, if any, by such Member to the capital of the Company made in accordance with Section 3.3(b), and (b) any profits allocated to such Member's capital account pursuant to Section 3.5(a). Each Member's capital account shall be reduced (i) with respect to Members holding Class A Interests, by the sum of (1) the amount of cash and the higher of net book value and fair market value of any property distributed by the Company to such Member holding Class A Interests, and (2) any losses allocated to the capital account of such Member holding Class A Interests pursuant to Section 3.5(a) and (ii) with respect to Members holding Class B Interests, by the sum of (1) the amount of cash and the net book value of any property distributed by the Company to such Member holding Class B Interests, and (2) any losses allocated to the capital account of such Member holding Class B Interests pursuant to Section 3.5(a).

3.5 Allocation of Profits and Losses. (a) Book Allocations: The Company's profits and losses shall be allocated to the Members from time to time pro rata in accordance with each Member's capital account balance.

(b) Tax Allocations: In the event the Company is treated as a partnership for federal income tax purposes, each Member's distributive share of income, gain, loss, deduction, or credit (or item thereof) shall be determined and allocated in accordance with Section 3.5(a) to the fullest extent permitted by Sections 704(b) and (c) of the Code. Likewise, as applicable for federal income tax purposes, any special allocations described in Section 3.5(c) will be made in accordance with Section 704 of the Code.

(c) Special Book Allocations.

(i) Qualified Income Offset. If any Member unexpectedly receives any adjustment, allocation or distribution described in Treasury Regulations Sections 1.704-1(b)(2)(ii)(d)(4), (5) or (6) and such adjustment, allocation or distribution causes or increases a deficit in such Member's capital account (a "*Deficit*"), items of gross income and gain for such Fiscal Year and each subsequent Fiscal Year shall be specifically allocated to such Member in an amount and manner sufficient to eliminate, to the extent required by the Treasury Regulations, the Deficit of such Member as quickly as possible; provided that an allocation pursuant to this Section 3.5(c) shall be made only if (and only to the extent that) such Member would have a Deficit after all other allocations provided for in this Section 3.5 have been tentatively made as if this Section 3.5(c)(i) were not in this Agreement. This Section 3.5(c) is intended to comply with the qualified income offset provision of Treasury Regulations Section 1.704-1(b)(2)(ii)(d) and shall be interpreted in a manner consistent therewith.

(ii) Other Special Allocations. Special allocations shall be made in accordance with the requirements set forth in the Treasury Regulations Sections 1.704-2(f), (g) and (j) (minimum gain chargeback), 1.704-2(g)(1) and (i)(5) (gross income allocation), 1.704-2(i)(2) (nonrecourse deductions), and to the extent that a Section 754 election is in effect, 1.704-1(b)(2)(iv)(m) (Section 754 adjustments).

(iii) Restorative Allocations. Any special allocations of items of income, gain, loss or deduction pursuant to this Section 3.5(c) shall be taken into account in computing subsequent allocations pursuant to this Agreement, so that the net amount for any item so allocated and all other items allocated to each Member pursuant to this Agreement shall be equal, to the extent possible, to the net amount that would have been allocated to each Member pursuant to the provisions of this Agreement if such special allocations had not occurred.

3.6 Distributions. (a) The Members shall not be entitled to interest on their capital contributions to the Company or have the right to distributions or the return of any contribution to the capital of the Company, except for distributions in accordance with this Section 3.6 or upon dissolution and liquidation of the Company in accordance with Sections 7.1 and 7.2. To the fullest extent permitted by the Law, the Members shall not be liable for the return of any such amounts. Notwithstanding any provision in this Agreement to the contrary,

the Company shall not make a distribution to the Members on account of their respective Interests in the Company if such distribution would violate the Law or other applicable law.

(b) Distributions shall be made in cash to the Members of each Class pro rata in accordance with each Member's capital account balance, at the times and in the aggregate amounts determined by the Board.

3.7 Tax Matters. (a) Tax Classification. On the Formation Date, the Company was formed as a domestic limited liability company with a single Member, FET. On the Formation Date, the Company's default classification for federal income tax purposes was a disregarded entity, meaning that it was not treated as an entity separate from its owner for federal income tax purposes. As of the Contribution Date, the Company will have multiple Members. The default classification of a multiple owner limited liability company for federal income tax purposes is a partnership. However, the Members acknowledge that the Board has sole authority to cause the Company at any time (prior to, on, or after the Contribution Date) to make an election to be treated as a corporation for federal income tax purposes by filing IRS Form 8832. If the Company makes such an election, the Company will be treated as a corporation for federal income tax purposes regardless of the Company's classification under the Law or for accounting purposes. If the Company is treated as a corporation for federal income tax purposes, it will be included in the FirstEnergy consolidated federal income tax group and will compute its federal taxable income accordingly, and will participate as a member of the FirstEnergy tax allocation agreement. The Members acknowledge that the Board has sole authority to determine the Company's federal income tax classification and change such tax classification in accordance with the Code. The Members hereby agree to take any measures necessary (or, if applicable, refrain from any action) to ensure that the Company is treated in accordance with the applicable federal income tax classification deemed appropriate by the Board. The Board also shall cause the Company to make any elections under the Code and other relevant tax laws as to the treatment of items of the Company's income, gain, loss, deduction, and credit, and as to all other relevant matters, as it deems necessary or appropriate.

(b) Books and Records. Proper and complete records and books of account of the business of the Company required to be maintained by applicable law, including, but not limited to, the capital account of each Member, shall be maintained at the Company's principal place of business. Each Member and its duly authorized representatives may, for any reason reasonably related to its Interest as a Member of the Company, examine the Company's books of account and make copies and extracts therefrom at its own expense. The records of the Company shall be maintained for five years following termination of the Company or as otherwise required by applicable law. For any Fiscal Year in which the Company is treated as a partnership for federal income tax purposes, as soon as reasonably practicable after the end of such Fiscal Year, the Board shall cause the Company to prepare and send to each Member a statement of the amount of such Member's share in the Company's taxable income or loss for each year and information relating to the nature thereof, in sufficient detail to enable it to prepare its United States federal, state and other tax returns including, but not limited to, Internal Revenue Service Schedule "K-1," or any successor thereto. For any Fiscal Year in which the Company is treated as a partnership for federal income tax purposes, FET is specifically authorized to act as a "tax matters partner" under the Code and in any similar capacity under any law.

Article 4. Management

4.1 Board of Managers. (a) The Company shall be managed by a board of managers (the “*Board*”) initially composed of [NUMBER] managers (each a “*Manager*” and collectively, the “*Managers*”). The initial Managers appointed by the Members holding Class A Interests are [MANAGERS LIST]. From time to time, the Members holding Class A Interests may elect additional Managers to serve on the Board.

(b) Each Manager is to serve until the earlier of his or her death, resignation or removal. Members holding Class A Interests may remove or replace a Manager at any time. Any Manager may resign at any time by delivering his or her written resignation to the Members holding Class A Interests.

4.2 Authority of the Board. (a) Except as specifically reserved to the Members in this Agreement or as provided by applicable law, the Board has all power and authority to manage, and to direct the management of, the business and affairs of the Company in the ordinary course of its business consistent with the Law. Approval by or action taken by the Board in accordance with this Agreement is the approval or action of the Company and is binding on each Member, Manager and the Company.

(b) The Board may delegate to the officers, other employees and agents of the Company the authority to conduct the business of the Company in the ordinary course, in accordance with this Agreement and any policy of delegation which may be adopted and revised from time to time by the Board. Any power not delegated by the Board remains with the Board.

4.3 Notice of Board Meetings. Regular meetings of the Board may be held at such times and places as may be fixed by the Board. Special meetings of the Board may be called by the president (if appointed), by the secretary (if appointed), or by any Manager. Notice of the time and place of a special or regular meeting of the Board is effective if delivered to each member of the Board by hand, mail, telecopy, telephone or electronic mail and received not less than one day prior to the time of such special meeting. Notices of special meetings of the Board are to identify the time, place, and purpose of the special meeting or the business to be transacted at the special meeting. The failure to specifically identify an action to be taken or business to be transacted does not invalidate any action taken or any business transacted at a special meeting.

4.4 Location of Board Meetings. Board meetings may be held at any location in the world. The Managers may participate in a meeting of the Board by means of conference telephone or similar communications equipment by means of which all persons participating in the meeting can hear each other, and such participation in a meeting is presence in person at the meeting.

4.5 Waiver of Notice of Meeting. Whenever notice of a Board meeting is required to be given, a written waiver of notice, signed by the Manager entitled to notice, whether before or after the time of the meeting, is equivalent to notice. Neither the business to be transacted at, nor the purpose of, any Board meeting need to be specified in any written waiver of notice thereof. A Manager’s attendance at a meeting is a waiver of notice of that

meeting, except when the Manager attends a meeting for the express purpose of objecting, at the beginning of the meeting, to the transaction of any business because the meeting is not lawfully called or convened.

4.6 Quorum; Required Vote. A quorum for the transaction of business at any meeting of the Board shall consist of a majority of the Managers then in office. The vote of at least a majority of the Managers on the Board constitutes approval by, or the authorization of, the Board. No Manager on the Board is disqualified from acting on any matter because the Manager is interested in the matter to be acted upon by the Board.

4.7 Voting; Proxies. Each Manager on the Board has one vote. A Manager has no power to authorize another person to vote on behalf of the Manager, whether by proxy or other power of attorney.

4.8 Written Actions of the Board. Any action required or permitted to be taken at any meeting of the Board may be taken without a meeting if a majority of the Managers on the Board consents thereto in writing, and the writing or writings are filed by the Company Secretary with the minutes of proceedings of the Board.

4.9 Officers of the Company. (a) The Board may, but shall not be required to, appoint one or more individuals to serve as officers of the Company, assign powers and duties to such officers and set the compensation of such officers, if any.

(b) The officers of the Company may consist of a president, a secretary, a controller, a treasurer, and such other officers and assistant officers and agents as the Board shall deem necessary or advisable.

(c) Each officer shall serve until the earlier of his or her death, resignation or removal. The Board may remove or replace any officer at any time, with or without cause, by a vote of at least a majority of the members of the Board then in office. Any officer may resign at any time by delivering his or her written resignation to the Board.

(d) Unless otherwise specified elsewhere in this Agreement or by the Board from time to time, the officers of the Company will have such authority and perform such duties as are customarily incident to their offices.

(e) The Board shall authorize those individuals who will be responsible for signing documents necessary or advisable for the operation of the business.

Article 5. Powers and Duties of and Limitations on the Members

5.1 Rights of the Member. Each Member is entitled to have such rights and powers as are provided in this Agreement or by mandatory requirements of applicable law.

5.2 Limitations on the Rights of each Member. Subject to any mandatory requirements of applicable law, each Member (in its capacity as a Member) has no right to take any part whatsoever in the management and control of the ordinary business of the Company,

sign for or bind the Company, compel a sale or appraisal of Company assets or sell or assign its interest in the Company except as provided in this Agreement.

5.3 Limited Liability of each Member. No Member will be obligated personally for any debt, obligation or liability of the Company or other Members, whether arising in contract, tort or otherwise, solely by reason of being a Member.

5.4 Assignments and Transfers of Interests. A Member may transfer all or any portion of its Interest in the Company and any and all rights and/or obligations associated therewith with the written consent of the Board. The transferee of an Interest shall be admitted to the Company as a Member upon its execution of a counterpart signature page to this Agreement, or some other written instrument reasonably acceptable to the Board in which the Member agrees to be bound by the terms of this Agreement. If the transferring Member transfers all of its Interest, such admission shall be deemed effective immediately prior to the transfer and immediately following such admission, the transferor Member shall cease to be a member of the Company. Upon the admission of such transferor Member, the Board shall also adjust the capital accounts of all Members as necessary in accordance with Section 3.4.

5.5 Admission of Additional Members. In connection with the issuance of additional Interests by the Company, one or more additional Member(s) may be admitted to the Company as a Member with the written consent of the Board and upon execution of a counterpart signature page to this Agreement or some other document pursuant to which such additional Member agrees to be bound by this Agreement. Upon the admission of such additional Member, the Board shall also adjust the capital accounts of the Members as necessary in accordance with Section 3.4. The Company shall continue as a limited liability company under the Law after the admission of any additional Members pursuant to this Section 5.5.

5.6 Withdrawal. A Member shall not cease to be a Member as a result of the bankruptcy of such Member or as a result of any other events specified in the Law. A Member who continues to hold any Interest may withdraw from the Company only with the prior written consent of the Board. Otherwise, so long as a Member continues to hold any Interest, such Member shall not have the ability to withdraw or resign as a Member prior to the dissolution and winding up of the Company and any such withdrawal or resignation or attempted withdrawal or resignation by a Member prior to the dissolution or winding up of the Company shall be null and void. As soon as any Person who is a Member ceases to hold any Interests, such Person shall no longer be a Member.

Article 6. Exculpation and Indemnification

6.1 Exculpation. To the full extent authorized or permitted by law (as now or hereafter in effect), no Manager of the Company (or any predecessor of the Company) shall be personally liable to the Company or the Members for monetary damages for any breach of fiduciary duty by such a Manager as a Manager. Notwithstanding the foregoing sentence, a Manager shall be liable to the extent provided by applicable law (a) for any breach of the Manager's duty of loyalty to the Company or its Members, (b) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law or (c) for any transaction from which the Manager derived an improper personal benefit. No amendment to or

repeal of this Section 6.1 shall apply to or have any effect on the liability or alleged liability of any Manager of the Company for or with respect to any acts or omissions of such Manager occurring prior to such amendment or repeal.

6.2 Indemnification. (a) The Company shall indemnify to the fullest extent authorized or permitted by law (as now or hereafter in effect) any person made, or threatened to be made a party to or otherwise involved in any action or proceeding (whether civil or criminal or otherwise) by reason of the fact that he, his testator or intestate, is or was a Manager or officer of the Company or by reason of the fact that such Manager or officer, at the request of the Company, is or was serving any other corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, in any capacity, against expenses reasonably incurred by him or her in connection with the defense or settlement of such action if he or she acted in good faith and in a manner reasonably believed to be in or not opposed to the best interests of the Company, except in relation to matters as to which he or she is adjudged in such action or proceeding to be liable for negligence or misconduct in the performance of a duty owed to the Company. Nothing contained herein shall affect any rights to indemnification to which employees other than Managers and officers may be entitled by law. No amendment or repeal of this Section 6.2 shall apply to or have any effect on any right to indemnification provided hereunder with respect to any acts or omissions occurring prior to such amendment or repeal.

(b) Expenses incurred in defending any action or proceeding, civil or criminal, may be paid by the Company in advance of the final disposition of such action or proceeding notwithstanding any provisions of this Article to the contrary. But the Manager, officer, employee, or agent so defended shall repay such expenses to the Company if it is judicially determined that such Manager, officer, employee, or agent is not entitled to indemnification as provided in this Article.

(c) The Company may purchase and maintain insurance on behalf of any person who is or was a Manager, officer, employee or agent of the Company or was serving at the request of the Company as a Manager, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise against any liability asserted against him or her and incurred by him or her in any such capacity, or arising out of his status as such, whether or not the Company would have the power to indemnify him or her against such liability under the provisions of the law. The Company may create a trust fund, grant a security interest and use any other means (including, without limitation, letters of credit, surety bonds and other similar arrangements), as well as enter into contracts providing for indemnification to the fullest extent authorized or permitted by law and including as part thereof any or all of the foregoing, to ensure the payment of such sums as may become necessary to effect full indemnification.

(d) The rights to indemnification conferred in this Section 6.2 shall not be exclusive of any other right which any person may have or hereafter acquire under any statute, this Agreement or any agreement, any vote of Members or Managers or otherwise.

Article 7. General

7.1 Dissolution. The Company shall be dissolved only upon the first to occur of the following: (a) by action of the Members approving such dissolution; (b) at any time there is no Member of the Company unless the Company is continued in accordance with the Law; (c) the entry of a decree of judicial dissolution under Section 18-802 of the Law; or (d) as otherwise required by applicable law.

7.2 Winding Up and Liquidation. If the Company is required to wind up its affairs and liquidate its assets, it will first pay or make provision to pay all of its obligations as required by law and any assets remaining will be distributed to the Members pro rata in accordance with each Member's capital account balance.

7.3 Entire Agreement; Amendment. This Agreement is the entire declaration of the Members with respect to the subject matter hereof and will only be amended, subject to Section 3.2, by a writing duly signed by the Members that refers to this Agreement.

7.4 Notices. All notices, requests, consents and other communications hereunder to any party shall be deemed to be sufficient if delivered in writing in person or by telecopy, facsimile, electronic mail or similar electronic means or sent by nationally-recognized overnight courier or first class registered or certified mail, return receipt requested, postage prepaid, addressed to such party at the address set forth in Exhibit A hereto, in the case of any Member, in Section 1.5, in the case of the Company, or at such other address as may hereafter be designated in writing by such party to the other parties. All such notices, requests, consents and other communications shall be deemed to have been received (a) in the case of personal delivery or delivery by telecopy, facsimile, electronic mail or similar electronic means, on the date of such delivery, (b) in the case of dispatch by nationally recognized overnight courier, on the next Business Day following such dispatch, and (c) in the case of mailing, on the fifth Business Day after the posting thereof.

7.5 Invalidity. In the event that any provision of this Agreement is invalid, the validity of the remaining provisions of the Agreement are not in any way to be affected thereby.

7.6 Governing Law. This agreement is governed by and is to be construed under the laws of the State of Delaware, without giving effect to its conflicts of laws rules.

7.7 Successors and Assigns. This Agreement shall be binding upon the parties and their respective successors, executors, administrators, legal representatives, heirs and legal assigns and shall inure to the benefit of the parties and, except as otherwise provided herein, their respective successors, executors, administrators, legal representatives, heirs and legal assigns.

7.8 No Benefit of Third Parties. The provisions of this Agreement are intended only for the regulation of relations among the Members, the Managers and former or prospective members or managers of the Company. This Agreement is not intended for the benefit of any other Person.

7.9 Construction. The headings contained in this Agreement are for reference purposes only and do not affect the meaning or interpretation of this Agreement. All personal pronouns used in this Agreement, whether used in the masculine, feminine or neutral gender, include all other genders. The words “include,” “includes,” and “including” will be deemed to be followed by “without limitation.” Except when the context requires otherwise, any reference in this Agreement to a singular number shall include the plural. The words “this Agreement,” “herein,” “hereof,” “hereby,” “hereunder” and words of similar import refer to this Agreement as a whole, including the Annexes, Exhibits and Schedules, as the same may be amended, supplemented or otherwise modified from time to time, and not to any particular subdivision unless expressly so limited. Captions contained in this Agreement are inserted only as a matter of convenience and in no way define, limit, extend or describe the scope or intent of this Agreement or of any of its provisions. All references in this Agreement to any numbered Articles or Sections are, unless otherwise indicated, references to the Articles or Sections of this Agreement which are so numbered. All references to the numbered or lettered Annexes, Exhibits and Schedules are references to the Annexes, Exhibits and Schedules so numbered or lettered which are appended to this Agreement, as such Annexes, Exhibits and Schedules may be amended, supplemented or otherwise modified from time to time. Such references to Annexes, Exhibits and Schedules are to be construed as incorporating by reference the contents of each Annex, Exhibit or Schedule, as applicable, to which such reference is made as though such contents were set out in full at the place in this Agreement where such reference is made.

7.10 Counterparts. This Agreement may be executed in any number of counterparts, including by facsimile or other electronic signature. All counterparts shall be construed together and shall constitute one instrument.

SECOND REVISED AND RESTATED
UTILITY MONEY POOL AGREEMENT

This Second Revised and Restated Utility Money Pool Agreement (the “Agreement”), dated as of [] is made and entered into by and among FirstEnergy Corp. (“FirstEnergy”), an Ohio corporation and a registered holding company under the Public Utility Holding Company Act of 2005 (the “Act”), FirstEnergy Service Company (“FirstEnergy Service,” an Ohio corporation and a non-utility subsidiary of FirstEnergy, participating solely in its role as administrator of the money pool and not as a lender or borrower), and the FirstEnergy Utility Subsidiaries identified on the signature page hereto (each a “Party” and collectively, the “Parties”).

WITNESSETH:

WHEREAS, the Parties desire to establish a Money Pool (the “Utility Money Pool”) to coordinate and provide for certain of their short-term cash and working capital requirements; and

WHEREAS, the utility subsidiaries that will participate in the Utility Money Pool (each a “Subsidiary” and collectively, the “Subsidiaries”) will from time to time have need to borrow funds on a short-term basis, and certain of the Parties will from time to time have funds available to loan on a short-term basis.

NOW, THEREFORE, in consideration of the premises and the mutual agreements, covenants and provisions contained herein, and intending to be legally bound hereby, the Parties hereto agree as follows:

ARTICLE I

CONTRIBUTIONS AND BORROWINGS

Section 1.01 Contributions to Utility Money Pool. Each Party will determine each day, on the basis of cash flow projections and other relevant factors, in such Party’s sole discretion, the amount of funds it has available for contribution to the Utility Money Pool, and will contribute such funds to the Utility Money Pool. The determination of whether a Party at any time has surplus funds to lend to the Utility Money Pool or shall lend funds to the Utility Money Pool will be made by such Party’s chief financial officer or treasurer, or by a designee thereof, on the basis of cash flow projections and other relevant factors, in such Party’s sole discretion. Each Party may withdraw any of its funds at any time upon notice to FirstEnergy Service as administrative agent of the Utility Money Pool.

Section 1.02 Rights to Borrow. Subject to the provisions of Section 1.04(c) of this Agreement, short-term borrowing needs of the Parties, with the exception of FirstEnergy, and FirstEnergy Service, will be met by funds in the Utility Money Pool to the extent such funds are available. Each Party (other than FirstEnergy and FirstEnergy Service) shall have the right to make short-term borrowings from the Utility Money Pool from time to time, subject to the availability of funds and the limitations and conditions set forth herein and in the applicable

orders of the Securities and Exchange Commission (“SEC”). Each Party (other than FirstEnergy and FirstEnergy Service) may request loans from the Utility Money Pool from time to time during the period from the date hereof until this Agreement is terminated by written agreement of the Parties; provided, however, that the aggregate amount of all loans requested by any Party hereunder shall not exceed the applicable borrowing limits set forth in applicable orders of the SEC and other regulatory authorities, resolutions of such Party’s Board of Directors, such Party’s governing corporate documents, and agreements binding upon such Party. No loans through the Utility Money Pool will be made to, and no borrowings through the Utility Money Pool will be made by, FirstEnergy and FirstEnergy Service.

Section 1.03 Source of Funds. (a) Funds will be available through the Utility Money Pool from the following sources for use by the Parties from time to time: (1) surplus funds in the treasuries of Parties other than FirstEnergy, (2) surplus funds in the treasury of FirstEnergy (such funds in clauses (1) and (2) being referred to as “Internal Funds”), and (3) proceeds from bank borrowings by Parties and the sale of commercial paper by FirstEnergy and each other Party (“External Funds”), in each case to the extent permitted by applicable laws and regulatory orders. Funds will be made available from such sources in such other order as FirstEnergy Service, as administrator of the Utility Money Pool, may determine will result in a lower cost of borrowing to companies borrowing from the Utility Money Pool, consistent with the individual borrowing needs and financial standing of the Parties providing funds to the Utility Money Pool.

(b) Borrowing Parties will borrow pro rata from each lending Party in the proportion that the total amount loaned by such lending Party bears to the total amount then loaned through the Utility Money Pool. On any day when more than one fund source (e.g., Internal Funds and External Funds), with different rates of interest, is used to fund loans through the Utility Money Pool, each borrowing Party will borrow pro rata from each fund source in the same proportion that the amount of funds provided by that fund source bears to the total amount of short-term funds available to the Utility Money Pool.

Section 1.04 Authorization. (a) Each loan shall be authorized by the lending Party’s chief financial officer or treasurer, or by a designee thereof.

(b) FirstEnergy Service, as administrator of the Utility Money Pool, will provide each Party with periodic activity and cash accounting reports that include, among other things, reports of cash activity, the daily balance of loans outstanding and the calculation of interest charged.

(c) All borrowings from the Utility Money Pool shall be authorized by the borrowing Party’s chief financial officer or treasurer, or by a designee thereof. No Party shall be required to effect a borrowing through the Utility Money Pool if such Party determines that it can (and is authorized to) effect such borrowing at lower cost directly from banks or through the sale of its own commercial paper.

Section 1.05 Interest. The daily outstanding balance of all loans to any Subsidiary shall accrue interest as follows:

(a) If only Internal Funds comprise the daily outstanding balance of all loans outstanding during a calendar month, the interest rate applicable to such daily balances shall be the greater of the 30 day LIBOR rate as quoted in The Wall Street Journal or the money market rate that a lending Subsidiary could have obtained if it placed its excess cash in such an investment (as calculated monthly, the “Average Composite”).

(b) If only External Funds comprise the daily outstanding balance of all loans outstanding during a calendar month, the interest rate applicable to such daily outstanding balance shall be the lender’s cost for such External Funds calculated monthly or, if more than one Party had made available External Funds at any time during the month, the applicable interest rate shall be a composite rate, equal to the weighted average of the costs incurred by the respective Parties for such External Funds calculated monthly.

(c) In cases where the daily outstanding balances of all loans outstanding at any time during the month include both Internal Funds and External Funds, the interest rate applicable to the daily outstanding balances for the month shall be equal to the weighted average of the (i) cost of all Internal Funds contributed by Parties, as determined pursuant to Section 1.05(a) of this Agreement, and (ii) the cost of all such External Funds, as determined pursuant to Section 1.05(b) of this Agreement.

(d) The interest rate applicable to Loans made by a Subsidiary to the Utility Money Pool under Section 1.01 of this Agreement shall be the Average Composite as determined pursuant to Section 1.05(a) of this Agreement.

(e) Loans may be made solely from Internal Funds or solely from External Funds, rather than pursuant to Section 1.05(c), if such practice would result in a lower cost of borrowing.

Section 1.06 Certain Costs. The cost of compensating balances and fees paid to banks to maintain credit lines by Parties lending External Funds to the Utility Money Pool shall initially be paid by the Party maintaining such line. A portion of such costs, or all of such costs if a Party establishes a line of credit solely to lend funds to the Utility Money Pool, shall be retroactively allocated every quarter to the Subsidiaries borrowing such External Funds through the Utility Money Pool in proportion to their respective daily outstanding borrowings of such External Funds.

Section 1.07 Repayment. Each Subsidiary receiving a loan from the Utility Money Pool hereunder shall repay the principal amount of such loan, together with all interest accrued thereon, on demand and in any event within 364 days of the date on which such loan was made. All loans made through the Utility Money Pool may be prepaid by the borrower without premium or penalty.

Section 1.08 Form of Loans to Subsidiaries. Loans to the Subsidiaries from the Utility Money Pool shall be made as open-account advances, pursuant to the terms of this agreement. A separate promissory note will not be required for each individual transaction. If the Parties deem it necessary or appropriate, a master promissory note evidencing the terms of the transactions may be signed by each borrowing Party. Any such note shall: (a) be dated as of

the date of the initial borrowing; (b) mature on demand or on a date agreed by the Parties to the transaction, but in any event not later than one year after the date of the applicable borrowing; and (d) be repayable in whole at any time or in part from time to time, without premium or penalty.

ARTICLE II

OPERATION OF UTILITY MONEY POOL

Section 2.01 Operation. Operation of the Utility Money Pool, including record keeping and coordination of loans, will be handled by FirstEnergy Service under the authority of the appropriate officers of the Parties. FirstEnergy Service shall be responsible for the determination of all applicable interest rates and charges to be applied to advances outstanding at any time hereunder, shall maintain records of all advances, interest charges and accruals and interest and principal payments for purposes hereof, and shall prepare periodic reports thereof for the Parties. FirstEnergy Service will administer the Utility Money Pool on an “at cost” basis. Separate records shall be kept by FirstEnergy Service for the Utility Money Pool established by this Agreement and any other money pool administered by FirstEnergy Service.

Section 2.02 Investment of Surplus Funds in the Utility Money Pool. Funds not required for the Utility Money Pool loans (with the exception of funds required to satisfy the Utility Money Pool’s liquidity requirements) will ordinarily be invested in one or more short-term investments, including (i) interest-bearing accounts with banks; (ii) obligations issued or guaranteed by the U.S. government and/or its agencies and instrumentalities, including obligations under repurchase agreements; (iii) obligations issued or guaranteed by any state or political subdivision thereof, provided that such obligations are rated not less than A by a nationally recognized rating agency; (iv) commercial paper rated not less than A-1 by S&P or P-1 by Moody’s, or their equivalent by a nationally recognized rating agency; (v) money market funds; (vi) bank certificates of deposit; (vii) Eurodollar funds; and (viii) such other investments as are permitted by Section 9(c) of the Act and Rule 40 thereunder.

Section 2.03 Allocation of Interest Income and Investment Earnings. The interest income and other investment income earned by the Utility Money Pool on loans and investment of surplus funds will be allocated among the Parties in accordance with the proportion each Party’s contribution of funds in the Utility Money Pool bears to the total amount of funds in the Utility Money Pool and the cost of any External Funds provided to the Utility Money Pool by such Party. Interest and other investment earnings will be computed on a daily basis and settled once per month.

Section 2.04 Event of Default. If any Subsidiary shall generally not pay its debts as such debts become due, or shall admit in writing its inability to pay its debts generally, or shall make a general assignment for the benefit of creditors, or any proceeding shall be instituted by or against any Party seeking to adjudicate it bankrupt or insolvent, then FirstEnergy Service, on behalf of the Utility Money Pool, may, by notice to the Subsidiary, terminate the Utility Money Pool’s commitment to the Subsidiary and/or declare the principal amount then outstanding of, and the accrued interest on, the loans and all other amounts payable to the Utility Money Pool by the Subsidiary hereunder to be forthwith due and payable, whereupon such amounts shall be

immediately due and payable without presentment, demand, protest or other formalities of any kind, all of which are hereby expressly waived by each Subsidiary.

ARTICLE III

MISCELLANEOUS

Section 3.01 Amendment and Restatement. This Agreement amends, restates and replaces the Revised and Restated Utility Money Pool Agreement dated as of September 21, 2011 to reflect the addition of a new Party and certain other changes.

Section 3.02 Amendments. Any such amendment to this Agreement shall be adopted except in a writing executed by Parties and subject to all applicable approvals by the SEC and the applicable state utility regulatory commission.

Section 3.03 Legal Responsibility. Nothing herein contained shall render any Party liable for the obligations of any other Party hereunder and the rights, obligations and liabilities of the Parties are several in accordance with their respective obligations, and not joint.

Section 3.04 Rules for Implementation. The Parties may develop a set of guidelines for implementing the provisions of this Agreement, provided that the guidelines are consistent with all of the provisions of this Agreement.

Section 3.05 Governing Law. This Agreement shall be governed by and construed in accordance with, the laws of the State of Ohio.

IN WITNESS WHEREOF, this Agreement has been duly executed and delivered by the duly authorized officer of each Party hereto as of the date first above written.

SECOND REVISED AND RESTATED
UTILITY MONEY POOL AGREEMENT

This Second Revised and Restated Utility Money Pool Agreement (the "Agreement"), dated as of [], is made and entered into by and among FirstEnergy Corp. ("FirstEnergy"), an Ohio corporation and a registered holding company under the Public Utility Holding Company Act of 2005 (the "Act"), FirstEnergy Service Company ("FirstEnergy Service," an Ohio corporation and a non-utility subsidiary of FirstEnergy, participating solely in its role as administrator of the money pool and not as a lender or borrower), and the FirstEnergy Utility Subsidiaries identified on the signature page hereto (each a "Party" and collectively, the "Parties").

Deleted: September 21, 2011

Deleted: Allegheny Energy Service Corporation ("AYE Service," a non-utility subsidiary of FirstEnergy, participating solely in its role as administrator of Monongahela Power Company, The Potomac Edison Company, Trans-Allegheny Interstate Line Company, and West Penn Power Company (collectively the AYE Utilities) and not as a lender or borrower),

WITNESSETH:

WHEREAS, the Parties desire to establish a Money Pool (the "Utility Money Pool") to coordinate and provide for certain of their short-term cash and working capital requirements; and

WHEREAS, the utility subsidiaries that will participate in the Utility Money Pool (each a "Subsidiary" and collectively, the "Subsidiaries") will from time to time have need to borrow funds on a short-term basis, and certain of the Parties will from time to time have funds available to loan on a short-term basis,

Deleted: :

NOW, THEREFORE, in consideration of the premises and the mutual agreements, covenants and provisions contained herein, and intending to be legally bound hereby, the Parties hereto agree as follows:

ARTICLE I

CONTRIBUTIONS AND BORROWINGS

Section 1.01 Contributions to Utility Money Pool. Each Party will determine each day, on the basis of cash flow projections and other relevant factors, in such Party's sole discretion, the amount of funds it has available for contribution to the Utility Money Pool, and will contribute such funds to the Utility Money Pool. The determination of whether a Party at any time has surplus funds to lend to the Utility Money Pool or shall lend funds to the Utility Money Pool will be made by such Party's chief financial officer or treasurer, or by a designee thereof, on the basis of cash flow projections and other relevant factors, in such Party's sole discretion. Each Party may withdraw any of its funds at any time upon notice to FirstEnergy Service as administrative agent of the Utility Money Pool.

Section 1.02 Rights to Borrow. Subject to the provisions of Section 1.04(c) of this Agreement, short-term borrowing needs of the Parties, with the exception of FirstEnergy, and FirstEnergy Service, will be met by funds in the Utility Money Pool to the extent such funds are available. Each Party (other than FirstEnergy, and FirstEnergy Service) shall have the right to make short-term borrowings from the Utility Money Pool from time to time, subject to the availability of funds and the limitations and conditions set forth herein and in the applicable

orders of the Securities and Exchange Commission (“SEC”). Each Party (other than FirstEnergy, ~~and FirstEnergy Service~~) may request loans from the Utility Money Pool from time to time during the period from the date hereof until this Agreement is terminated by written agreement of the Parties; provided, however, that the aggregate amount of all loans requested by any Party hereunder shall not exceed the applicable borrowing limits set forth in applicable orders of the SEC and other regulatory authorities, resolutions of such Party’s Board of Directors, such Party’s governing corporate documents, and agreements binding upon such Party. No loans through the Utility Money Pool will be made to, and no borrowings through the Utility Money Pool will be made by, FirstEnergy, ~~and FirstEnergy Service~~.

Deleted: .
Deleted: , and AYE Service

Section 1.03 Source of Funds. (a) Funds will be available through the Utility Money Pool from the following sources for use by the Parties from time to time: (1) surplus funds in the treasuries of Parties other than FirstEnergy, (2) surplus funds in the treasury of FirstEnergy (such funds in clauses (1) and (2) being referred to as “Internal Funds”), and (3) proceeds from bank borrowings by Parties and the sale of commercial paper by FirstEnergy and each other Party (“External Funds”), in each case to the extent permitted by applicable laws and regulatory orders. Funds will be made available from such sources in such other order as FirstEnergy Service, as administrator of the Utility Money Pool, may determine will result in a lower cost of borrowing to companies borrowing from the Utility Money Pool, consistent with the individual borrowing needs and financial standing of the Parties providing funds to the Utility Money Pool.

Deleted: .
Deleted: , or AYE Service

(b) Borrowing Parties will borrow pro rata from each lending Party in the proportion that the total amount loaned by such lending Party bears to the total amount loaned through the Utility Money Pool. On any day when more than one fund source (e.g., Internal Funds and External Funds), with different rates of interest, is used to fund loans through the Utility Money Pool, each borrowing Party will borrow pro rata from each fund source in the same proportion that the amount of funds provided by that fund source bears to the total amount of short-term funds available to the Utility Money Pool.

Section 1.04 Authorization. (a) Each loan shall be authorized by the lending Party’s chief financial officer or treasurer, or by a designee thereof.

(b) FirstEnergy Service, as administrator of the Utility Money Pool, will provide each Party with periodic activity and cash accounting reports that include, among other things, reports of cash activity, the daily balance of loans outstanding and the calculation of interest charged.

(c) All borrowings from the Utility Money Pool shall be authorized by the borrowing Party’s chief financial officer or treasurer, or by a designee thereof. No Party shall be required to effect a borrowing through the Utility Money Pool if such Party determines that it can (and is authorized to) effect such borrowing at lower cost directly from banks or through the sale of its own commercial paper.

Section 1.05 Interest. The daily outstanding balance of all loans to any Subsidiary shall accrue interest as follows:

Exhibit SRS-3

(a) If only Internal Funds comprise the daily outstanding balance of all loans outstanding during a calendar month, the interest rate applicable to such daily balances shall be the greater of the 30 day LIBOR rate as quoted in The Wall Street Journal or the money market rate that a lending Subsidiary could have obtained if it placed its excess cash in such an investment (as calculated monthly, the “Average Composite”).

(b) If only External Funds comprise the daily outstanding balance of all loans outstanding during a calendar month, the interest rate applicable to such daily outstanding balance shall be the lender’s cost for such External Funds calculated monthly or, if more than one Party had made available External Funds at any time during the month, the applicable interest rate shall be a composite rate, equal to the weighted average of the costs incurred by the respective Parties for such External Funds calculated monthly.

(c) In cases where the daily outstanding balances of all loans outstanding at any time during the month include both Internal Funds and External Funds, the interest rate applicable to the daily outstanding balances for the month shall be equal to the weighted average of the (i) cost of all Internal Funds contributed by Parties, as determined pursuant to Section 1.05(a) of this Agreement, and (ii) the cost of all such External Funds, as determined pursuant to Section 1.05(b) of this Agreement.

(d) The interest rate applicable to Loans made by a Subsidiary to the Utility Money Pool under Section 1.01 of this Agreement shall be the Average Composite as determined pursuant to Section 1.05(a) of this Agreement.

(e) Loans may be made solely from Internal Funds or solely from External Funds, rather than pursuant to Section 1.05(c), if such practice would result in a lower cost of borrowing.

Section 1.06 Certain Costs. The cost of compensating balances and fees paid to banks to maintain credit lines by Parties lending External Funds to the Utility Money Pool shall initially be paid by the Party maintaining such line. A portion of such costs, or all of such costs if a Party establishes a line of credit solely to lend funds to the Utility Money Pool, shall be retroactively allocated every quarter to the Subsidiaries borrowing such External Funds through the Utility Money Pool in proportion to their respective daily outstanding borrowings of such External Funds.

Section 1.07 Repayment. Each Subsidiary receiving a loan from the Utility Money Pool hereunder shall repay the principal amount of such loan, together with all interest accrued thereon, on demand and in any event within 364 days of the date on which such loan was made. All loans made through the Utility Money Pool may be prepaid by the borrower without premium or penalty.

Section 1.08 Form of Loans to Subsidiaries. Loans to the Subsidiaries from the Utility Money Pool shall be made as open-account advances, pursuant to the terms of this agreement. A separate promissory note will not be required for each individual transaction. If the Parties deem it necessary or appropriate, a master promissory note evidencing the terms of

the transactions may be signed by each borrowing Party. Any such note shall: (a) be dated as of the date of the initial borrowing; (b) mature on demand or on a date agreed by the Parties to the transaction, but in any event not later than one year after the date of the applicable borrowing; and (d) be repayable in whole at any time or in part from time to time, without premium or penalty.

ARTICLE II

OPERATION OF UTILITY MONEY POOL

Section 2.01 Operation. Operation of the Utility Money Pool, including record keeping and coordination of loans, will be handled by FirstEnergy Service under the authority of the appropriate officers of the Parties. FirstEnergy Service shall be responsible for the determination of all applicable interest rates and charges to be applied to advances outstanding at any time hereunder, shall maintain records of all advances, interest charges and accruals and interest and principal payments for purposes hereof, and shall prepare periodic reports thereof for the Parties. FirstEnergy Service will administer the Utility Money Pool on an “at cost” basis. Separate records shall be kept by FirstEnergy Service for the Utility Money Pool established by this Agreement and any other money pool administered by FirstEnergy Service.

Section 2.02 Investment of Surplus Funds in the Utility Money Pool. Funds not required for the Utility Money Pool loans (with the exception of funds required to satisfy the Utility Money Pool’s liquidity requirements) will ordinarily be invested in one or more short-term investments, including (i) interest-bearing accounts with banks; (ii) obligations issued or guaranteed by the U.S. government and/or its agencies and instrumentalities, including obligations under repurchase agreements; (iii) obligations issued or guaranteed by any state or political subdivision thereof, provided that such obligations are rated not less than A by a nationally recognized rating agency; (iv) commercial paper rated not less than A-1 by S&P or P-1 by Moody’s, or their equivalent by a nationally recognized rating agency; (v) money market funds; (vi) bank certificates of deposit; (vii) Eurodollar funds; and (viii) such other investments as are permitted by Section 9(c) of the Act and Rule 40 thereunder.

Section 2.03 Allocation of Interest Income and Investment Earnings. The interest income and other investment income earned by the Utility Money Pool on loans and investment of surplus funds will be allocated among the Parties in accordance with the proportion each Party’s contribution of funds in the Utility Money Pool bears to the total amount of funds in the Utility Money Pool and the cost of any External Funds provided to the Utility Money Pool by such Party. Interest and other investment earnings will be computed on a daily basis and settled once per month.

Section 2.04 Event of Default. If any Subsidiary shall generally not pay its debts as such debts become due, or shall admit in writing its inability to pay its debts generally, or shall make a general assignment for the benefit of creditors, or any proceeding shall be instituted by or against any Party seeking to adjudicate it bankrupt or insolvent, then FirstEnergy Service, on behalf of the Utility Money Pool, may, by notice to the Subsidiary, terminate the Utility Money Pool’s commitment to the Subsidiary and/or declare the principal amount then outstanding of,

Deleted: For so long as is necessary to accommodate existing computer system and bank account arrangements applicable to AYE Utilities, AYE Service, participating solely as administrator (and not as lender or borrower) for the AYE Utilities, will provide such assistance and services in respect of the operation of the Utility Money Pool as FirstEnergy Service shall direct.

and the accrued interest on, the loans and all other amounts payable to the Utility Money Pool by the Subsidiary hereunder to be forthwith due and payable, whereupon such amounts shall be immediately due and payable without presentment, demand, protest or other formalities of any kind, all of which are hereby expressly waived by each Subsidiary.

ARTICLE III

MISCELLANEOUS

Section 3.01 Amendment and Restatement. This Agreement amends, restates and replaces the Revised and Restated Utility Money Pool Agreement dated as of September 21, 2011 to reflect the addition of a new Party and certain other changes.

Section 3.02 Amendments. Any such amendment to this Agreement shall be adopted except in a writing executed by Parties and subject to all applicable approvals by the SEC and the applicable state utility regulatory commission.

Section 3.03 Legal Responsibility. Nothing herein contained shall render any Party liable for the obligations of any other Party hereunder and the rights, obligations and liabilities of the Parties are several in accordance with their respective obligations, and not joint.

Deleted: 02

Section 3.04 Rules for Implementation. The Parties may develop a set of guidelines for implementing the provisions of this Agreement, provided that the guidelines are consistent with all of the provisions of this Agreement.

Deleted: 03

Section 3.05 Governing Law. This Agreement shall be governed by and construed in accordance with, the laws of the State of Ohio.

Deleted: 04

Exhibit SRS-3

IN WITNESS WHEREOF, this Agreement has been duly executed and delivered by the duly authorized officer of each Party hereto as of the date first above written.

III. DESCRIPTION OF THE TRANSACTION	4
IV. EXPLANATION OF TRANSACTION STRUCTURE AND ACCOUNTING IMPLICATIONS	10
V. ACCOUNTING FOR TRANSACTION-RELATED COSTS	15

1 Coopers & Lybrand LLP (now PricewaterhouseCoopers LLP) in 1997, serving in various
2 client service positions until I joined FirstEnergy as Manager of Financial Reporting and
3 Technical Accounting in 2009. I was elected Assistant Controller, FirstEnergy Utilities in
4 2010 and Assistant Controller, FirstEnergy Generation in March 2012. In October 2012,
5 I was elected Vice President and Assistant Controller, and in May 2013, I was elected
6 Vice President, Controller, and Chief Accounting Officer for FirstEnergy. I am a
7 licensed certified public accountant in Ohio and Alabama. My educational background
8 and professional experience is more fully outlined in Appendix A.

9 **Q. Have you provided testimony in prior regulatory proceedings?**

10 A. Yes. I have provided written testimony on behalf of certain of FirstEnergy's subsidiaries
11 in general base rate case proceedings before the Public Service Commission of West
12 Virginia (Docket No. 14-0702-E-42T) and in proceedings before the Public Utilities
13 Commission of Ohio (Docket Nos. 13-1147-EL-UNC; 14-0828-EL-UNC).

14 **II. PURPOSE OF TESTIMONY**

15 **Q. What is the purpose of your testimony?**

16 A. The purpose of my testimony is to describe the various tax and accounting aspects of the
17 proposed transaction (the "Transaction") under which Met-Ed, Penelec, and Jersey
18 Central Power & Light Company ("JCP&L" and, collectively, the "Operating
19 Companies") will contribute their transmission assets, as defined below, to Mid-Atlantic
20 Interstate Transmission, LLC ("MAIT"), a newly-formed subsidiary of FirstEnergy
21 Transmission, LLC ("FET"), in which the Operating Companies will have membership
22 interests. I will also provide the proposed accounting entries for Met-Ed, Penelec and

1 MAIT reflecting the Transaction under GAAP and USofA. Finally, I will identify
2 “Transaction-related” costs and provide a description of how these costs will be tracked
3 and excluded from MAIT’s transmission rates going forward.

4 **Q. Are you sponsoring any exhibits as part of this filing?**

5 A. Yes. I am sponsoring eight exhibits, which accompany my testimony, and are identified
6 as follows:

- 7 1. Exhibit No. KJT-1 is the Capital Contribution Agreement which identifies the
8 transmission assets to be contributed from the Operating Companies to MAIT as of
9 December 31, 2014 and will be updated prior to the closing of the Transaction.
10 Exhibit No. KJT-1 also describes the membership interests owned by the Operating
11 Companies and FET.
- 12 2. Exhibit No. KJT-2 is a proposed Ground Lease between MAIT and each of the Joint
13 Applicants.
- 14 3. Exhibit No. KJT-3 is a list of real property associated with each of the substations that
15 are part of the transfer that will be subject to the Ground Lease.
- 16 4. Exhibit No. KJT-4 consists of maps showing the locations of transmission facilities
17 subject to the Transaction.
- 18 5. Exhibit No. KJT-5 is the FirstEnergy Service Agreement, with MAIT added as a
19 signatory.
- 20 6. Exhibit No. KJT-6 is the Revised Amended and Restated Mutual Assistance
21 Agreement, with MAIT added as a signatory.
- 22 7. Exhibit No. KJT-7 is FirstEnergy’s Intercompany Income Tax Allocation Agreement,
23 with MAIT added as a signatory.
- 24 8. Exhibit No. KJT-8 contains the proposed accounting entries to record the Transaction
25 in the accounts of Met-Ed, Penelec and MAIT.

26 Each of the exhibits listed above is also identified and incorporated in the Joint
27 Application.

1 **III. DESCRIPTION OF THE TRANSACTION**

2 **Q. Please briefly describe the Transaction.**

3 A. As described in greater detail in the prepared direct testimony of Mr. Steven R. Staub,
4 (Joint Applicants' Statement No. 3), pursuant to the Transaction, FET will make a cash
5 investment in MAIT in exchange for the Class A membership interest. The Class A
6 membership interest will provide FET with "management control," defined in the
7 Amended and Restated Limited Liability Operating Agreement of Mid-Atlantic Interstate
8 Transmission, LLC (Joint Applicants' Exhibit SRS-1) as the sole authority to elect and
9 remove managers and determine the size of the board. Each of the Operating Companies
10 will contribute its existing transmission assets in exchange for Class B membership
11 interests in MAIT. As explained in Mr. Staub's testimony, the Class B membership
12 interests do not confer operating control and management authority over MAIT. At the
13 time the transaction is completed, FET's Class A membership interest will represent
14 initially approximately 5% of MAIT's total equity as reflected in FET's capital account
15 maintained by MAIT. The Operating Companies' Class B membership interests
16 collectively will initially amount to the remaining approximately 95% of MAIT's total
17 equity as reflected in the Operating Companies' respective capital accounts maintained
18 by MAIT. As explained further below, the Operating Companies' contribution of the
19 transmission assets will be a non-taxable contribution of assets for federal and state
20 income tax purposes.

21 **Q. Please provide a description of the assets to be contributed to MAIT by the**
22 **Operating Companies.**

1 A. Pursuant to the terms of the Capital Contribution Agreement (Exhibit No. KJT-1), each
2 of the Operating Companies will contribute its “transmission assets” to MAIT.
3 “Transmission assets” are defined in Schedule A to the Capital Contribution Agreement.
4 Subject to certain exceptions related to transmission plant that is being reclassified from
5 transmission to distribution, as discussed in greater detail by Mr. Fullem (Joint
6 Applicants’ Statement No. 1), the physical assets being contributed consist of all FERC-
7 jurisdictional facilities, excluding land and land rights, recorded in the Operating
8 Companies’ FERC transmission accounts. For Penelec, the property being contributed
9 includes, generally, facilities operating at 500 kV, 345 kV, 230 kV, 138 kV, 115 kV and
10 46 kV. For Met-Ed, the property being contributed includes, generally, facilities
11 operating at 500 kV, 230 kV, 138 kV, 115 kV and 69 kV¹. The Operating Companies’
12 transmission regulatory assets are also “transmission assets,” as defined in the Capital
13 Contribution Agreement.

14 Furthermore, as discussed in my testimony below, based on the structure of the
15 Transaction and in accordance with the requirements of GAAP, goodwill and
16 accumulated deferred income taxes (“ADIT”) will be transferred to MAIT from the
17 Operating Companies.

18 **Q. Will the Operating Companies also be contributing land and other real estate**
19 **interests associated with the transferred transmission assets?**

20 A. No. The Operating Companies will not transfer a fee interest in land and other real estate
21 to MAIT in connection with the contribution of transmission assets. However, MAIT

¹ A list of the transmission assets and their associated carrying values is provided in Exhibit No. KJT-1.

1 will need certain real estate interests and access rights in order to operate and maintain
2 the transmission facilities going forward. Accordingly, MAIT will enter into a Ground
3 Lease with each of the Operating Companies to govern these interactions. A form of the
4 Ground Lease for both Met-Ed and Penelec is provided in Exhibit No. KJT-2
5 accompanying my testimony. A list of the real property assets associated with each of
6 the substations that are part of the transfer is provided in Exhibit No. KJT-3. I also am
7 providing maps in Exhibit No. KJT-4,² which depict all of the real property assets
8 associated with the transmission facilities.

9 **Q. Why will the Operating Companies be entering into a Ground Lease, rather than**
10 **contributing a fee interest in land and other real estate to MAIT?**

11 A. It is an administratively more efficient way to effect the transfer. It is also consistent
12 with the way transmission facilities located in western Pennsylvania and Ohio were
13 transferred to American Transmission Systems, Incorporated (“ATSI”) in 1999 and
14 2000,³ which experience has shown provided ATSI all of the interests in real property it
15 needs to safely, reliably and efficiently furnish transmission service. In summary, the use
16 of a ground lease to provide MAIT the interests in real property it needs to operate and
17 maintain the transmission facilities enables a quicker transfer of property rights by
18 avoiding the need for surveys, deed recordings, and easement negotiations.

² Because the maps contain “confidential security information” as defined in the Commission’s regulations at 52 Pa. Code § 2142.2, Exhibit KJT-4 is being filed on a confidential basis.

³ Pennsylvania Power Company (“Penn Power”) a public utility subsidiary of Ohio Edison Company, which is in turn a subsidiary of FirstEnergy that provides electric distribution service in western Pennsylvania, transferred its transmission assets to ATSI pursuant to the Commission’s approval as evidenced by a certificate of public convenience issued in 2000. *Application Of Pennsylvania Power Co. For (1) A Certificate Of Public Convenience Authorizing The Transfer Of Certain Transmission Assets To American Transmission Systems, Inc., And (2) Approval Of Certain Affiliated Interest Agreements Necessary To Effect The Transfer*, Docket No. A-110450F0016 (July 14, 2000).

1 **Q. Please explain how the annual base rent amount that MAIT will pay to Met-Ed and**
2 **Penelec under the Ground Lease will be derived.**

3 A. The annual base rent amount will be equivalent to the revenue requirement related to the
4 net book value of land and land rights classified in Met-Ed's and Penelec's FERC
5 transmission accounts. This assures that the rate charged to transmission customers is
6 based on the amount actually paid for land and land rights and, therefore, is consistent
7 with the ratemaking principles of the FERC. The annual revenue requirement will
8 consist of a return on rate base related to land and land rights, applicable depreciation
9 expense, income taxes and taxes other than income taxes.

10 **Q. Will MAIT have a contractual relationship with other FirstEnergy companies?**

11 A. Yes, it will. Therefore, Met-Ed and Penelec are requesting the Pennsylvania Public
12 Utility Commission's ("Commission") approval of revisions to five affiliated interest
13 agreements.

14 The first is the FirstEnergy Service Agreement (Exhibit No. KJT-5), under which MAIT
15 will be entitled to receive administrative, management, and other services from
16 FirstEnergy Service Company ("FESC"), as prescribed by the agreement.

17 The second is the Revised Amended and Restated Mutual Assistance Agreement
18 ("MAA") (Exhibit No. KJT-6), under which MAIT will be able to request and
19 receive non-power goods and services from the FirstEnergy operating companies
20 consistent with the terms and conditions of the MAA. For example, technical
21 support services and workers, including those from Met-Ed and Penelec, could be

1 provided under the MAA to assist MAIT in the performance of its operations as a
2 stand-alone transmission asset owner. Pricing for the services and goods are
3 consistent with the agreement and FERC standards.

4 The third is the Intercompany Income Tax Allocation Agreement (Exhibit No.
5 KJT-7) , which sets forth a methodology for allocating current federal and state
6 income tax expense (including sharing of net operating losses) among members of
7 the FirstEnergy group in situations in which the group files consolidated or
8 combined tax returns for federal or state tax purposes. MAIT will be added as a
9 signatory to the agreement but no additional changes to the agreement are
10 expected as a result of the Transaction.

11 The fourth is the Ground Lease (Exhibit No. KJT-2), which I previously
12 discussed.

13 The fifth is the FirstEnergy Regulated Money Pool Agreement (Exhibit No. SRS-
14 5), which is discussed in Mr. Staub's testimony (Joint Applicants' Statement No.
15 3). Under the terms of the Money Pool Agreement, regulated companies within
16 the FirstEnergy holding company system can lend to, or borrow from, each other
17 to manage their short-term working capital requirements.

18 **Q. What is the status of the existing MAA?**

19 A. The MAA (entitled the "Modified Amended and Restated MAA") was last approved by
20 the Commission on February 24, 2011, as part of the FirstEnergy and Allegheny Energy,
21 Inc. merger proceeding at Docket Nos. A-2010-2176520 and A-2010-2176732 (the
22 "Merger Proceeding"). On August 13, 2012, Met-Ed, Penelec, Penn Power and West

1 Penn Power Company (“West Penn”) submitted a request for Commission approval of a
2 Revised Amended and Restated Mutual Assistance Agreement (“Revised Amended and
3 Restated MAA”) at Docket No. G-2012-2318787. The modifications included in the
4 Revised Amended and Restated MAA were intended to: (1) include those affiliates
5 identified by the Commission’s Bureau of Audits in its 2011 report on its Management
6 Audit of Met-Ed and Penelec⁴; (2) account for all potential transactions that those
7 companies anticipate among themselves and between them and their other affiliates; (3)
8 ensure the MAA’s consistency with the financial governance obligations arising from the
9 Merger Proceeding; and (4) complete administrative clean-up edits. On November 16,
10 2012, Met-Ed, Penelec, Penn Power and West Penn submitted amendments to the
11 Revised Amended and Restated MAA reflecting corrections to certain pricing provisions
12 and the definition of Engineering Services. On January 10, 2013, they submitted
13 additional amendments to the Revised Amended and Restated MAA to reflect the
14 appropriate titles of certain affiliates. The proposed MAA for the Transaction is based on
15 the Revised Amended and Restated MAA because Commission approval of such
16 agreement at Docket No. G-2012-231878 is expected prior to the issuance of the Final
17 Order in this proceeding.

18 **Q. Please describe the changes to the MAA that are being submitted for approval as**
19 **part of this Application.**

20 A. FirstEnergy is adding MAIT to the Revised Amended and Restated MAA that was
21 submitted to the Commission on January 10, 2013. *See* Exhibit No. KJT-6. Specifically,

⁴ June 30, 2011 Management Efficiency Investigation Report, Conclusion No. III-1, Docket Nos. D-2009-2143263, et al.

1 MAIT will be an additional signatory party as a service recipient. Moreover, the
2 following additional changes are being made to the MAA: (i) removing Allegheny
3 Energy Service Corporation from the MAA because it no longer provides services under
4 the MAA; (ii) additional services and goods that the Operating Companies as defined in
5 the MAA, will provide to MAIT; and (iii) some minor clarification edits.

6 **IV. EXPLANATION OF TRANSACTION STRUCTURE AND ACCOUNTING**
7 **IMPLICATIONS**

8 **Q. What are the Transaction’s accounting implications for the Operating Companies**
9 **and MAIT?**

10 A. I will discuss the accounting implications in three main components as follows:

11 1. Contribution of the transmission assets: As discussed above and in the Capital
12 Contribution Agreement (Exhibit KJT-1), the Operating Companies will contribute
13 their transmission assets to MAIT in return for Class B membership interests in
14 MAIT. From an accounting perspective, the Operating Companies will contribute the
15 transmission plant, equipment and transmission-related regulatory assets in return for
16 an equity investment in MAIT. Likewise, MAIT will receive the transmission plant,
17 equipment and transmission regulatory assets and will issue Class B membership
18 interests to the Operating Companies.

19 Under GAAP, the transmission assets of the Operating Companies will be
20 contributed to MAIT at their carrying value⁵ at the date the Transaction is executed.

21 GAAP, specifically Accounting Standards Codification (“ASC”) 805-50, *Business*

⁵ When discussing transmission plant and equipment, carrying value is net book value (original cost less accumulated depreciation). For all other assets and liabilities, carrying value is the value recorded on the company’s balance sheet.

1 *Combinations*, requires that assets and liabilities transferred between companies
2 under common control be transferred to the receiving entity at their carrying value in
3 the accounts of the transferring entity at the date of transfer. Because FirstEnergy
4 owns all of the common stock of the Operating Companies and FET, both of which
5 will own all the membership interests of MAIT, the Transaction is considered a
6 common control transaction and, therefore, the contribution of the transmission assets
7 is required to be accounted for at carrying value.

- 8 2. Allocation of Goodwill: Currently, the Operating Companies have goodwill on their
9 books resulting from the 2001 merger of FirstEnergy and GPU, Inc. (“GPU”), the
10 former holding company of the Operating Companies, whereby FirstEnergy acquired
11 all the stock of GPU.

12 Under GAAP, when assets being transferred constitute a business, an entity
13 should allocate a portion of the goodwill to the business being transferred. The
14 amount of goodwill that is allocated to the business being transferred should be based
15 on the relative fair values of the business being transferred and the portion of the
16 business being retained.

17 Under ASC, 805, *Business Combinations*, a business is defined as an integrated
18 set of activities and assets that is capable of being conducted and managed for the
19 purposes of providing a return in the form of dividends, lower costs, or other
20 economic benefits directly to investors or other owners, members, or participants. A
21 business consists of inputs and processes applied to those inputs that have the ability
22 to create outputs. As the transmission assets constitute a business under GAAP,

1 goodwill is required to be transferred from the Operating Companies to MAIT as part
2 of the Transaction.

3 Therefore, the Operating Companies will transfer their goodwill to MAIT as part
4 of the Transaction, which will be offset by their equity investment in MAIT.
5 Likewise, MAIT will record the goodwill on its balance sheet as part of the
6 Transaction which will be offset by the Class B membership interest issued to the
7 Operating Companies.

8 3. ADIT: As further discussed below, the Operating Companies' contribution of
9 transmission assets, including both transmission plant and equipment and
10 transmission related regulatory assets, will be a tax-free transaction. Therefore, the
11 ADIT associated with the transmission assets will also be transferred from the
12 Operating Companies to MAIT, which will reduce the Operating Companies'
13 investment in MAIT. Likewise, MAIT will record the ADIT associated with the
14 transmission assets, proportionally reducing the Class B membership interests it
15 would otherwise have issued.

16 **Q. What are the Transaction's tax implications for Met-Ed, Penelec and MAIT?**

17 A. As discussed above, the contribution of the Operating Companies' transmission assets to
18 MAIT will be structured as a tax-free contribution of assets as opposed to an asset sale.
19 Provisions of the Internal Revenue Code permit one or more shareholders to achieve a
20 non-taxable transfer of assets to a corporation in exchange for stock, which results in a
21 "carry over" of the existing tax basis in the assets being transferred. The same provisions
22 apply where, as here, the transfer is to a limited liability company in exchange for its

1 membership interests. By contrast, in an asset sale, the tax basis of the assets being
2 transferred would be “stepped-up” to the amount of consideration paid for the assets.

3 Therefore, since the book basis of the transmission assets will be contributed at
4 their carrying value and the tax basis will be “carried over,” the ADIT, representing the
5 difference between the book and tax basis of the transmission assets being contributed,
6 will be transferred from the Operating Companies to MAIT. For example, assume, prior
7 to a tax-free contribution, Company A had depreciable assets with a net book value of
8 \$150 and a tax basis of \$100, creating a book-to-tax difference of \$50. At the statutory
9 federal corporate income tax rate, \$17.50 ($\$50 \times 35\%$) would be recorded in account 282-
10 ADIT. When Company A contributes the asset to its affiliate, Company Z, in a tax-free
11 exchange for stock, both the existing book basis and tax basis transfer to Company Z on
12 the date of the transfer and, therefore, the \$17.50 ADIT liability would be transferred
13 from Company A’s books to Company Z’s books.

14 It is important to note that a tax-free contribution will result in a reduction to
15 MAIT’s rate base by transferring the associated ADIT with the related transmission
16 assets contributed to MAIT. In an asset sale, by contrast, the tax basis of the
17 transmission assets being sold would be “stepped-up,” resulting in no book-to-tax
18 differences, no ADIT, and a higher rate base relative to a tax-free exchange.

19 **Q. How will the capital structures of Met-Ed and Penelec be affected by the**
20 **Transaction?**

21 A. The capital structures of Met-Ed and Penelec will not be affected by the Transaction.
22 Each of the Operating Companies will receive an investment in MAIT through their

1 Class B membership interests equal to the value of the transmission assets contributed to
2 MAIT plus the goodwill and ADIT transferred to MAIT.

3 **Q. How will FET reflect its ownership interest in MAIT?**

4 A. Under ASC 810, *Consolidation*, a reporting entity must consolidate any entity in which it
5 has a controlling financial interest. Because FET will have a controlling financial interest
6 in MAIT, it will be the entity to consolidate MAIT.

7 **Q. How do the Operating Companies and FET expect to account for their share of**
8 **future earnings and dividends of MAIT?**

9 A. The Operating Companies will account for their investment in MAIT using the equity
10 method of accounting. Under this method, the Operating Companies will recognize their
11 investment in MAIT in Account 123.1 – Investment in Subsidiary Companies.
12 Subsequently, the Operating Companies will recognize their share of earnings in Account
13 418.1 – Equity in Earnings of Subsidiary Companies with a corresponding increase to
14 Account 123.1 – Investment in Subsidiary Companies. As MAIT’s earnings are
15 distributed as dividends, the Operating Companies will reduce Account 123.1 –
16 Investment in Subsidiary Companies, by the amount of dividends received.

17 As noted earlier, FET will consolidate MAIT. As such, MAIT’s earnings, less the
18 proportion attributable to the Operating Companies, will be included in FET’s
19 consolidated income statement.

20 The earnings and dividends generated by MAIT will be allocated to FET and the
21 Operating Companies based on each company’s percentage of equity ownership interest
22 in MAIT with total equity of MAIT representing the summation of both Class A and
23 Class B membership interests. Separate capital accounts will be maintained on the books

1 of MAIT for FET's Class A membership interest and each of the Operating Companies'
2 Class B membership interest.

3 **Q. Are you providing proposed accounting entries showing the accounting effects of the**
4 **Transaction?**

5 A. Yes. Proposed accounting entries to record the Transaction in the accounts of Met-Ed,
6 Penelec and MAIT are provided as Exhibit KJT-8, which lists the accounts affected and
7 provides a general description of the entries. The values of assets and liabilities included
8 with the entries represent account balances as of December 31, 2014 and will be updated
9 prior to the closing of the Transaction.

10 **V. ACCOUNTING FOR TRANSACTION-RELATED COSTS**

11 **Q. Are you aware that the Applicants commit to exclude all Transaction-related costs**
12 **from MAIT's transmission rates as part of their application for Commission**
13 **approval of the Transaction?**

14 A. Yes.

15 **Q. What are the applicable Transaction-related costs?**

16 A. The applicable Transaction-related costs are all costs, including internal labor and other
17 than labor costs beginning with such costs incurred to discuss, gather information and
18 investigate the feasibility of creating MAIT, and continuing through the completion of
19 the Transaction.

20 **Q. How will MAIT track these costs over time and ensure that they are not recovered**
21 **in future rates?**

1 A. All transaction related costs are being charged to a work order and are recorded to FERC
2 account 426.5 - Other Deductions.

3 **Q. Does this conclude your direct testimony?**

4 A. Yes, it does, at this time.

Biography
K. Jon Taylor
Vice President, Controller and Chief Accounting Officer

Jon Taylor is vice president, controller and chief accounting officer for FirstEnergy Corp., a position he has held since May 2013. In this role, he is responsible for ensuring that the financial, accounting and tax records of FirstEnergy and its subsidiaries are maintained in conformity with generally accepted accounting principles and regulatory accounting requirements. He is also responsible for disbursements to employees, tax authorities and vendors; external financial reporting; accounting research in connection with proposed business transactions; and cost analysis and accounting classification of construction projects.

From August 2009 to April 2013, he served in various position within the controller's group including manager of Financial Reporting and Technical Research, assistant controller of FirstEnergy Utilities and assistant controller for FirstEnergy Solutions and FirstEnergy Generation. From 1997 to 2009, he was with the PricewaterhouseCoopers, LLP where he served in various client service positions.

Mr. Taylor holds a Bachelor of Science degree in accounting and a Master of Accountancy degree from the University of Alabama at Birmingham. Mr. Taylor is a licensed certified public accountant in Ohio and Alabama. He has provided expert testimony before the Public Utilities Commission of Ohio ("PUCO") and Public Service Commission of West Virginia ("WVPSC").

Mr. Taylor has prepared and presented testimony in the following rate-related cases:

PUCO Cases:

Docket Nos.	Case Name
13-1147-EL-UNC	Significantly Excessive Earnings Test
14-0828-EL-UNC	Significantly Excessive Earnings Test

WVPSC Cases:

CAPITAL CONTRIBUTION AGREEMENT

This Capital Contribution Agreement (this “Agreement”) by and among **Jersey Central Power & Light Company**, a New Jersey corporation (“JCP&L”), **Pennsylvania Electric Company**, a Pennsylvania corporation (“PN”), **Metropolitan Edison Company**, a Pennsylvania corporation (“ME”, together with JCP&L and PN, the “Class B Members,” individually, each a “Class B Member”), **FirstEnergy Transmission, LLC**, a Delaware limited liability company (“Class A Member” and together with the Class B Members, the “Members” and individually, each a “Member”), and **Mid-Atlantic Interstate Transmission, LLC**, a Delaware limited liability company (“Company”) is made pursuant to §351 of the Internal Revenue Code of 1986, as amended, and is effective as of [DATE] (the “Effective Date”).

BACKGROUND

WHEREAS, Company was organized by Class A Member under the laws of the State of Delaware on June , 2015;

WHEREAS, the Members have entered into an Amended and Restated Limited Liability Company Operating Agreement of the Company dated as of the Effective Date (the “Operating Agreement”);

WHEREAS, Class A Member desires to transfer \$[AMOUNT] as a capital contribution (a “Cash Contribution”) in return for the Class A Interests to be issued by Company, and Company desires to acquire and accept the Cash Contribution from the Class A Member;

WHEREAS, each Class B Member desires to transfer, and relinquish all rights in, such property as more fully described in Exhibit A hereto as a capital contribution (each, a “Property Contribution” and collectively the “Property Contributions”) in return for Class B Interests to be issued by Company, and Company desires to acquire and accept a Property Contribution from each of the Class B Members in proportion to each Class B Member’s respective Class B Interests (the collective Property Contributions, together with the Cash Contribution, are hereinafter also referred to as the “Capital”); and

WHEREAS, pursuant to the terms and conditions set forth below, Members and Company desire to enter into such transactions in which each of the Members contributes Capital to Company in consideration of their respective membership interest in Company.

AGREEMENT

NOW THEREFORE, in consideration of the above premises and the promises contained in this Agreement, and intending to be legally bound, the parties to this Agreement agree as follows:

§1. Transfer of Capital Contribution to Company

§1.1 On the Effective Date, Class A Member shall contribute, transfer, assign, convey and deliver to the Company, and the Company shall accept, the Cash Contribution.

§1.2 On the Effective Date, Class B Members shall contribute, transfer, assign, convey and deliver to the Company, and the Company shall accept, the Property Contributions.

§1.3 After the Effective Date, Class A Member may make additional cash contributions (each, an “Additional Cash Contribution”) to Company in accordance with the Operating Agreement; each such Additional Cash Contribution by Class A Member to the Company shall be confirmed by the Company and Members utilizing the form of written confirmation attached hereto as Annex 1 (the "Confirmation"), which Confirmation may be in electronic or written form. Failure by the Company and Members to utilize the Confirmation for any Additional Cash Contribution to the Company, or any error in such Confirmation, shall not affect the validity of any Additional Cash Contribution by Class A Member to the Company pursuant to this Agreement.

§2. Equity Interest in Company

§2.1 In exchange for, and upon the completion of, the transfer described in §1.1 above, Company shall issue, and the Class A Member shall own, 100% of the Class A Interests in Company.

§2.2 In exchange for, and upon the completion of, the transfer described in §1.2 above, Company shall issue, and the Class B Members shall own, the Class B Interests in Company as follows:

JCPL	[]% Class B Interest
ME	[]% Class B Interest
PN	[]% Class B Interest

§2.3 Upon the completion of any Additional Cash Contribution described in §1.3 above, Class A Member shall continue to be the sole Class A member.

§3. Warranties of Company

§3.1 Company is a duly organized and validly existing limited liability company under the laws of the State of Delaware.

§3.2 Company (i) is in good standing in the State of Delaware and (ii) has no federal, state or local tax liabilities which are past due.

§3.3 To the best of the knowledge of the undersigned officer of Company, there is no legal action or proceeding pending against Company that would inhibit the transaction of Company’s ordinary business or prevent Company from validly entering into this Agreement.

§3.4 Company has the limited liability company power and authority to enter into this Agreement, and the officer executing the Agreement on behalf of Company has been duly authorized to do so.

§3.5 The execution and performance of the obligations contained in this Agreement do not constitute a violation, breach or default under any other agreement by which Company is bound.

§4. Warranties of Class A Member

§4.1 Class A Member is a duly organized and validly existing limited liability company under the laws of the State of Delaware.

§4.2 To the best of the knowledge of the undersigned officer of Class A Member, there is no legal action or proceeding pending against Class A Member that would inhibit the transaction of Class A Member's ordinary business or would prevent Class A Member from validly entering into this Agreement and performing the transactions contemplated herein.

§4.3 Class A Member Parent has the limited liability company power and authority to enter into this Agreement, and the officer executing this Agreement on behalf of Class A Member has been duly authorized to do so.

§4.4 No governmental authorizations are or will be required in connection with the execution, delivery or performance by Class A Member, or the consummation by it of the transactions contemplated by this Agreement or the Operating Agreement other than such authorizations previously disclosed to Class B Members, which authorizations have been duly issued and are in full force and effect.

§5. Warranties of Class B Members

§5.1 Each Class B Member is a duly organized and validly existing corporation under the laws of the jurisdiction of its formation.

§5.2 To the best of the knowledge of the undersigned officer of each Class B Member, there is no legal action or proceeding pending against such Class B Member that would inhibit the transaction of such Class B Member's ordinary business or would prevent such Class B Member from validly entering into this Agreement and performing the transactions contemplated herein.

§5.3 Each Class B Member has the corporate power and authority to enter into this Agreement, and the officer executing this Agreement on behalf of each such Class B Member has been duly authorized to do so.

§5.4 No governmental authorization is or will be required in connection with the execution, delivery or performance by each Class B Member, or the consummation by it of the transactions contemplated by this Agreement or the Operating Agreement other than such authorizations previously disclosed to Class A Member, which authorizations have been duly issued and are in full force and effect.

§5.5 Each Class B Member has as of the Effective Date (i) valid, good and marketable title to all of their respective Property Contributions, and such Property Contributions are free and clear of all liens; and (ii) the unrestricted right to contribute, sell, transfer, assign, convey and deliver to the Company all right, title and interest in and to their respective Property Contributions without penalty or other adverse consequences.

§6. Mutuality of Consent.

Each party to this Agreement acknowledges that this Agreement and the Operating Agreement are the manifestation of direct negotiation, and each such agreement represents the mutual and voluntary consent and understanding of the parties hereto and thereto.

§7. Each Party Familiar with Operations of Other Party.

Each party to this Agreement acknowledges that it (i) is familiar with the operations of the other parties, (ii) has been provided access to all necessary financial records, statements, accounts or other materials of the other parties to the extent such party so requested, and (iii) is competent to evaluate the risks associated with the performance of its obligations under the Agreement.

§8. Governing Law.

This Agreement is to be governed by and interpreted and enforced in accordance with Delaware law without reference to the conflict of laws provisions thereof.

§9. Non-assignability.

This Agreement shall be binding upon and inure to the benefit of the parties and their respective successors and assigns; provided, however, that this Agreement, or any portion thereof, may not be assigned without the written consent of each non-assigning party, which consent shall not be unreasonably withheld.

§10. Severability.

If any provision of the Agreement is determined to be invalid or unenforceable, such invalidity or unenforceability shall not affect the remaining provisions of this Agreement.

§11. Entire Agreement.

This Agreement, together with the Operating Agreement, constitutes the entire understanding of the parties with respect to the subject matter hereof and supersedes all prior understandings, contracts and agreements between the parties.

§12. Amendment.

This Agreement may not be amended or modified without the written consent of each party hereto.

§13. Expenses.

Each party agrees to pay its respective expenses incurred with respect to this Agreement and the consummation of the transactions contemplated thereby.

§15. Defined Terms.

Capitalized terms used herein and not otherwise defined in this Agreement have the meanings given such terms in the Operating Agreement.

§16. Counterparts.

Exhibit KJT-1

This Agreement may be executed in any number of counterparts, each of which shall be an original, but all of which together shall constitute one instrument.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, the undersigned have duly executed this Agreement of the date first written above.
